# Advances in Bifurcation and Degradation in Geomaterials

Proceedings of the 9th International  
Workshop on Bifurcation and  
Degradation in Geomaterials

Springer

# Contents

<b>Instability and Bifurcation for Inelastic Geomaterials</b> .....	1
R. Chambon	
<b>Part I Micromechanical Origins and Multiscale Analysis of Instabilities in Geomaterials</b>	
<b>Deciphering D’Alemberts Dream: New Tools for Uncovering Rules for Self-Organized Pattern Formation in Geomaterials</b> .....	11
Antoinette Tordesillas and David M. Walker	
<b>Microscopic Origins of Shear Strength in Packings Composed of Elongated Particles</b> .....	21
E. Azéma and F. Radjaï	
<b>Multi-scale Analysis of Instability in Sand</b> .....	29
C.S. Chang, Z.-Y. Yin, and P.-Y. Hicher	
<b>Observation of Microstructural Changes and Strain Localization of Unsaturated Sands Using Microfocus X-ray CT</b> .....	37
Y. Higo, F. Oka, S. Kimoto, T. Sanagawa, and Y. Matsuhima	
<b>Signature of Anisotropy in Liquefiable Sand Under Undrained Shear</b> ....	45
Jidong Zhao and Ning Guo	
<b>Friction and Localization Associated with Non-spherical Particles</b> .....	53
A.V. Dyskin and E. Pasternak	
<b>Length Scales for Nonaffine Deformation in Localized, Granular Shear</b> .....	59
Amy L. Rechenmacher and Sara Abedi	
<b>Discovering Community Structures and Dynamical Networks from Grain-Scale Kinematics of Shear Bands in Sand</b> .....	67
Antoinette Tordesillas, David M. Walker, Amy L. Rechenmacher, and Sara Abedi	

<b>Slip and Dislocation in Crystalline Solids as Precursors to Localized Deformation</b> .....	75
Ronaldo I. Borja, Helia Rahmani, and Fushen Liu	
<b>Part II Geo-environmental Applications</b>	
<b>A Chemo-Thermo-Mechanically Coupled Behavior During Gas Hydrate Dissociation and Its Numerical Analysis</b> .....	85
S. Kimoto, F. Oka, Y. Miki, T. Fukuda, and H. Iwai	
<b>Stability of Nail Reinforced Boreholes</b> .....	93
Euripides Papamichos	
<b>Stability Analysis of Creeping Faults: The Role of Chemical Decomposition of Minerals</b> .....	101
Jean Sulem and Nicolas Brantut	
<b>Onset of Immersed Granular Avalanches by DEM-LBM Approach</b> .....	109
Jean-Yves Delenne, M. Mansouri, F. Radjaï, M.S. El Youssoufi, and A. Seridi	
<b>Multi-scale Periodic Homogenization of Ionic Transfer in Cementitious Materials</b> .....	117
K. Bourbatache, O. Millet, and A. Aït-Mokhtar	
<b>Chimney of Fluidization and “Sandboil” in a Granular Soil</b> .....	125
P. Philippe and M. Badiane	
<b>Experimental Study of Contact Erosion at a Granular Interface</b> .....	131
R. Beguin, P. Philippe, and Y.-H. Faure	
<b>Numerical Modeling of Hydrofracturing Using the Damage Theory</b> .....	137
Alice Guest and Antonin Settari	
<b>Polydisperse Segregation Down Inclines: Towards Degradation Models of Granular Avalanches</b> .....	145
Benjy Marks, Itai Einav, and Pierre Rognon	
<b>Numerical Modelling of Interaction Between Snow Avalanche and Protective Structures</b> .....	153
M. Wawra, Y. Wang, and W. Wu	
<b>Crack Propagations on the Rock Face at Glacier Point of the Yosemite National Park After the 1999 Rockfall</b> .....	159
K.T. Chau and P. Lin	
<b>Soil – Machine Interaction: Simulation and Testing</b> .....	165
Mustafa Alsaleh	

### **Part III Numerical Modeling of Failure and Localized Deformation in Geomaterials**

<b>Multiscale Semi-Lagrangian Reproducing Kernel Particle Method for Modeling Damage Evolution in Geomaterials</b> .....	179
J.S. Chen, P.C. Guan, S.W. Chi, X. Ren, M.J. Roth, T.R. Slawson, and M. Alsaleh	
<b>Tunnel Excavation Modeling with Micromechanical Approaches</b> .....	185
S��verine Levasseur, Fr��d��ric Collin, Robert Charlier, and Djim��do Kondo	
<b>Coupling Discrete Elements and Micropolar Continuum Through an Overlapping Region in One Dimension</b> .....	193
Richard A. Regueiro and Beichuan Yan	
<b>On the Numerical Implementation of a Multi-Mechanism Cyclic Plasticity Model Associated to a Dilation Second Gradient Model Aiming Strain Localization Mitigation</b> .....	201
A. Foucault, F. Voltaire, and A. Modaressi	
<b>2D and 3D Modelling of Geomaterials Using a Second Gradient Dilation Model</b> .....	209
R. Fernandes, B. Ducoin, and R. Chambon	
<b>Local Second Gradient Models for Thermo-Hydro-Mechanical Coupling in Rock Like Materials</b> .....	219
Y. Sieffert, F. Marinelli, and R. Chambon	
<b>Two Scale Model (FEM-DEM) For Granular Media</b> .....	227
Micha�ł Nitka, Ga��l Combe, Cristian Dascalu, and Jacques Desrues	
<b>Finite Element Modelling of Material Instability via an Enriched Elastoplastic Model</b> .....	235
Richard Wan and M. Pinheiro	
<b>Comprehensive DEM Study of the Effects of Rolling Resistance On Strain Localization in Granular Materials</b> .....	243
Marte Gutierrez and Abdalsalam Mohamed	
<b>Modeling Porous Granular Aggregates</b> .....	249
R. Affes, V. Topin, J.-Y. Delenne, Y. Monerie, and F. Radj��i	
<b>Comparative Modelling of Shear Zone Patterns in Granular Bodies with Finite and Discrete Element Model</b> .....	255
Jacek Tejchman	
<b>Influence of Weak Layer Heterogeneity on Slab Avalanche Release Using a Finite Element Method</b> .....	261
J. Gaume, G. Chambon, M. Naaim, and N. Eckert	

## Part IV Failure, Localization and Multi-physical Couplings

<b>Coupled Mechanical-Hydrological-Chemical Problems in Elasto-plastic Saturated Soils and Soft Rocks Using <i>escript</i></b> .....	269
Arash Mohajeri, Hans Muhlhaus, Lutz Gross, and Thomas Baumgartl	
<b>Analytical Evidence of Shear Band Bifurcations for Softening Materials</b> .....	277
D. Caillerie, R. Chambon, and Frédéric Collin	
<b>Shear Banding in Cross-Anisotropic Sand Tests with Stress Rotation</b> .....	285
Poul V. Lade	
<b>Instability of Unsaturated Soil During the Water Infiltration</b> .....	293
F. Oka, E. Garcia, and S. Kimoto	
<b>A Revisiting of Undrained Shear Banding in Water-Saturated Sand</b> .....	301
Peijun Guo	
<b>Strain Localization Conditions Under True Triaxial Stress States</b> .....	309
Kathleen A. Issen, Mathew D. Ingraham, and Thomas A. Dewers	
<b>Meso-Scale Evolution of Shear Localization Observed in Plane Strain Experiment on Kaolin Clay</b> .....	315
Dunja Perić and Marte Gutierrez	
<b>Failure of Castlegate Sandstone Under True Triaxial Loading</b> .....	321
Mathew D. Ingraham, Kathleen A. Issen, and David J. Holcomb	
<b>Frequency Signature of Damage Localization</b> .....	327
E. Pasternak and A.V. Dyskin	
<b>Modeling of Weathered and Moisture Sensitive Granular Materials</b> .....	333
Erich Bauer and Zhongzhi Fu	
<b>Effect of Different Sample Preparation Methods on the Behavior of Granular Materials Using Bender Elements</b> .....	339
M. Aris and N. Benahmed	
<b>Characterization of the Strain Localization in a Porous Rock in Plane Strain Condition Using a New True-Triaxial Apparatus</b> .....	345
P. Bésuelle and S.A. Hall	
<b>Granular Materials at Meso and Macro Scale: Photo-Elasticity and Digital Image Correlation</b> .....	353
Danuta Lesniewska and David Muir Wood	
<b>Index</b> .....	359
