Contents

Acknowledgements	vii
Preface	viii
1 Introduction	1
The phylum Arthropoda and its constituent classes	3
Anatomy	3
Significance to humans	6
Developmental transmission of disease	6
Physical attack by insects and other arthropods	6
Mechanical transmission of disease	7
2 Mosquitoes	9
Introduction and description	10
Generalized life cycle and breeding sites	11
Medical significance	21
3 Sandflies	31
Introduction and description	32
Life cycle and breeding sites	33
Medical significance	34
4 Biting midges (<i>Culicoides</i>)	39
Introduction and description	40
Life cycle and breeding sites	40
Medical significance	42
5 Biting blackflies (<i>Simulium</i>)	43
Introduction and description	44
Life cycle and breeding sites	44
Medical significance	46
6 Horseflies	49
Introduction and description	50
Life cycle and breeding sites	51
Medical significance	53
7 The 'higher' flies	55
Introduction and description	56
Life cycle	58
Medical significance	60
8 Tsetse flies (<i>Glossina</i>)	65
Introduction and description	66
Life cycle	67
Medical significance	67
9 Fleas	71
Introduction and description	72
Life cycle	73
Medical significance	75

10 Lice	81
Introduction	82
<i>Pediculus humanus</i>	82
<i>Phthirus pubis</i>	86
11 Bedbugs	89
Introduction and description	90
Breeding sites	90
Description and life cycle	90
Medical significance	93
12 Cone-nose bugs	95
Introduction and description	96
Life cycle	97
Medical significance	97
13 Cockroaches	99
Introduction and description	100
Life cycle	101
Medical significance	103
14 The Arachnids	105
Introduction and description	106
Ticks	106
15 Mites	115
Introduction	116
Human scabies mite	117
Scrub typhus mite	118
16 Bites, stings and other forms of attack	123
Entomophobia and delusory parasitosis	124
Cable bug or cable mite	124
Urticaria caused by caterpillars	125
Bees, wasps and ants	126
Scorpions	128
Spiders	129
Centipedes	130
17 Control of medically significant arthropods	131
Personal protection	132
Vector control	133
Index	141
