Contents

Preface / VII

Introduction / XI

1. **General introduction to the monetary growth theory** / 1

2. **The neo-classical monetary growth theory** / 11
2.1. Introduction / 11
2.2. Tobin's monetary growth theory (implications of the asset-structure) / 14
2.3. The implications of real cash-balances as a consumer good / 28
2.3.1. Immaterial consumption of real cash-balances / 28
2.3.2. Influence of the immaterial consumption-effect according to Johnson / 31
2.3.3. Levhari and Patinkin's analysis / 37
2.3.3.1. Influence of the rate of monetary growth on the equilibrium value of capital intensity / 37
2.3.3.2. Influence of the rate of monetary growth on the equilibrium value of real cash-balances per head / 48
2.3.3.3. Monetary neutrality in a growing economy / 49
2.4. The implications of real cash-balances as a producer good / 51
2.4.1. The productive services of real cash-balances / 51
2.4.2. Influence of a change in the rate of monetary expansion / 53
2.5. The stability of the neo-classical monetary growth model / 63
3. **The Keynes-Wicksell monetary growth theory** / 75
3.1. Introduction / 75
3.2. Suppositions / 77
3.3. The short-term model / 89
3.3.1. The IS-FM equilibrium / 89
3.3.2. The influence of a change in the rate of monetary expansion / 98
3.4. Long-term equilibrium analysis / 100

3.4.1. The relation between the rate of inflation and the nominal rate of interest / 100
3.4.2. A change in the real cash-balances / 106
3.4.3. A change in the expected rate of inflation / 109
3.4.4. A change in the labour-capital ratio / 111
3.5. Influence of a change in the rate of monetary expansion / 115
3.5.1. Algebraic formulation / 115
3.5.2. A verbal interpretation / 119

4. **A synthesis of the neo-classical and the Keynes-Wicksell monetary growth theories** / 123
4.1. Introduction / 123
4.2. The modified price change equation / 124
4.3. Long-term equilibrium analysis / 127
4.3.1. An algebraic formulation of equilibrium / 127
4.3.2. A graphical interpretation of equilibrium / 128
4.3.3. Influence of a change in the rate of monetary expansion / 135
4.4. Short-term dynamic analysis / 137
4.5. The rate of inflation and the nominal rate of interest / 143
4.5.1. The Gibson-paradox / 143
4.5.2. Empirical results / 150

5. **Evaluation, summary and conclusions** / 155
5.1. Introduction / 155
5.2. Money from a medium of exchange to an asset / 155
5.3. A critical analysis of the present monetary growth theory / 164
5.4. Suggestions for extension of the present monetary growth theory / 185

Appendices / 189

List of symbols / 201

Bibliography / 203

Index / 213
