Contents	vii

1. Scope of the Text

1.1 Introduction	1
1.2 Topic of the Text	2
1.3 The Approach	4
1.4 Review of the Text	5

2. Material Coordination

2.1 Production Control	7
2.2 Reduction of Control Complexity	9
2.2.1 Production Units	10
2.2.2 Levels of Control	13
2.3 Introduction of Material Coordination	17
2.4 Some Well-Known Examples of Material Coordination	18
2.4.1 The Reorder Point System	19
2.4.2 The Base Stock System	22
2.4.3 Material Requirements Planning	23
2.5 The Role of Stocks	26
2.6 The Single-Phase Multi-Product Planning Problem	29

3. Identical Products; Purely Stochastic Demand

3.1 Introduction	33
3.2 General Formulation of the Model	35
3.3 Overall Optimal Strategy	38
3.4 Aggregation; Capacity-Oriented Strategies	43
3.5 Decomposition; Product-Oriented Strategies	47
3.6 Choice of a Specific Model	49
3.7 Overall Optimal Strategy; Numerical Results	50
3.8 Product-Oriented Strategies and Capacity-Oriented Strategies; Numerical Results	54

3.9	Sensitivity Analysis	62
3.9.1	Sensitivity for the Cost Rate $p(i)$	63
3.9.2	Sensitivity for the Process that Generates Production Opportunities	63
3.9.3	Sensitivity for the Distribution of the Demand-Size	66
3.10	Discussion of Chapter 3 and Preview of the next Chapters	68

4. Identical Products; Partly Known Demand

4.1	Introduction of the Model	71
4.2	Purely Stochastic Approach	74
4.2.1	Capacity-Oriented Strategies	74
4.2.2	Product-Oriented Strategies	76
4.3	Introduction of Rolling Schedules	77
4.4	The Stochastic Dynamic Programming Approach	81
4.4.1	Product-Oriented Strategies	81
4.4.2	Capacity-Oriented Strategies	86
4.5	The Deterministic Dynamic Programming Approach	87
4.6	Numerical Results and Conclusions	89
4.6.1	Purely Stochastic Approach	89
4.6.2	Stochastic Dynamic Programming Approach	98
4.6.3	Deterministic Dynamic Programming Approach	100
4.6.4	Overview of the Numerical Results	104

5. Non-Identical Products

5.1	Introduction	109
5.2	Description of the Model	111
5.3	Fast-Mover/Slow-Mover Approach	113
5.4	Slow Movers	116
5.5	Fast Movers	118
5.5.1	The Cost Rate as a Function of the Aggregate Inventory Position	119
5.5.2	The Demand Process for Fast Movers	119
5.5.3	The Disturbance of the Capacity Availability for Fast Movers due to Slow Movers	120
5.5.4	Theoretical Analysis	121
5.6	An Example	133
5.7	Applicability of the Fast-Mover/Slow-Mover Approach	136

5.8 Optimality of the Fast-Mover/Slow-Mover Approach	138
--	-----

6. A Simple Example

6.1 Introduction	141
6.2 The Situation	142
6.2.1 Demand	142
6.2.2 Production Process	144
6.2.3 Supply of Raw Materials	145
6.3 Production Control	146
6.4 Material Coordination	152
6.5 Conclusions	156
References	159
