Contents

<i>Forewords</i>	page ix	Part II Flood risk management: probabilistic approach	
<i>Dr. Gordon McBean and Dr. Donald H. Burn</i>		4 Risk management: probabilistic approach	71
<i>Preface</i>	xi	4.1 Mathematical definition of risk	71
<i>Acknowledgments</i>	xii	4.2 Classification of risk	74
<i>Definitions</i>	xiii	4.3 Risk criteria	75
<i>List of acronyms and abbreviations</i>	xvi	4.4 Probabilistic risk modeling	76
Introduction	1	4.5 Probabilistic tools for flood risk management	79
Part I Setting the stage		4.6 Conclusions	114
1 Flood risk management	7	4.7 Exercises	114
1.1 The global flood problem	7	Part III Flood risk management: fuzzy set approach	
1.2 Problem context	10	5 Risk management: fuzzy set approach	119
1.3 Flood risk	13	5.1 Paradigm change	119
1.4 How do we manage flood risk?	14	5.2 Introduction to fuzzy sets	120
1.5 Systems view of flood risk management	14	5.3 Fuzzy risk definition	129
1.6 Conclusions	16	5.4 Fuzzy tools for flood risk management under climate change	134
1.7 Exercises	16	5.5 Conclusions	163
2 Climate change and risk of flooding	17	5.6 Exercises	164
2.1 Floods and their physical characteristics	17	Part IV Future perspectives	
2.2 Climate change and variation impacts	20	6 Future perspectives	169
2.3 Approaches for dealing with climate change	27	6.1 Understanding climate change and flood risk management	169
2.4 Conclusions	29	6.2 Adaptive flood risk management under climate change	170
2.5 Exercises	30	6.3 Risk communication	171
3 Risk management as adaptation to climate change	31	6.4 Conclusions	173
3.1 Flood risk management decision process	32	<i>References</i>	174
3.2 Approaches to flood risk management as adaptation to climate change	37	<i>Index</i>	178
3.3 An example: Climate change-caused flood risk to municipal infrastructure, City of London (Ontario, Canada)	41		
3.4 Conclusions	66		
3.5 Exercises	67		

Color plates appear between pages 16 and 17.
