Series Preface	xiii
Preface	xv
1 Introduction	1
1.1 Notation and Basic Definitions	1
1.2 Control Systems	3
1.2.1 <i>Linear Tracking Systems</i>	7
1.2.2 <i>Linear Time-Invariant Tracking Systems</i>	9
1.3 Guidance and Control of Flight Vehicles	10
1.4 Special Tracking Laws	13
1.4.1 <i>Proportional Navigation Guidance</i>	13
1.4.2 <i>Cross-Product Steering</i>	16
1.4.3 <i>Proportional-Integral-Derivative Control</i>	19
1.5 Digital Tracking System	24
1.6 Summary	25
Exercises	26
References	28
2 Optimal Control Techniques	29
2.1 Introduction	29
2.2 Multi-variable Optimization	31
2.3 Constrained Minimization	33
2.3.1 <i>Equality Constraints</i>	34
2.3.2 <i>Inequality Constraints</i>	38
2.4 Optimal Control of Dynamic Systems	41
2.4.1 <i>Optimality Conditions</i>	43
2.5 The Hamiltonian and the Minimum Principle	44
2.5.1 <i>Hamilton–Jacobi–Bellman Equation</i>	45
2.5.2 <i>Linear Time-Varying System with Quadratic Performance Index</i>	47
2.6 Optimal Control with End-Point State Equality Constraints	48
2.6.1 <i>Euler–Lagrange Equations</i>	50
2.6.2 <i>Special Cases</i>	50
2.7 Numerical Solution of Two-Point Boundary Value Problems	52
2.7.1 <i>Shooting Method</i>	54
2.7.2 <i>Collocation Method</i>	57
2.8 Optimal Terminal Control with Interior Time Constraints	61
2.8.1 <i>Optimal Singular Control</i>	62
2.9 Tracking Control	63

2.9.1	<i>Neighboring Extremal Method and Linear Quadratic Control</i>	64
2.10	Stochastic Processes	69
2.10.1	<i>Stationary Random Processes</i>	75
2.10.2	<i>Filtering of Random Noise</i>	77
2.11	Kalman Filter	77
2.12	Robust Linear Time-Invariant Control	81
2.12.1	<i>LQG/LTR Method</i>	82
2.12.2	<i>H₂/H_∞ Design Methods</i>	89
2.13	Summary	96
	Exercises	98
	References	101
3	Optimal Navigation and Control of Aircraft	103
3.1	Aircraft Navigation Plant	104
3.1.1	<i>Wind Speed and Direction</i>	110
3.1.2	<i>Navigational Subsystems</i>	112
3.2	Optimal Aircraft Navigation	115
3.2.1	<i>Optimal Navigation Formulation</i>	116
3.2.2	<i>Extremal Solution of the Boundary-Value Problem: Long-Range Flight Example</i>	119
3.2.3	<i>Great Circle Navigation</i>	121
3.3	Aircraft Attitude Dynamics	128
3.3.1	<i>Translational and Rotational Kinetics</i>	132
3.3.2	<i>Attitude Relative to the Velocity Vector</i>	135
3.4	Aerodynamic Forces and Moments	136
3.5	Longitudinal Dynamics	139
3.5.1	<i>Longitudinal Dynamics Plant</i>	142
3.6	Optimal Multi-variable Longitudinal Control	145
3.7	Multi-input Optimal Longitudinal Control	147
3.8	Optimal Airspeed Control	148
3.8.1	<i>LQG/LTR Design Example</i>	149
3.8.2	<i>H_∞ Design Example</i>	160
3.8.3	<i>Altitude and Mach Control</i>	166
3.9	Lateral-Directional Control Systems	173
3.9.1	<i>Lateral-Directional Plant</i>	173
3.9.2	<i>Optimal Roll Control</i>	177
3.9.3	<i>Multi-variable Lateral-Directional Control: Heading-Hold Autopilot</i>	180
3.10	Optimal Control of Inertia-Coupled Aircraft Rotation	183
3.11	Summary	189
	Exercises	192
	References	194
4	Optimal Guidance of Rockets	195
4.1	Introduction	195
4.2	Optimal Terminal Guidance of Interceptors	195
4.3	Non-planar Optimal Tracking System for Interceptors: 3DPN	199
4.4	Flight in a Vertical Plane	208
4.5	Optimal Terminal Guidance	211

4.6	Vertical Launch of a Rocket (Goddard's Problem)	216
4.7	Gravity-Turn Trajectory of Launch Vehicles	219
	4.7.1 <i>Launch to Circular Orbit: Modulated Acceleration</i>	220
	4.7.2 <i>Launch to Circular Orbit: Constant Acceleration</i>	227
4.8	Launch of Ballistic Missiles	228
	4.8.1 <i>Gravity-Turn with Modulated Forward Acceleration</i>	232
	4.8.2 <i>Modulated Forward and Normal Acceleration</i>	233
4.9	Planar Tracking Guidance System	237
	4.9.1 <i>Stability, Controllability, and Observability</i>	241
	4.9.2 <i>Nominal Plant for Tracking Gravity-Turn Trajectory</i>	243
4.10	Robust and Adaptive Guidance	247
4.11	Guidance with State Feedback	250
	4.11.1 <i>Guidance with Normal Acceleration Input</i>	250
4.12	Observer-Based Guidance of Gravity-Turn Launch Vehicle	254
	4.12.1 <i>Altitude-Based Observer with Normal Acceleration Input</i>	255
	4.12.2 <i>Bi-output Observer with Normal Acceleration Input</i>	260
4.13	Mass and Atmospheric Drag Modeling	266
4.14	Summary	274
	Exercises	275
	References	275
5	Attitude Control of Rockets	277
5.1	Introduction	277
5.2	Attitude Control Plant	277
5.3	Closed-Loop Attitude Control	281
5.4	Roll Control System	281
5.5	Pitch Control of Rockets	282
	5.5.1 <i>Pitch Program</i>	282
	5.5.2 <i>Pitch Guidance and Control System</i>	283
	5.5.3 <i>Adaptive Pitch Control System</i>	288
5.6	Yaw Control of Rockets	294
5.7	Summary	295
	Exercises	295
	Reference	296
6	Spacecraft Guidance Systems	297
6.1	Introduction	297
6.2	Orbital Mechanics	297
	6.2.1 <i>Orbit Equation</i>	298
	6.2.2 <i>Perifocal and Celestial Frames</i>	299
	6.2.3 <i>Time Equation</i>	301
	6.2.4 <i>Lagrange's Coefficients</i>	304
6.3	Spacecraft Terminal Guidance	305
	6.3.1 <i>Minimum Energy Orbital Transfer</i>	307
	6.3.2 <i>Lambert's Theorem</i>	311
	6.3.3 <i>Lambert's Problem</i>	313
	6.3.4 <i>Lambert Guidance of Rockets</i>	322
	6.3.5 <i>Optimal Terminal Guidance of Re-entry Vehicles</i>	327

6.4	General Orbital Plant for Tracking Guidance	334
6.5	Planar Orbital Regulation	339
6.6	Optimal Non-planar Orbital Regulation	345
6.7	Summary	352
	Exercises	352
	References	355
7	Optimal Spacecraft Attitude Control	357
7.1	Introduction	357
7.2	Terminal Control of Spacecraft Attitude	357
	7.2.1 <i>Optimal Single-Axis Rotation of Spacecraft</i>	358
7.3	Multi-axis Rotational Maneuvers of Spacecraft	364
7.4	Spacecraft Control Torques	375
	7.4.1 <i>Rocket Thrusters</i>	375
	7.4.2 <i>Reaction Wheels, Momentum Wheels and Control Moment Gyros</i>	377
	7.4.3 <i>Magnetic Field Torque</i>	378
7.5	Satellite Dynamics Plant for Tracking Control	379
7.6	Environmental Torques	380
	7.6.1 <i>Gravity-Gradient Torque</i>	382
7.7	Multi-variable Tracking Control of Spacecraft Attitude	383
	7.7.1 <i>Active Attitude Control of Spacecraft by Reaction Wheels</i>	385
7.8	Summary	389
	Exercises	389
	References	390
Appendix A:	Linear Systems	391
A.1	Definition	391
A.2	Linearization	392
A.3	Solution to Linear State Equations	392
	A.3.1 <i>Homogeneous Solution</i>	393
	A.3.2 <i>General Solution</i>	393
A.4	Linear Time-Invariant System	394
A.5	Linear Time-Invariant Stability Criteria	395
A.6	Controllability of Linear Time-Invariant Systems	395
A.7	Observability of Linear Time-Invariant Systems	395
A.8	Transfer Matrix	396
A.9	Singular Value Decomposition	396
A.10	Linear Time-Invariant Control Design	397
	A.10.1 <i>Regulator Design by Eigenstructure Assignment</i>	397
	A.10.2 <i>Regulator Design by Linear Optimal Control</i>	398
	A.10.3 <i>Linear Observers and Output Feedback Compensators</i>	398
	References	400
Appendix B:	Stability	401
B.1	Preliminaries	401
B.2	Stability in the Sense of Lagrange	402
B.3	Stability in the Sense of Lyapunov	404
	B.3.1 <i>Asymptotic Stability</i>	406

<i>B.3.2 Global Asymptotic Stability</i>	406
<i>B.3.3 Lyapunov's Theorem</i>	407
<i>B.3.4 Krasovski's Theorem</i>	408
<i>B.3.5 Lyapunov Stability of Linear Systems</i>	408
References	408
Appendix C: Control of Underactuated Flight Systems	409
C.1 Adaptive Rocket Guidance with Forward Acceleration Input	409
C.2 Thrust Saturation and Rate Limits (Increased Underactuation)	415
C.3 Single- and Bi-output Observers with Forward Acceleration Input	417
References	432
Index	433
