Foreword	vii
<hr/>	
1. Introduction	1
What's New?	1
<i>Time Span</i> 1	
<i>Annual Data</i> 2	
<i>Improved Estimating Procedures</i> 2	
<i>Supplementary Data</i> 4	
<i>Separate Estimates for Nonresidential Business</i> 4	
<i>Estimates for Potential Output</i> 5	
The Need to Keep Estimates Current	6
Organization of the Book	6
Current Status of Data Utilized	7
2. Output and Income	9
Estimates of National Income	9
Course of National Income	12
Growth Rates for Selected Periods	15
3. Nonprofit Activities, Dwellings, and International Assets	17
National Income by Sector	17
<i>General Government, Households, Institutions, and Foreign Governments</i> 17	
<i>Services of Dwellings Industry</i> 18	
<i>International Assets</i> 19	
<i>Nonresidential Business</i> 21	
Contributions of the Sectors to Growth	21
Labor Input in the General Government, Households, and Institutions Sector	24
<i>Employment</i> 24	
<i>Hours</i> 24	
<i>Other Aspects of Labor Composition</i> 26	
<i>Contributions to Growth</i> 26	
Services of Dwellings Sector	28
4. Labor Input in Nonresidential Business	30
Employment	31
Average and Total Hours of Work	31
The Age-Sex Composition of Hours Worked	33
The Pattern of Changes in Hours	35
Effect of Changes in Hours within Labor Force Groups	38
<i>Some Assumptions and Their Implications</i> 39	
<i>Calculation of the Index</i> 41	
<i>Changes in the Index</i> 41	
Changes in Average Hours Resulting from Changing Employment Composition	41
<i>Procedures</i> 43	
<i>Changes in the Index</i> 43	
Education of Workers	43
<i>Construction of the Education Index</i> 44	
<i>Movement of the Education Index</i> 46	
Labor Input	47
<i>Changes in Labor Input</i> 47	
<i>Unmeasured Characteristics</i> 48	
5. Capital, Land, and Total Input in Nonresidential Business	51
The Weighting Structure	51
Capital Input	52
<i>Measurement of Inventory Input</i> 53	
<i>Derivation of Structures and Equipment Series</i> 53	
<i>Measurement of Capital Input</i> 54	
<i>Improvements in Design Not Measured</i> 55	
<i>Capital Utilization Not Measured</i> 56	
<i>Movement of Capital Input</i> 56	
Land Input	57
Total Factor Input	58
6. Output per Unit of Input in Nonresidential Business	61
Reallocation of Resources from Farming and Nonfarm Self-Employment	62
Irregular Fluctuations	65
<i>Irregular Fluctuations in Farm Output</i> 65	
<i>Work Stoppages Due to Labor Disputes</i> 65	
<i>Fluctuations in Intensity of Demand</i> 66	
<i>Length and Composition of the Year</i> 67	
An Intermediate Productivity Series	68
Economies of Scale	71
<i>Size of Economies of Scale</i> 73	
<i>An Index of Gains from Economies of Scale</i> 75	
Miscellaneous Determinants	76
<i>Composition of Miscellaneous Determinants</i> 77	
<i>Effects on Growth Rate</i> 77	
<i>Possible Changes</i> 78	

Advances in Knowledge	79	Growth of Total Output over Long Periods	127
<i>Contribution in Postwar Years</i>	81	<i>Growth with Economies of Scale as a Separate Source</i>	129
<i>Earlier Periods</i>	81	<i>Estimates with Economies of Scale Allocated</i>	130
<i>Advances in Knowledge and the "Lag"</i>	82	<i>Relationships between Capital and Advances in Knowledge</i>	133
7. Potential National Income	84	Growth of Output per Person Employed over Long Periods	135
Definition and Approaches to Measurement	84	Growth of Total Output in Shorter Periods	138
<i>The Trend versus the Direct Approach</i>	84	<i>Potential National Income</i>	138
<i>CEA Use of Potential GNP Estimates</i>	85	<i>Actual National Income</i>	142
<i>My Definition of Potential National Income</i>	86	Growth of Output per Person Employed in Shorter Periods	143
Method of Estimation	86	<i>Comparison of 1964-69 and 1953-64 Periods</i>	143
<i>Adjustment for Output per Unit of Input</i>	86	<i>Comparison of 1948-53 and 1953-64 Periods</i>	145
<i>Adjustment of Factor Input</i>	88	<i>Prewar Estimates</i>	145
<i>The 3.5 Percent and 4.5 Percent Unemployment Variants</i>	91	The Roles of Demand and War	146
Comparison of Potential and Actual National Income	91	Some Concluding Observations	149
Potential Employment and National Income per Person Employed	94		
Use of a Constant 4 Percent Unemployment Rate	94		
<i>Tightness of the Labor Market</i>	95		
<i>Price Movements</i>	96		
Comparison with CEA Estimates	97		
<i>Limitations and Differences among Estimates</i>	99		
<i>Policy Implications of Differences</i>	100		
<i>The Estimates for 1964 and 1965</i>	100		
<i>Importance of Potential Output Series</i>	101		
8. Sources of Growth of Nonresidential Business Output	102		
Meaning and Derivation of Estimates	102		
<i>Total Actual National Income</i>	103		
<i>Total Potential National Income</i>	104		
<i>Output per Person Employed</i>	104		
Classification of Growth Sources	104		
<i>Labor</i>	105		
<i>Capital and Land</i>	107		
<i>Components of Output per Unit of Input</i>	107		
<i>Two Important Characteristics</i>	109		
Sources of Growth over Long Periods	110		
<i>Total National Income</i>	110		
<i>National Income per Person Employed</i>	114		
Sources of Growth in Shorter Periods	116		
<i>Total National Income: Postwar Years</i>	117		
<i>Output per Worker: Postwar Years</i>	121		
<i>Prewar Short Periods</i>	123		
9. Sources of Growth in the Economy as a Whole	124		
Derivation and Classification of Contributions by Source	124		

Appendixes

A. Estimates of National Income, Net National Product, and Gross National Product	153
The Series and Their Derivation	153
<i>Gross National Product</i>	154
<i>Net National Product at Market Prices</i>	156
<i>National Income at Factor Cost in Current Prices</i>	157
<i>Adjustment for Alaska and Hawaii</i>	157
<i>National Income at Constant Prices</i>	158
Comparison of Series	161
B. National Income Estimates for Additional Years	163
C. Estimates of Employment	164
Total Employment	164
<i>Procedure</i>	166
<i>Computation of Final Series</i>	171
Employment by Type	171
<i>Farm Employment</i>	171
<i>Nonfarm Self-Employed and Unpaid Family Workers</i>	172
<i>Employment in General Government, Households, Institutions, and the "Rest of the World"</i>	174
<i>Wage and Salary Workers in Nonfarm Business</i>	174
Additional Comments	174

<i>Adjustment for Alaska and Hawaii</i> 174		PART THREE: <i>Calculation of the Index</i> 195	
<i>Unpaid Absences</i> 176			
D. Estimates of National Income by Sector 177		G. Employment and Hours in the Business Sector Classified by Sex and Full-Time or Part-Time Status of Workers 197	
Derivation of Tables 3-1 and 3-2 177		Control Totals and General Description of Postwar Estimates 197	
Column 1, Total National Income 177		CPS-Based Estimates for 1966-69 201	
Column 2, Work Relief 177		CPS-Based Estimates for 1954-66 203	
Column 3, National Income, Excluding Work Relief 177		General Procedure in 1954-66 203	
Column 4, General Government (Excluding Work Relief), Households, Institutions, and the "Rest of the World" 177		Exceptions to General Procedure 205	
Column 5, Services of Dwellings 177		CPS-Based Estimates for 1947-53 207	
Column 6, International Assets 180		Estimates for Agricultural Workers 208	
Column 7, Nonresidential Business 180		Estimates for Nonagricultural Workers 208	
Employment and National Income per Person Employed in Nonresidential Business 180		Postwar Proportions of Part-Time Workers 210	
E. Total and Average Hours Worked 181		Estimates for 1929, 1940, and 1941 212	
PART ONE: <i>The Business Sector</i> 181		<i>Farm Employment by Sex and Full-Time Status, 1940 and 1941 (Table G-3)</i> 212	
Total Weekly Hours 181		<i>Farm Hours, Total and by Sex and Full-Time Status, 1929, 1940, and 1941 (Tables E-1 and G-3)</i> 212	
<i>Farm and Self-Employed Workers</i> 181		<i>Nonfarm Business Employment, by Class of Worker, Sex, and Full-Time Status, 1940 and 1941 (Tables G-1 and G-2)</i> 213	
<i>Wage and Salary Workers in Nonfarm Business</i> 182		<i>Business Employment by Type, Sex, and Full-Time Status, 1929 (Tables G-1, G-2, and G-3)</i> 214	
Average Hours per Person Employed 184		<i>Total and Average Hours in Nonfarm Business, by Sex, Class of Worker, and Full-Time Status, 1929, 1940, and 1941 (Tables G-1 and G-2)</i> 215	
Indexes 184		<i>Total Hours, Business Sector and Whole Economy, 1929, 1940, and 1941 (Tables E-1 and E-2)</i> 216	
PART TWO: <i>The Whole Economy</i> 184		<i>Age-Sex Composition of Total Hours Worked in Nonresidential Business, 1929, 1940, and 1941 (Table F-5)</i> 216	
Hours Worked outside the Nonresidential Business Sector 184		H. Efficiency Indexes for Changes in Hours 218	
<i>Private Household Workers</i> 184			
<i>Employees of Nonprofit Institutions</i> 184		I. The Labor Input Index for Education 219	
<i>Civilian Employees of General Government and the "Rest of the World"</i> 184		PART ONE: <i>The Derivation of Weights</i> 219	
<i>Military Employment</i> 185		Earnings in Business Standardized by Sex, Age, Color, Farm-Nonfarm Attachment, and Region 219	
Hours Worked in the Whole Economy 185		Step One: <i>Earnings by Education Level for Thirty-Two Groups of Men</i> 220	
F. The Composition of Man-Hours Worked by Age and Sex 187		Step Two: <i>Elimination of Men in Nonbusiness Occupations</i> 220	
PART ONE: <i>The Derivation of Hourly Earnings Weights</i> 187		Step Three: <i>Weighted Average of the Thirty-Two Groups</i> 221	
Annual Full-Time Earnings 187		Step Four: <i>Adjustment to a Full-Time Equivalent Basis</i> 223	
Average Hourly Earnings 188			
Stability of Differentials 190			
PART TWO: <i>The Distributions of Hours Worked</i> 191			
Estimates for 1947-66 192			
<i>Nonagricultural Business, 1947-66</i> 192			
<i>Agriculture, 1947-66</i> 194			
<i>Adjustment of 1947-52 Data</i> 194			
Estimates for 1966-69 195			
Estimates Prior to 1947 195			

<i>Step Five: Subdivision of College Graduates</i>	224	<i>Comments on the Allocations</i>	268
<i>Step Six: Subdivision of the Group with 0-7 Years of Education</i>	225	<i>The Treatment of Taxes in National Income at Factor Cost</i>	268
<i>Effects of Limitations of the Data</i>	226	<i>Other Items Affecting National Income</i>	269
<i>Comment on the Farm-Nonfarm Breakdown</i>	227	<i>The Allocation of Proprietors' Income</i>	269
<i>Elimination of Part of the Gain from Increased Mobility</i>	228	<i>The Allocation of Property Earnings by Type of Asset</i>	271
<i>Quality of Education</i>	228		
Adjustments for Ability and Socioeconomic Status	228	K. Relationship of Business Capital Input to Government Capital and Valuation of Used Capital Goods	273
<i>R₁ and R₂ Ratios</i>	229		
<i>The Weisbrod-Karpoff AT&T Study</i>	230	<i>Distinction between Business and Government Capital</i>	273
<i>The Wolfle-Smith Survey</i>	232	<i>Valuation of Used Assets Sold by Government to Private Business</i>	275
<i>Selection of R₁ Ratios above the High School Level</i>	236	<i>Addendum</i>	276
<i>Analysis of Connecticut Men by Rogers</i>	236		
<i>Cutright's Data for Earnings of Veterans</i>	238	L. Alternative Computations of Total Factor Input in Nonresidential Business	278
<i>Aptitude and Education at Lower Education Levels</i>	239		
<i>Selection of R₂ Ratios below the High School Graduate Level</i>	239		
The Final Education Weights	240	M. Comparison of Output per Man-Hour Series	281
<i>The Pattern of Differentials</i>	241		
<i>Education Weights for Females</i>	242	N. Nonresidential Business: Gains from the Reallocation of Resources	284
<i>Comparison with Why Growth Rates Differ</i>	242		
<i>Use of Constant Weights</i>	242	<i>The Shift of Resources from Farming</i>	284
PART TWO: Education Distributions and Indexes	242	<i>The Farm Shares of Output and Labor</i>	285
Distributions of Full-Time Equivalent Business Employment, by Years of Education and by Sex, Postwar Survey Dates	243	<i>Measurement of Productivity Gain from Resource Reallocation</i>	286
<i>Data Available from Surveys, 1959-70</i>	243	<i>Alternative Series</i>	287
<i>Estimating Procedures</i>	244	<i>The Reduction in the Importance of Nonfarm Self-Employment</i>	289
Postwar Quality Indexes for Each Sex, Based on Years of School Completed	250		
<i>Relationships at Survey Dates</i>	250	O. Irregular Fluctuations	291
<i>Annual Estimates</i>	251		
Prewar Quality Indexes for Each Sex, Based on Years of School Completed	253	PART ONE: Irregular Fluctuations in Farm Output	291
<i>Estimates for 1940 and 1941</i>	253		
<i>Estimates for 1929</i>	255	PART TWO: Work Stoppages Due to Labor Disputes	291
Allowance for Changes in School Term and in Absenteeism	257	<i>Firms Involved in Work Stoppages</i>	292
Computation of Final Indexes	259	<i>Firms Not Involved in Work Stoppages</i>	293
		<i>The Coal and Steel Strikes, 1949</i>	293
J. Weights for Inputs in Nonresidential Business	260	<i>The Chrysler and Coal Strikes, 1950</i>	293
		<i>The Steel Strike, 1952</i>	293
Summary Description	260	<i>The Steel Strike, 1959</i>	293
<i>Allocations of Annual Earnings</i>	260	PART THREE: Intensity with Which Employed Resources Are Used Resulting from Variations in the Intensity of Demand	294
<i>Derivation of Weights</i>	261		
The Division of National Income by Groups	263	<i>General Approaches</i>	294
Asset Values	264		
<i>Farm Assets</i>	265		
<i>Corporate and Noncorporate Nonfarm Assets</i>	266		
Imputed Labor Earnings	267
