

Materials Science and Technology

A Comprehensive Treatment

Edited by

R. W. Cahn, P. Haasen, E. J. Kramer

Volume 18

Processing of Polymers

Volume Editor: Han E.H. Meijer

WILEY-VCH

Weinheim · New York · Chichester · Brisbane · Singapore · Toronto

Contents

Part I: Introduction

- 1 Processing for Properties 3
H. E. H. Meijer
- 2 General Principles of Polymer Processing Modeling 77
J.-F. Agassant

Part II: Structure Development During Processing

- 3 Emulsions: The Dynamics of Liquid–Liquid Mixing 113
J. M. H. Janssen
- 4 Flow-Induced Orientation and Structure Formation 189
A. Keller, H. W. H. Kolnaar
- 5 Crystallization 269
G. Eder, H. Janeschitz-Kriegl

Part III: Reactive Extrusion

- 6 Fundamentals of Reactive Extrusion: An Overview 345
G.-H. Hu, M. Lambla †
- 7 Network Formation 401
K. Dušek
- 8 Reactive Processing of Polymer Blends:
Polymer–Polymer Interface Aspects 429
T. Inoue, P. Maréchal
- 9 Structure Development in Reactive Systems 465
J. L. Stanford, A. J. Ryan, M. J. A. Elwell
- 10 Processing of Polymers Using Reactive Solvents 513
P. J. Lemstra, J. Kurja, H. E. H. Meijer

Part IV: Processing for Ultimate Properties

- 11 High-Modulus and High-Strength Fibers Based
on Flexible Macromolecules 551
C. W. M. Bastiaansen
- 12 Deformation and Toughness of Polymers 579
M. C. M. van der Sanden

Part V: Applications

- 13 Photopolymerization and Ultraviolet Curing
of Multifunctional Monomers 615
C. Decker
- 14 Conducting Polymers and Applications 659
L. M. Wilson
- 15 Materials Science of Pressure-Sensitive Adhesives 707
C. Creton
- 16 New Processing Technologies 743
I. M. Ward
- Index 763
