# SIMPLIFIED ENGINEERING FOR ARCHITECTS AND BUILDERS

---

Ninth Edition

**JAMES AMBROSE**

Formerly Professor of Architecture  
University of Southern California  
Los Angeles, California

based on the work of

**THE LATE HARRY PARKER**

Formerly Professor of Architectural Construction  
University of Pennsylvania

**JOHN WILEY & SONS, INC.**

New York • Chichester • Weinheim • Brisbane • Singapore • Toronto

<b>Preface to the Ninth Edition</b>	<b>xiii</b>
<b>Preface to the First Edition</b>	<b>xvii</b>
<b>Introduction</b>	<b>1</b>

## **PART I PRINCIPLES OF STRUCTURAL MECHANICS**

<b>1 Investigation of Forces</b>	<b>11</b>
1.1 Properties of Forces / 11	
1.2 Static Equilibrium / 15	
1.3 Resultant of Forces / 16	
1.4 Resolution and Composition of Forces / 18	
1.5 Force Polygon / 20	
1.6 Graphical Analysis of Planar Trusses / 24	
1.7 Algebraic Analysis of Planar Trusses / 31	
<b>2 Force Actions</b>	<b>39</b>
2.1 Forces and Stresses / 39	
2.2 Bending / 43	
2.3 Deformation / 43	
2.4 Deformation and Stress: Relations and Issues / 44	
2.5 Design Use of Direct Stress / 48	

2.6	Aspects of Dynamic Behavior / 51	
2.7	Service Versus Ultimate Conditions / 59	
<b>3</b>	<b>Investigation of Beams and Frames</b>	<b>60</b>
3.1	Moments / 60	
3.2	Beam Loads and Reaction Forces / 65	
3.3	Shear in Beams / 69	
3.4	Bending Moments in Beams / 75	
3.5	Sense of Bending in Beams / 82	
3.6	Tabulated Values for Beam Behavior / 89	
3.7	Development of Bending Resistance / 94	
3.8	Shear Stress in Beams / 97	
3.9	Continuous and Restrained Beams / 102	
3.10	Structures with Internal Pins / 115	
3.11	Compression Members / 122	
3.12	Rigid Frames / 136	
3.13	Approximate Investigation of Indeterminate Structures / 143	
<b>4</b>	<b>Properties of Sections</b>	<b>149</b>
4.1	Centroids / 149	
4.2	Moment of Inertia / 152	
4.3	Transferring Moments of Inertia / 157	
4.4	Miscellaneous Properties / 160	
4.5	Tables of Properties of Sections / 166	
<b>PART II WOOD CONSTRUCTION</b>		
<b>5</b>	<b>Wood Spanning Elements</b>	<b>179</b>
5.1	Structural Lumber / 180	
5.2	Design for Bending / 186	
5.3	Beam Shear / 190	
5.4	Bearing / 191	
5.5	Deflection / 193	
5.6	Joists and Rafters / 197	
5.7	Decking for Roofs and Floors / 203	
5.8	Glued-Laminated Products / 208	
5.9	Wood Fiber Products / 208	
5.10	Miscellaneous Wood Structural Products / 209	

<b>6</b>	<b>Wood Columns</b>	<b>212</b>
6.1	Solid-Sawn Columns / 212	
6.2	Design of Wood Columns / 217	
6.3	Wood Stud Construction / 220	
6.4	Columns with Bending / 221	
6.5	Miscellaneous Wood Compression Members / 225	
<b>7</b>	<b>Connections for Wood Structures</b>	<b>229</b>
7.1	Bolted Joints / 229	
7.2	Nailed Joints / 240	
7.3	Miscellaneous Fastening Devices / 243	
<b>PART III STEEL CONSTRUCTION</b>		
<b>8</b>	<b>Steel Structural Products</b>	<b>249</b>
8.1	Design Methods for Steel Structures / 249	
8.2	Materials for Steel Products / 250	
8.3	Types of Steel Structural Products / 254	
<b>9</b>	<b>Steel Beams and Framing Elements</b>	<b>259</b>
9.1	Factors in Beam Design / 259	
9.2	Design for Bending / 261	
9.3	Shear in Steel Beams / 267	
9.4	Deflection of Beams / 272	
9.5	Buckling of Beams / 280	
9.6	Safe Load Tables / 290	
9.7	Concentrated Load Effects on Beams / 296	
9.8	Alternative Decks with Steel Framing / 297	
9.9	Steel Trusses / 300	
9.10	Manufactured Trusses for Flat Spans / 302	
<b>10</b>	<b>Steel Columns and Frames</b>	<b>310</b>
10.1	Column Shapes / 310	
10.2	Slenderness and End Conditions / 312	
10.3	Safe Axial Loads for Columns / 314	
10.4	Design of Steel Columns / 317	
10.5	Columns with Bending / 325	
10.6	Column Framing and Connections / 330	
10.7	Column and Beam Frames / 332	

<b>11</b>	<b>Connections for Steel Structures</b>	<b>340</b>
11.1	Bolted Connections / 340	
11.2	Considerations for Bolted Connections / 347	
11.3	Design of a Bolted Connection / 352	
11.4	Bolted Framing Connections / 359	
11.5	Bolted Truss Connections / 364	
11.6	Welded Connections / 367	
11.7	Design of Welded Connections / 371	
<b>12</b>	<b>Light-Gage Formed Steel Structures</b>	<b>376</b>
12.1	Light-Gage Steel Products / 376	
12.2	Light-Gage Steel Decks / 377	
12.3	Light-Gage Steel Systems / 382	
<b>PART IV CONCRETE AND MASONRY CONSTRUCTION</b>		
<b>13</b>	<b>Reinforced Concrete Structures</b>	<b>385</b>
13.1	General Considerations / 385	
13.2	Beams: Working Stress Method / 394	
13.3	Special Beams / 407	
13.4	Spanning Slabs / 421	
13.5	Shear in Beams / 426	
13.6	Development Length for Reinforcement / 441	
13.7	Deflection Control / 449	
<b>14</b>	<b>Flat-Spanning Concrete Systems</b>	<b>452</b>
14.1	Slab and Beam Systems / 453	
14.2	General Considerations for Beams / 459	
14.3	One-Way Joist Construction / 464	
14.4	Waffle Construction / 466	
14.5	Two-Way Spanning Solid-Slab Construction / 470	
14.6	Special Flat-Spanning Systems / 472	
<b>15</b>	<b>Concrete Columns and Frames</b>	<b>476</b>
15.1	Effects of Compression Force / 476	
15.2	General Considerations for Concrete Columns / 480	
15.3	Design Methods and Aids for Concrete Columns / 487	
15.4	Special Problems with Concrete Columns / 495	
15.5	Column and Beam Frames / 500	

<b>16</b>	<b>Footings</b>	<b>512</b>
16.1	Shallow Bearing Foundations / 512	
16.2	Wall Footings / 513	
16.3	Column Footings / 521	
16.4	Pedestals / 530	
<b>17</b>	<b>General Considerations for Masonry Structures</b>	<b>537</b>
17.1	Masonry Units / 537	
17.2	Mortar / 538	
17.3	Basic Construction Consideration / 539	
17.4	Structural Masonry / 540	
17.5	Lintels / 545	
<b>18</b>	<b>Design of Structural Masonry</b>	<b>548</b>
18.1	Unreinforced Structural Masonry / 548	
18.2	Reinforced Masonry: General Considerations / 551	
18.3	Masonry Columns / 554	
<b>PART V STRENGTH DESIGN</b>		
<b>19</b>	<b>Strength Design Methods</b>	<b>559</b>
19.1	Strength Versus Stress Methods / 559	
19.2	Factored Loads / 561	
19.3	Resistance Factors / 562	
19.4	Development of Design Methods / 564	
<b>20</b>	<b>Strength Design of Reinforced Concrete Structures</b>	<b>564</b>
20.1	General Application of Strength Methods / 564	
20.2	Investigation and Design for Flexure: Strength Method / 565	
20.3	Columns / 572	
<b>21</b>	<b>Strength Design of Steel Structures</b>	<b>573</b>
21.1	Inelastic Versus Elastic Behavior / 573	
21.2	Plastic Hinging in Continuous and Restrained Beams / 580	

**PART VI STRUCTURAL SYSTEMS FOR BUILDINGS**

<b>22</b>	<b>General Considerations for Building Structures</b>	<b>585</b>
22.1	Introduction / 585	
22.2	Dead Loads / 586	
22.3	Building Code Requirements for Structures / 586	
22.4	Live Loads / 593	
22.5	Lateral Loads / 595	
<b>23</b>	<b>Building One</b>	<b>600</b>
23.1	General Considerations / 600	
23.2	Design of the Wood Structure for Gravity Loads / 601	
23.3	Design for Lateral Loads / 606	
23.4	Alternative Steel and Masonry Structure / 615	
23.5	Alternative Truss Roof / 621	
23.6	Foundations / 627	
<b>24</b>	<b>Building Two</b>	<b>629</b>
24.1	Design for Gravity Loads / 631	
24.2	Design for Lateral Loads / 634	
24.3	Alternative Steel and Masonry Structure / 637	
<b>25</b>	<b>Building Three</b>	<b>640</b>
25.1	General Considerations / 640	
25.2	Structural Alternatives / 644	
25.3	Design of the Steel Structure / 646	
25.4	Alternative Floor Construction with Trusses / 655	
25.5	Design of the Trussed Bent for Wind / 660	
25.6	Considerations for a Steel Rigid Frame / 666	
25.7	Considerations for a Masonry Wall Structure / 669	
25.8	The Concrete Structure / 674	
25.9	Design of the Foundations / 695
