Rotterdam University Press/1976

Contents

Preface V

1. Introduction 1

2. The labour market in disequilibrium 4

3. The estimation method 15

4. Potential labour demand 22

4.1 Statistical information and analytical approach 22

4.2 The production function and derived demand for labour under normal operating conditions 26

4.3 The three elements of potential employment 31

4.3.1 Potential employment on the newest vintage 31

4.3.2 The loss in potential employment caused by economic obsolescence 33

4.3.3 The loss in potential employment caused by technical deterioration 35

4.3.4 Combination of the three elements 35

4.3.5 The age of the oldest vintage in use 36

4.4 The effects of disequilibrium on other markets 37

4.4.1 Intended short-term supply of commodities 38

4.4.2 Business liquidity position 41

4.5 Changes in working hours 43

4.5.1 General approach and direct impact of variations in contractual working hours 43

4.5.2 Overtime variations 44

4.5.3 The change in real wages per unit labour time 45

4.5.4 Impact of contractual working hours on machine operating time 46

4.6 The final expression 47

5. Potential labour supply 50
5.1 Statistical information and analytical approach 50
5.2 The growth of the dependent working population corrected for foreign influences 53
5.2.1 Introduction 53
5.2.2 Disaggregation of the participation rate by age and sex 54
5.2.3 The determinants of the participation rate for a working-age population of a constant composition 55
5.2.3.1 The basic expression 55
5.2.3.2 Statistical modifications 58
5.2.4 The final expression 60
5.3 External migration 61
6. An operational labour market model 63
6.1 Introduction 63
6.2 The labour market model used (model c) 63
6.3 The equations to be estimated 68
6.3.1 Labour demand 68
6.3.2 Labour supply 71
7. Application of the model 73
7.1 Introduction 73
7.2 Statistical representation of variables 73
7.3 Predetermination of parameters and basic values 75
7.4 The estimation procedure 76
7.5 The estimation results 77
7.5.1 Labour demand 77
7.5.2 Labour supply 87
7.6 Evaluation 89
8. Suggestions for further research 94
9. Summary 95
Appendices 96
