

Proceedings of the Institution of Mechanical Engineers

International Conference

Advanced Suspensions

24-25 October 1988
The Institution of Mechanical Engineers
Birdcage Walk
London

Sponsored by
Automobile Division of the Institution of Mechanical Engineers

Co-sponsored by
Institution of Electrical Engineers

TECHNISCHE HOCHSCHULE DARMSTADT
FACHGEBIET FAHRZEUGTECHNIK
PROF. DR.-ING. B. BREUER
PETERSENSTRASSE 30 · 6100 DARMSTADT
TELEFON 0 61 51 - 16 37 96

Inv.-Nr. F 277

Contents

| | | |
|---------|---|-----|
| C420/88 | Theoretical comparisons of various active suspension systems in terms of performance and power requirements <i>D A Crolla and A M A Aboul Nour</i> | 1 |
| C421/88 | Application of the LQG approach to design of an automotive suspension for three-dimensional vehicle models <i>P Barak and D Hrovat</i> | 11 |
| C422/88 | A low-power active suspension and its bounce and cross model performance <i>I Čech</i> | 27 |
| C423/88 | Invariant properties of automotive suspensions <i>J K Hedrick and T Butsuen</i> | 35 |
| C424/88 | A practical control concept for passenger car active suspensions with preview <i>W Foag</i> | 43 |
| C425/88 | Passive automobile suspension parameter adaptation <i>G Mastinu</i> | 51 |
| C426/88 | An active suspension system for an ambulance stretcher <i>I A Craighead</i> | 59 |
| C427/88 | A novel valve for semi-active vehicle suspension systems <i>G A Parker and K S Lau</i> | 69 |
| C428/88 | Linear variable inductance position transducer for suspension systems <i>J H Moore</i> | 75 |
| C429/88 | Semi-active damping <i>M Lizell</i> | 83 |
| C430/88 | A practical approach towards advanced semi-active suspension systems <i>H Decker, W Schramm and R Kallenbach</i> | 93 |
| C431/88 | Frequency dependent variable suspension damping — theoretical background and practical success <i>D Hennecke and F J Zieglmeier</i> | 101 |
| C432/88 | Variable damping — philosophy and experiences of a preferred system <i>T Meller and F Frühauf</i> | 113 |
| C433/88 | An experimental study of optimal vibration adjustment using adaptive control methods <i>S Doi, E Yasuda and Y Hayashi</i> | 119 |
| C434/88 | Heavy vehicle independent suspension <i>E P Timoney, S S Timoney and S G Timoney</i> | 125 |
| C435/88 | Suspensions for agricultural vehicles <i>R M Stayner</i> | 133 |
| C436/88 | A practical intelligent damping system <i>P J Hine and P T Pearce</i> | 141 |
| C437/88 | Controlled rear steering for cars — a review <i>R S Sharp and D A Crolla</i> | 149 |
| C438/88 | A velocity dependent steering gear ratio for four-wheel steered vehicles <i>K-H Senger</i> | 165 |
| C439/88 | Effect of four-wheel steering system on vehicle yawing motion <i>M Nakamoto</i> | 171 |

| | | |
|---------|--|-----|
| C440/88 | Theoretical investigations on the behaviour of a car with additional four-wheel steering at μ -split conditions <i>P Lugner, P Mittermayr and K-O Endlicher</i> | 181 |
| C441/88 | Handling and stability improvement achieved with four-wheel steering <i>H Mouri, J Kuroki, F Sugasawa and N Irie</i> | 191 |
| C442/88 | The effect of hardware limitations on an on/off semi-active suspension <i>L R Miller</i> | 199 |
