

MACROECONOMIC THEORY AND POLICY

THIRD EDITION

William H. Branson

Princeton University

1817

HARPER & ROW, PUBLISHERS, New York
Grand Rapids, Philadelphia, St. Louis, San Francisco,
London, Singapore, Sydney, Tokyo

Contents

Preface

xiii

Part One

- AN INTRODUCTION TO MACROECONOMICS 1**
- 1 Actual and Potential GNP: Fluctuations and Growth 3**
- The Development of Macroeconomics 3
 - Actual and Potential Output 5
 - An Analytical Approach to Macroeconomics 11
- 2 A Review of the National Income and Product Accounts 15**
- Some Principles Behind the Accounts 17
 - The Circular Flow of Product and Income 18
 - GNP on the Product Side 20
 - GNP by Type of Income, and National Income 23
 - The Disposition of National Income 25
 - Summary of the GNP Identity 27
 - The Government Sector in the Accounts 29
 - GNP as a Welfare Measure 32
- 3 Introduction to Income Determination: The Multiplier 35**
- The Saving-Investment Balance 37
 - Planned and Realized Investment 37
 - The Tax, Consumption, and Saving Functions 38
 - Determination of Equilibrium Income 40
 - Derivation of the Expenditure Multiplier 45
 - Conclusion to Part I 51

*Part Two***NATIONAL INCOME DETERMINATION: THE
STATIC EQUILIBRIUM MODEL 53****4 Demand-Side Equilibrium: Income and the
Interest Rate 55**

Equilibrium Income and the Interest Rate in the Product Market 56

Equilibrium Income and the Interest Rate in the Money Market 62

Equilibrium in the Product and Money Markets 69

Income and the Price Level on the Demand Side 72

5 An Introduction to Monetary and Fiscal Policy 75

Fiscal Policy Effects on Demand 77

Monetary Policy Effects on Demand 88

The Interaction of Monetary and Fiscal Policies 94

Multipliers and the Aggregate Demand Curve 98

Appendix: Matrix Algebra 101

6 Demand and Supply in the Labor Market 105

The Simple Depression Model 106

The Demand for Labor 109

The Supply of Labor 114

Equilibrium in the Labor Market 119

Equilibrium Unemployment 121

7 Supply-Side Equilibrium: Output and the Price Level 127

Expectations and Aggregate Supply 128

Introduction to the Formation of Expectations 136

Supply-Side Disturbances 140

8 Equilibrium in the Static Model 145Determination of Equilibrium y , N , r , and P 145

Reaction to Demand Disturbances 147

Reaction to Supply Disturbances 156

9 Monetary, Fiscal, and Incomes Policy 165

- Monetary and Fiscal Policy in the Static Model 166
- Monetary and Fiscal Policy in the Classical Case 172
- Fiscal and Monetary Multipliers in the Static Model 174
- Incomes Policy in the Static Model 181
- Incomes Policy and Excess Demand 182

10 Search, Wage Rigidity, and Unemployment 187

- Labor Market Search and Employment 188
- Search Costs and Wage Rigidity 190
- Wage Rigidity in the Aggregate Labor Market 192
- Local Wage Rigidities and Aggregate Unemployment 199
- Price Stickiness and the Aggregate Supply Function 201
- Summary: An Eclectic View of Unemployment 203

11 Rational Expectations and Demand Policy 205

- Two Preliminaries 206
- The Basic Model with Exogenous Expectations 207
- The Basic Model with Expectations Endogenous 213
- The Rational Expectations Hypothesis 216
- One-Period Contracts and Aggregate Supply 223
- Long-Term Contracts and Economic Policy 229
- Conclusion: Rational Expectations and the New Classical View 234

Part Three

SECTORAL DEMAND FUNCTIONS AND EXTENSIONS OF THE STATIC MODEL 237

12 Consumption and Consumer Expenditure 239

- Background: Cross Sections, Cycles, and Trends 240
- The Basic Model of Consumer Behavior 243
- Three Theories of the Consumption Function 252
- Two Alternatives in Consumption Theory 268
- Choice Structure and Disequilibrium 273
- The MPS Model 275
- The Wealth Effect in the Static Model 276
- Conclusion: Some Implications for Stabilization Policy 281

13 Investment Demand 285

- The Present Value Criterion for Investment 286
- The Marginal Efficiency of Investment 290
- Investment Demand and Output Growth 295
- The q -Theory of Investment 305
- The User Cost and Liquidity Effects 307
- Lags in Investment Demand 310
- Investment in the Static Model 314
- Conclusion: Investment Demand and Monetary and Fiscal Policy 317

14 The Demand for Money 319

- The Regressive Expectations Model 320
- The Portfolio Balance Approach 327
- The Transactions Demand for Money 335
- Money as a Consumer's and Producer's Good 340
- Empirical Estimates of Income and Interest Elasticities 343

15 The Supply of Money 347

- The Instruments of Monetary Policy 348
- The Mechanism of Monetary Expansion 350
- The Determinants of the Money Supply 352
- Empirical Estimates of Interest Elasticity 354
- The Money Supply in the Static Model 357
- Intermediate Targets and the Practice of Monetary Policy 361

16 Monetary and Fiscal Policy in the Extended Model 367

- The Static Model Extended 368
- The Effects of Fiscal Policy Changes 379
- The Effectiveness of Aggregate Demand Policy: Monetarists, Fiscalists, and New Classicals 382
- Tax Rate Changes and the Budget Deficit 391
- Fiscal Stimulus and Deficit Financing 396

17 The Foreign Sector and the Balance of Payments 401

- The Current Account and Product Market Equilibrium 404
- The Capital Account and Balance-of-Payments Equilibrium 407
- Balance-of-Payments Adjustment and the *LM* Curve 413
- Balance-of-Payments Adjustment Policy with Fixed Rates 416
- Flexible Exchange Rates 419
- The Domestic Economy as a Price-Taker 423

18 Macroeconomics When Markets Do Not Clear 429

- The Reappraisal of the Foundations of Macroeconomics 429
- Some Analytic Preliminaries for the "Reappraisal" Model 432
- Microeconomic Foundations for the Reappraisal Model 439
- The Complete Model 446
- The Model in a Small Open Economy 455
- The Importance of Time and the Future 456
- Comparative Statics, Multipliers, and Dynamics 460
- The Model and Actual Economies 463
- Conclusion: Some Future Research in Macro Theory 465

Part Four**MEDIUM-TERM DYNAMICS: BETWEEN STATIC EQUILIBRIUM AND LONG-RUN GROWTH 469****19 Inflation, Productivity, and Income Distribution 471**

- Inflation in the Static Model 472
- Wages, Prices, and Productivity 480
- The Wage-Price Guideposts and Income Distribution 485
 - Appendix: The Uses of Logarithms 489
 - The Natural Constant *e* 489
 - Natural Logarithms 490
 - Point Elasticities 492

20 Inflation and Unemployment: The Phillips Curve 495

The Basic Analytics of Inflation and Unemployment 496

The Long-Run Phillips Curve 499

Adaptive Expectations in the Phillips Curve 504

Inflation and Unemployment 1960–1986 508

21 Introduction to Stock-Adjustment Dynamics 517

Money Finance of the Budget Deficit 518

Introduction of Wealth Effects 525

Bond Finance of the Deficit and Crowding Out 530

Interaction Between the Government Budget and the Balance of
Payments 534

A General View of Asset Stock Adjustment 538

22 Trend Growth in the Static Model 541

Assumptions Underlying Trend Growth 543

Trend Growth of Output and Prices 544

Trend Growth of the Money Supply 547

Product Market Equilibrium and the Budget 549

The Monetary-Fiscal Policy Mix Along Trend 552

Fiscal Drag and the Full-Employment Surplus 556

Public Debt with Trend Growth 557

Part Five

LONG-RUN GROWTH WITH FULL EMPLOYMENT 559

23 Introduction to Growth Models 561

The Stylized Facts of Growth 564

Basic Assumptions of One-Sector Growth Models 568

The Harrod-Domar Condition for Equilibrium Growth 570

24 The Basic Neoclassical Growth Model 575

- The Constant>Returns Production Function 576
- Equilibrium Growth in the Neoclassical Model 579
- The Neoclassical Model with Technical Progress 588
- Multiple Equilibria in the Neoclassical Model 591

25 The Basic Model Extended: Varying Saving Assumptions 595

- The Classical Saving Function 599
- The Characteristic Equations of a One-Sector Growth Model 602
- The Kaldor Saving Function 604
- The Ando-Modigliani (A-M) Consumption Function 606

26 The Golden Rule and an Introduction to Optimal Growth Models 611

- The Basic Neoclassical Model Once More 612
- Saving and Consumption in Growth Equilibrium 616
- Phelps' Golden Rule of Accumulation 619
- Optimal Growth Turnpikes 622
- Conclusion 627

27 Medium-Term Growth and "the Measure of Our Ignorance" 629

- Output Growth, Input Growth, and the Constant>Returns-to-Scale Production Function 633
- Neutral Disembodied Technical Progress 637
- Labor-Augmenting Disembodied Technical Progress 638
- Capital-Embodied Technical Progress 639

Index 646
