# Contents

Preface	ix
Introduction to the propagation of cw radiation and solitons in quadratically nonlinear media A.D. Boardman, P. Bontemps and K. Xie	1
Plane and guided wave effects and devices via quadratic cascading G. Assanto, K. Gallo and C. Conti	59
Control of laser light parameters by $\chi^{(2)} : \chi^{(2)}$ nonlinear optical devices S. Saltiel, I. Buchvarov and K. Koynov	89
Asymmetric quantum wells for second-order optical nonlinearities J.M. Arnold	113
Experiments on quadratic spatial solitons G.I. Stegeman, R. Schiek, R. Fuerst, Y. Baek, D. Baboiu, W. Torruellas, L. Torner and B. Lawrence	133
Diffraction beam interaction in quadratic nonlinear media A.P. Sukhorukov	163
A lithium niobate quadratic device for wavelength multiplexing around $1.55\mu\text{m}$ K. Gallo, G. Assanto and G.I. Stegeman	185
Full vector theory of fundamental and second-harmonic cw waves P. Bontemps and A.D. Boardman	189
Nonlinear phase shifts in a counterpropagating quasi-phase-matched configuration G.D. Landry and T.A. Maldonado	193
Generation of high power picosecond pulses by passively mode-locked Nd:YAG laser using frequency doubling mirror I.Ch. Buchvarov, P.N. Tzankov, V. Stoev, K. Demerdjiev, and D. Shumov	197
Collision, fusion, and spiralling of interacting solitons in a bulk quadratic medium V.V. Steblina, Y.S. Kivshar and A.V. Buryak	201

Quadratic ring-shaped solitary waves D. Neshev, M. Georgiev, A. Dreischuh and S. Dinev	205
Solitary and periodic pulses for $\chi^{(2)}$ : explicit solutions in abundance D.F. Parker and E.N. Tsoy	209
Propagation of ring dark solitary waves in saturable self-defocusing media E.D. Eugenieva and A.A. Dreischuh	215
The $N$ -soliton interactions, complex Toda chain and stable propagation of NLS soliton trains V.S. Gerdjikov, E.G. Evstatiev, D.J. Kaup, G.L. Diankov and I.M. Uzunov	219
Ray optics theory of self-matched beams mutual focusing in quadratic nonlinear media A.P. Sukhorukov and Lu Xin	227
Resonant properties of $\chi^2$ in two-particle frequency regions K.T. Stoychev	231
On parametric coupled solitons with high-order dispersion A.A. Sukhorukov	235
Large self-phase modulation via simultaneous second harmonic generation and sum frequency mixing K. Koynov and S. Saltiel	239
Pulsed beam self-focusing A.V. Churilova and A.P. Sukhorukov	243
Slow and immobile solitons in quadratic media S.V. Polyakov and A.P. Sukhorukov	247
Fermi resonance nonlinear waves and solitons in organic superlattices V.M. Agranovich and A.M. Kamchatnov	251
Cascaded processes in gyrotropy media and novel electro-optical effect on $\chi^{(2)}$ nonlinearity L.I. Pavlov and L.M. Kovachev	277

Classical and quantum aspects of cw parametric interaction in a cavity C. Fabre	293
Alternative media for cascading: Second order nonlinearities and cascading in plasma waveguides M. Georgieva-Grosse and A. Shivarova	319
Frequency conversion with semiconductor heterostructures V. Berger	345
Parametric interactions in waveguides realized on periodically poled crystals M.P. De Micheli, P. Baldi and D.B. Ostrowsky	375
Rb:KTP optical waveguides I. Savatinova, I. Savova, E. Liarokapis, M.N. Armenise and V. Passaro	401
Backward parametric interactions in quasi-phase matched configurations P. Aschieri, P. Baldi, M.P. De Micheli, D.B. Ostrowsky, G. Bellanca and P. Bassi	405
Modes of TM field in nonlinear Kerr media G. Zeglinski	409
Numerical simulations of self-induced plasma smoothing of spatially incoherent laser beams I. Ourdev, D. Pesme, W. Rozmus, V. Tikhonchuk, C.E. Capjack and R. Senda	413
Effects of impurities on existence and propagation of intrinsic localized modes in ferromagnetic spin chains S.V. Rakhmanova and D.L. Mills	415
Optical properties and holographic recording in $\text{Pb}_2\text{ScTaO}_6$ single crystal V. Marinova, S. Zhivkova, D. Tonchev and N. Metchkarov	419
Nonlinear effects in bulk semiconductor waveguide switches F. Bertrand, R. El Bermil, N. Paraire, N. Moresmau, and P. Dansas	423

Nonlinear transmission of ultrashort light pulses by a thin semiconductor film for the case of two-photon biexciton excitation	427
P. Khadzhi, S. Gaivan and O. Tatarinskaya	
The optical and structural properties of $HxLi_{1-x}NbO_3$ phases, generated in proton exchanged $LiNbO_3$ optical waveguides	429
Yu Yu. N. Korkishko, V.A. Fedorov and S.M. Kostritskii	
Optical properties of $Bi_{12}TiO_{20}$ photorefractive crystals doped with Cu and Ag	433
V. Marinova, V. Tassev and V. Sainov	
Coherent and incoherent optical processes and phase sensitive adiabatic states	437
I.G. Koprinkov	
High average power tunable deep UV generation using cascading second-order nonlinear optical conversions	441
I.G. Koprinkov, G.A. Naylor and J.-P. Pique	
Optical filters and switches using photonic bandgap structures	445
P. Dansas and N.A. Paraire	
Thin layer modification of P.V.D.F. with copper sulfide	449
T. Angelov, A. Kalt and D. Loughnot	
Quadratic solitons: past, present and future	451
Yuri S. Kivshar	
Index	477
