

Empirical Macroeconomics for Interdependent Economies

Supplemental Volume

RALPH C. BRYANT * DALE W. HENDERSON
GERALD HOLTHAM * PETER HOOPER
STEVEN A. SYMANSKY
EDITORS

THE BROOKINGS INSTITUTION
Washington, D.C.

Contents

Part One. Design and Description of the Model Simulations 1

Description of the Project and Participating Models 3

Issues of Project Design 7

Instructions to Modeling Groups and Detailed Description of Simulations 8

Table 1-1. Implementation of Monetary Shocks in Simulations D, E, and H 13

Table 1-2. Country Shares in OECD Gross Project 14

Table 1-3. Variables to Be Reported for the United States 16

Table 1-4. Variables to Be Reported for Other Countries and Regions 16

Part Two. Reference Charts and Tables 17

A. Baseline 19

B. U.S. Fiscal Contraction, Foreign Monetary Aggregates Unchanged 41

C. U.S. Fiscal Contraction, Foreign Interest Rates Unchanged 53

D. U.S. Monetary Expansion, Foreign Monetary Aggregates Unchanged 65

E. U.S. Monetary Expansion, Foreign Interest Rates Unchanged 77

F. Nonpolicy Exogenous Depreciation of U.S. Dollar 89

G. ROECD Fiscal Expansion 101

H. ROECD Monetary Expansion 115

Part Three. Detailed Tables for Simulation Results 129

DRI International Model 131

EEC Commission COMPACT Model 145

EPA—Japanese Economic Planning Agency World Model 163

LINK Project World Model 179

LIVERPOOL Model 197

MCM—Multicountry Model of Federal Reserve Board Staff 213

MINIMODR—Haas/Masson Simulation Model 231

MSG—McKibbin/Sachs Global Simulation Model (McKibb) 249

OECD INTERLINK Model 267
TAYLOR Multicountry Model 285
VAR—Minneapolis World Vector Autoregression Model 303
WHARTON—World Model of Wharton Econometrics Associates 321

Part Four. Bibliographical References for Participating Models 339

Selected General References for Multicountry Models 341
DRI International Model 341
EEC Commission COMPACT Model 341
EPA—Japanese Economic Planning Agency World Model 341
LINK Project World Model 343
LIVERPOOL Model 344
MCM—Multicountry Model of Federal Reserve Board Staff 344
MINIMOD—Haas/Masson Simulation Model 345
MSG—McKibbin/Sachs Global Simulation Model 345
OECD INTERLINK Model 345
TAYLOR Multicountry Model 346
VAR—Minneapolis World Vector Autoregression Model 347
WHARTON—World Model of Wharton Econometrics Associates 347
