## PART ONE SIGNALS, SYSTEMS, AND TRANSFORMS

|              |                                                     |     |
|--------------|-----------------------------------------------------|-----|
| Chapter 1    | Introduction                                        | 3   |
| 1-1          | Discrete Signals and Systems                        | 4   |
| 1-2          | Analog Signals and Systems                          | 12  |
| 1-3          | Digital Simulation of Analog Systems                | 25  |
| Chapter 2    | Discrete Systems                                    | 30  |
| 2-1          | $z$ Transforms                                      | 31  |
| 2-2          | Recursion Equations                                 | 40  |
| 2-3          | Finite-Order Systems                                | 43  |
| Chapter 3    | Fourier Analysis                                    | 56  |
| 3-1          | Fourier Transforms                                  | 57  |
| 3-2          | Line Spectra and Fourier Series                     | 66  |
| 3-3          | From Fourier Integrals to Discrete Fourier Series   | 74  |
| 3-4          | Discrete Fourier Series and Fast Fourier Transforms | 79  |
| Appendix 3-A | The Mean-Value Theorems                             | 92  |
| Appendix 3-B | Asymptotic Properties of Fourier Transforms         | 94  |
| Appendix 3-C | Singularity Functions                               | 96  |
| Chapter 4    | Continuous Systems                                  | 101 |
| 4-1          | Moment Expansion and Spectrum Analyzers             | 102 |
| 4-2          | Filters                                             | 116 |
| 4-3          | Finite-Order Systems                                | 124 |
| Appendix 4-A | Maximum Response of Linear Systems                  | 134 |

*Chapter 5* Digital Processing of Analog Signals 139

- 5-1 Sampling and Interpolation 140
- 5-2 Mean-Square Approximations 146
- 5-3 Digital Simulation of Analog Systems 154
- 5-4 Nonrecursive Filters 160
- 5-5 Filters 165
- 5-6 Recursive Frequency-Domain Filtering 173

## PART TWO SELECTED TOPICS

*Chapter 6* Bandlimited Functions 183

- 6-1 Properties of Bandlimited Functions 184
- 6-2 Generalized Sampling 191
- 6-3 Bounds and Extreme Values of Bandlimited Functions 196
- 6-4 The Prolate Spheroidal Functions 205
- Appendix 6-A* Extrema of Integrals of Trigonometric Polynomials and Bandlimited Functions 216

*Chapter 7* Factorization, Windows, Hilbert Transforms 221

- 7-1 Analytic and Asymptotic Properties of Laplace Transforms 222
- 7-2 The Factorization Problem 227
- 7-3 Windows and Extrapolation 234
- 7-4 Hilbert Transforms 251
- Appendix 7-A* The Paley-Wiener Theorem 258
- Appendix 7-B* Jordan's Lemma 261

*Chapter 8* Frequency Modulation, Uncertainty, Ambiguity 262

- 8-1 Frequency Modulation and the Method of Stationary Phase 263
- 8-2 Uncertainty Principle and Sophisticated Signals 273
- 8-3 Two-dimensional Transforms and Hankel Transforms 278
- 8-4 The Ambiguity Function 284

## PART THREE DATA SMOOTHING AND SPECTRAL ESTIMATION

*Chapter 9* Stochastic Processes 299

- 9-1 Correlations and Spectra 300
- 9-2 Linear Systems with Stochastic Inputs 305
- 9-3 Spectral Analysis 312
- 9-4 Discrete Processes 319

|                       |                                                                   |         |
|-----------------------|-------------------------------------------------------------------|---------|
| <i>Chapter 10</i>     | <i>Data Smoothing</i>                                             | 324     |
| 10-1                  | Known Signals in Noise                                            | 325     |
| 10-2                  | Unknown Signals in Noise                                          | 329     |
| 10-3                  | Random Signals and Wiener Filters                                 | 336     |
| 10-4                  | Discrete Processes                                                | 344     |
| <br><i>Chapter 11</i> | <br><i>Ergodicity, Correlation Estimators, Fourier Transforms</i> | <br>351 |
| 11-1                  | Ergodicity                                                        | 352     |
| 11-2                  | Correlation Estimates                                             | 359     |
| 11-3                  | Fourier Transforms of Random Signals                              | 363     |
|                       | <i>Appendix 11-A</i> Normal Processes and Cumulants               | 374     |
| <br><i>Chapter 12</i> | <br><i>Spectral Estimation</i>                                    | <br>378 |
| 12-1                  | Sample Spectrum                                                   | 379     |
| 12-2                  | Smoothed Spectrum                                                 | 380     |
| 12-3                  | Theory                                                            | 386     |
| <br><i>Problems</i>   |                                                                   | <br>393 |
| <i>Solutions</i>      |                                                                   | 406     |
| <i>Index</i>          |                                                                   | 421     |
