

WATER HARVESTING

A Guide for Planners and Project Managers

Michael D. Lee and Jan Teun Visscher

Technical Paper Series No. 30

**IRC International Water and Sanitation Centre
The Hague, The Netherlands
1992**

Table of Contents

Preface	ix
1. Introduction	1
2. Approach to Water Harvesting	2
2.1 Potential of water harvesting	2
2.2 Partnership and community management: key factors in the process	2
3 The Arid and Semi-Arid Lands Environment	5
3.1 Climate	5
3.2 Landscape and vegetation	6
3.3 Hydrology	9
3.4 Current water situation	10
3.5 The communities in ASA regions	12
4. Water Harvesting Technology Options	14
4.1 Rooftop harvesting systems	14
4.2 Surface harvesting systems	17
4.3 Underground harvesting systems	19
5. Assessing Water Harvesting Potential	21
5.1 Environmental feasibility	21
5.2 Technical feasibility	25
5.3 Socio-economic feasibility	28
6. Programme Development with the Community	31
6.1 The partnership approach	31
6.2 Assessment of local conditions	31
6.3 Identifying potential technologies	33
6.4 Selecting the partners	34
6.5 Choice of appropriate support strategy	36
6.6 Training	39
6.7 Construction planning	42
6.8 Management of maintenance	43
7. Financial and Economic Issues	44
7.1 System costs	44
7.2 Cost-benefit analysis	46
7.3 Affordability and willingness to make community contributions	48
7.4 Provision of subsidies	49
7.5 Financing mechanisms	49

8. Rooftop Harvesting Systems	54
8.1 Site assessment	54
8.2 Estimating the required system size	55
8.3 General design features	56
8.4 Design of system components	57
8.4.1 The roof	57
8.4.2 Guttering and first-flush device	58
8.4.3 The tank	59
8.5 Design example	61
8.6 Costing	65
8.7 Construction	68
8.8 Management and maintenance	69
8.8.1 Water use management	70
9. Surface Catchment Systems	71
9.1 Rock catchment dam systems	72
9.1.1 Site assessment	72
9.1.2 Calculation of runoff and storage volume	73
9.1.3 General design features	75
9.1.4 Design of system components	75
9.1.5 Costing	77
9.1.6 Construction	78
9.1.7 Maintenance and management	79
9.2 Small earth dam systems	80
9.2.1 Site assessment	80
9.2.2 Calculation of runoff and storage volume	80
9.2.3 General design features	81
9.2.4 Design of system components	82
9.2.5 Bill of quantities	84
9.2.6 Construction	85
9.2.7 Maintenance and management	85
10 Groundwater Dams	86
10.1 Site assessment	86
10.2 Storage volume	89
10.3 Design	89
10.3.1 Material and labour requirements for clay or masonry dams	92
10.3.2 Material and labour requirements for masonry raised-sand dams	93
10.4 Construction	95
10.5 Management and maintenance	95
References	97
Annex 1 Runoff farming system	104
