<i>Preface</i>	xi
Introduction	1
1 Forward Exchange	4
1.1 Introduction	4
1.2 Forward margins	4
1.3 Direct and indirect quotations	5
1.4 Premiums and discounts	6
1.5 Importance of the forward market	6
1.6 Forward foreign exchange swaps	6
1.7 Forward exchange risk	8
1.8 Forward options (option date forward contracts)	8
1.9 Length of an option period	8
1.10 Pricing a forward option	9
1.11 Option cover	10
1.12 Effect of premiums and discounts	10
1.13 Conclusions	12
2 Currency options	13
2.1 Introduction	13
2.2 Definition	13
2.3 Strike price	14
2.4 Premium	14
2.5 Intrinsic value	14
2.6 Time value	15
2.7 Geometry of currency options and forward exchange	17
2.8 Option pricing	18
2.9 The maturity date	18
2.10 Interest rate differentials	20
2.11 Calculating a fair price	20
2.12 Volatility	22
2.13 Are options too expensive?	24

Contents

3 Hedging using options	25
3.1 Introduction	25
3.2 Hedge ratio (the delta)	26
3.3 The ratio hedge	27
3.4 Interaction of the option and the delta	29
3.5 Volatility risk	31
3.6 'Vega' hedging	32
3.7 Gamma	32
4 Strategies in options	34
4.1 Introduction	34
4.2 Synthetics	34
4.3 Combinations of options	35
4.4 Vertical spreads	36
4.5 Volatility forecast trades	38
4.6 Conclusions	42
5 Traded currency options	43
5.1 Introduction	43
5.2 Standardisation	43
5.3 Market practices	44
5.4 Margins on traded currency options	44
5.5 Delta hedge (ratio hedge)	45
5.6 Providing fixed rate funds in other currencies	46
6 The break forward contract	49
6.1 Introduction	49
6.2 Features of break forward contracts	49
6.3 Applications	50
6.4 Comparison with forward contracts	51
6.5 Conclusion	51
7 Currency futures	52
7.1 Introduction	52
7.2 What are financial futures?	53
7.3 Standardisation	53
7.4 Clearing	53
7.5 How the futures market works	54
7.6 Trading	54
7.7 Hedging	55
7.8 Speculating	55
7.9 Closing out	55
7.10 Basis	56

7.11	Margins	56
7.12	Pricing a currency futures contract	57
7.13	Hedging with currency futures	58
7.14	Conclusions	58
8	Principles of hedging in financial futures	59
8.1	Introduction	59
8.2	Elements in making the hedge decision	59
8.3	What hedging alternatives are available and what will they cost?	61
8.4	Cross hedging	63
8.5	Correlation analysis	64
8.6	Linear regression	64
8.7	Deciding how many futures contracts are required for a good hedge (the hedge ratio)	65
8.8	The hedge management process	68
8.9	Conclusion	70
9	Short-term interest rate futures	71
9.1	Introduction	71
9.2	Interest rate futures	71
9.3	Standardisation	71
9.4	Pricing of Eurodollar futures	72
9.5	Value basis and simple basis	73
9.6	Basis change	75
9.7	Cross hedging	75
9.8	Taking the basis forecast into account	75
9.9	Three month sterling interest rate futures contracts	77
9.10	Uses of three month sterling futures	77
9.11	Considerations when choosing a futures contract for hedging	78
9.12	Using interest rate futures to offer fixed rate funds	79
9.13	Which rates for the customer?	82
10	Interest rate options	83
10.1	Introduction	83
10.2	Standardisation	84
10.3	Eurodollar option contracts	84
10.4	Profit and loss profiles of Eurodollar options	85
10.5	Options and futures	87
10.6	Hedging with Eurodollar options	88
10.7	Futures hedge	90
10.8	Rules for options and futures hedging	91

Contents

11	Forward rate agreements	93
11.1	Introduction	93
11.2	Characteristics of the FRA	93
11.3	FRA applications	94
11.4	Pricing of FRAs	95
11.5	Arbitrage between FRAs and the cash markets	96
11.6	Arbitrage between FRAs and futures	97
12	Gilt futures	98
12.1	Introduction	98
12.2	Gilt futures contracts	99
12.3	Gilt options contracts	99
12.4	Margining	101
12.5	The delivery system	101
12.6	LIFFE price factors	102
12.7	Cheapest to deliver gilts	104
12.8	Cash and carry arbitrage	105
12.9	Basis risk	105
12.10	Hedging with gilt futures contracts	107
12.11	Hedging the cheapest to deliver gilt	107
12.12	Hedging other gilts	108
12.13	Hedging with long gilt options	110
12.14	Bond portfolio hedging	111
12.15	Conclusion	115
13	United States Treasury bond futures and options	116
13.1	Introduction	116
13.2	Pricing of T-bond contracts	117
13.3	Hedging with T-bond contracts	117
13.4	Hedging dollar bonds other than T-bonds	118
13.5	Hedging with T-bond options	121
13.6	Conclusion	122
14	Swaps	123
14.1	Introduction	123
14.2	Swap structures	124
14.3	Interest rate swaps	124
14.4	The mechanics	125
14.5	Advantages of interest rate swaps	126
14.6	Variation on interest rate swaps	127
14.7	Basis swaps	129
14.8	Currency swaps	129
14.9	Fixed/fixed company swaps	130

Contents

14.10	Currency coupon swaps	131
14.11	Asset swaps	132
14.12	Swap risks	132
14.13	Quantification of the risk	133
14.14	Advantages to the bank	134
14.15	Background on the US dollar swap market	135
14.16	Pricing of interest rate swaps	135
14.17	Hedging swaps using repurchase (repo) agreements	137
14.18	Secondary swap market	138
14.19	Eurobond issues with attached currency swaps	139
14.20	Variations on the swap	141
14.21	Conclusion	142
<i>Appendix 1 Pricing model for a European call option</i>		143
<i>Appendix 2 Arithmetic formula for the delta on a currency call option</i>		144
<i>Bibliography</i>		145
<i>Index</i>		149
