CONTENTS

	<i>Preface</i>	ix
	<i>List of symbols and terms</i>	xi
1	Some recent trends in macroeconomic theory and practice	1
	The basic issue	1
	Neoclassical principles	4
	Stabilization intervention and market failure	5
	Some recent trends in macroeconomic policy	7
	Some recent theoretical trends	9
	The monetarist controversy	12
	The existence of equilibria	14
	Outline of study	16
2	A critique of Keynesian macroeconomics	20
	General impressions	20
	Before the 'revolution'	22
	The IS-LM model	29
	Aspects of the <i>General Theory</i>	31
	Concluding remarks	50
3	The basic neoclassical model	54
	I The closed economy	55
	Money and goods	56
	Money, goods and bonds	64
	'Crowding out' and government finance	66
	Money, goods and employment	68
	The influence of trade unions	72
	The Keynesian model	75
	Disaggregation	77
	II The open economy	79
	Money, goods, employment and foreign exchange (<i>MGEF</i>)	79
	Money, goods, employment, foreign exchange and bonds (<i>MGEFB</i>)	83
	The <i>MGEFB</i> model simplified	84
4	Extensions of the neoclassical model	92

	Introduction	92
	Monetary policy	93
	Overseas economic activity	96
	A statistical illustration for the UK	97
	General policy principles	104
	The energy sector and the macroeconomy	105
5	Long term policy analysis	111
	The effects of a tariff	111
	Import controls	114
	Exchange controls	117
	Devaluation	119
	Exchange rate intervention	122
	Fiscal policy	123
	Prices and incomes policies	130
	Summary and concluding remarks	133
6	The rational expectations hypothesis	136
	Historical perspective	137
	The rational expectations 'revolution'	141
	A simple commodity model	143
	The speculation schedule	146
	The determinants of risk	148
	<i>Unstable roots and the boundary condition</i>	148
	Further considerations	152
	Rational expectations and efficient markets	153
	Stabilization policies	154
	Normative applications of REH	156
	Appropriate model	158
	Rational expectations and market failure	158
	An alternative formulation: the method of undetermined coefficients	161
7	Macroeconomic policy and rational expectations	164
	I The theory of macroeconomic policy	164
	Principal policy issues	164
	Causes of disequilibrium	166
	Macroeconomic policy and the principle of market failure	168
	The micro-foundations of macroeconomic policy	170
	II The closed economy	171
	The policy frustration hypothesis	172
	The money and goods model	176
	Policy analysis	180
	Discretionary policy and risk	182
	Augmenting the Phillips Curve under REH	182

Fiscal policy	184
The role of built-in stabilizers	185
Towards a general speculative model	186
III The open economy	190
Exchange rate dynamics	192
Foreign exchange intervention	197
Distributed lags and the foreign exchange market	197
General equilibrium; internal and external balance	199
8 Theory and practice	203
The central thesis	203
The role of stabilization policy	206
Appropriate macroeconomic policies	209
Appendix: Mathematical notes	212
<i>Notes</i>	218
<i>Bibliography</i>	224
<i>Index</i>	229
