Dreiundsiebzigster Band
Volume 73

Pseudo-Stochastic Orbit Modeling of Low Earth Satellites Using the Global Positioning System

Adrian Jäggi

2007

Contents

List of Figures v

List of Tables ix

Frequently Used Acronyms xi

1. Introduction 1

2. Low Earth Orbiters Using GPS 5
2.1 TOPEX/Poseidon . . . 5
2.2 Microlab-1 . . . 6
2.3 CHAMP . . . 7
2.3.1 Orbit . . . 7
2.3.2 Science Instruments . . . 9
2.4 SAC-C . . . 10
2.5 JASON-1 . . . 10
2.6 GRACE . . . 10
2.6.1 Orbit . . . 11
2.6.2 Science Instruments . . . 12
2.7 ICESat . . . 13
2.8 FORMOSAT-3 . . . 15
2.9 GOCE . . . 15
2.9.1 Orbit . . . 15
2.9.2 Science Instruments . . . 15
2.9.3 High-level Processing Facility . . . 16

3. Gravity Field Models from Satellite Tracking 19
3.1 Global Representation of the Earth's Gravitational Potential . . . 19
3.2 Classical Gravity Field Mapping . . . 20
3.3 Gravity Field Mapping from High-Low SST Data . . . 20
3.3.1 The EIGEN Gravity Field Models . . . 21
3.3.2 Alternative Methods for Gravity Field Recovery . . . 22
3.4 Gravity Field Mapping from Low-Low SST Data . . . 23
3.4.1 GRACE Gravity Field Models . . . 23

3.5 Gravity Field Mapping from Satellite Gradiometry 24

4. Fundamentals of the GPS Data Analysis **27**
4.1 The Global Positioning System (GPS) 27
4.1.1 GPS Satellite Orbits 27
4.1.2 GPS Frequencies and Codes 27
4.2 The International GNSS Service (IGS) 28
4.2.1 The Center for Orbit Determination in Europe 29
4.3 Modeling the GPS Observables 30
4.3.1 Code Observation Equation 30
4.3.2 Phase Observation Equation 31
4.3.3 Observation Differences 33
4.3.4 Linear Combinations 34
4.4 Pocket Guide of Least-Squares Adjustment 36
4.4.1 Parameter Pre-Elimination 38
4.4.2 Parameter Constraining 39

5. Modeling Satellite Motion **41**
5.1 Extracting LEO Positions from GPS Data 42
5.1.1 Dynamic Orbit Representation 42
5.1.2 Kinematic Orbit Representation 43
5.2 Dynamic LEO Orbit Determination 43
5.2.1 Primary Equations 44
5.2.2 Variational Equations 45
5.3 Pseudo-Stochastic Orbit Modeling 47
5.3.1 Piecewise Constant Accelerations 48
5.3.2 Instantaneous Velocity Changes (Pulses) 51
5.3.3 Piecewise Linear Accelerations 51
5.3.4 Other Orbit Modeling Techniques 55

6. Efficient Normal Equation Handling **57**
6.1 Conventional Least-Squares Adjustment – An Overview 57
6.1.1 Partial Derivatives w.r.t. GPS-Specific Parameters 57
6.1.2 Partial Derivatives w.r.t. LEO Orbit Parameters 58
6.1.3 Structure of the Normal Equation Matrix 59
6.2 Structure of Normal Equations related to Orbit Parameters 61
6.3 Rapid Solution Strategy 63
6.3.1 Collection of Observations 64
6.3.2 Intermediate Solution 65
6.3.3 Back-Substitution for the Final Solution 65
6.3.4 Structure of Transformed Normal Equations 67
6.4 Considering Additional Parameters 67
6.4.1 Structure of the Normal Equation System 67

6.4.2 Rapid Solution Strategy . . . 68
6.5 Estimating Acceleration Parameters . . . 68
6.5.1 Changes in the Structure of Normal Equations . . . 69
6.5.2 Changes for the Rapid Solution Strategy . . . 70
6.6 Numerical Experiments . . . 71
6.6.1 Equivalence of Solutions . . . 72
6.6.2 Intermediary Filter Solutions . . . 72
6.6.3 Performance Tests . . . 73
6.7 Summary and Comments . . . 76

7. CHAMP and GRACE Orbit Determination Using Undifferenced GPS Data 79
7.1 GPS Orbit Products . . . 79
7.2 GPS Clock Products . . . 81
7.3 Reference Frame Transformations . . . 81
7.3.1 ICRF – ITRF . . . 81
7.3.2 SF – ICRF . . . 82
7.4 CHAMP and GRACE GPS SST Data . . . 84
7.5 Initial Orbit Determination . . . 85
7.5.1 GPS Data Screening . . . 87
7.6 Final Orbit Improvement and Validation . . . 89
7.6.1 Internal Orbit Validation . . . 90
7.6.2 External Orbit Validation . . . 90
7.7 CHAMP Orbit Comparison Campaign . . . 93
7.7.1 Individual Orbit Solutions . . . 94
7.7.2 Orbit Comparison Results . . . 99
7.7.3 SLR Validation . . . 100
7.7.4 Discussion . . . 102
7.8 CHAMP Orbit Determination with Improved GPS Tracking . . . 102
7.8.1 Tuning CHAMP POD: Some Words On 103
7.8.2 SLR Validation . . . 107
7.8.3 Validation with Accelerometer Data . . . 108
7.8.4 Accelerometer Data as Additional Observations – A Simulation Study . . . 112
7.8.5 Validation with Kinematic Orbits . . . 114
7.9 GRACE Orbit Determination . . . 115
7.9.1 Tuning GRACE POD . . . 116
7.9.2 Validation with K-Band Data . . . 117
7.9.3 Validation with SLR Data . . . 121
7.9.4 Overlap Analysis . . . 123
7.9.5 Analysis of Ionosphere-Free Phase Residuals . . . 125

8. GRACE Orbit Determination Using Doubly Differenced GPS Data 129
8.1 Baseline Formation . . . 130
8.1.1 Ground Station Selection . . . 131
8.2 Orbit Results using GRACE and IGS Ground Station Data . . . 134

8.2.1 Orbit Differences . . . 134
8.2.2 K-Band Validation . . . 137
8.2.3 SLR Validation . . . 138
8.2.4 Special Solutions . . . 139
8.3 Analysis of the Space Baseline . . . 142
8.3.1 Quality of the Reference Trajectory . . . 143
8.3.2 Tuning Space Baseline Solutions . . . 144
8.3.3 Analysis of Tuned Space Baseline Solutions . . . 146
8.3.4 Formal Errors and Orbit Differences . . . 152
8.4 Summary and Comments . . . 154

9. Analyzing Pseudo-Stochastic Parameters **157**
9.1 Interpretability of Single Acceleration Estimates . . . 157
9.1.1 Simulation Scenario . . . 157
9.1.2 Orbit and Acceleration Recovery . . . 158
9.2 Interpretability of Reduced-Dynamic Trajectories . . . 161
9.2.1 Orbit Reparametrization . . . 161
9.2.2 Simulation Scenario . . . 162
9.2.3 Acceleration Recovery . . . 162
9.3 Highly Reduced-Dynamic Trajectories . . . 163
9.3.1 Properties of Maximum Reduced-Dynamic Trajectories . . . 164
9.4 Analysis of HRD Orbit Positions and Velocities . . . 166
9.4.1 Simulation Scenario . . . 166
9.4.2 Orbit and Velocity Reconstruction . . . 167
9.4.3 Fourier Analysis of HRD Orbit Positions . . . 169
9.4.4 Fourier Analysis of HRD Orbit Velocities . . . 172
9.5 Gravity Field Recovery from HRD Orbit Positions . . . 174
9.5.1 Simulation Scenario . . . 174
9.5.2 A Few Introductionary Remarks . . . 175
9.5.3 Effect of Data Accumulation . . . 177
9.5.4 Solutions with 10 s GPS Data Sampling . . . 179
9.5.5 Solutions with 30 s GPS Data Sampling . . . 183
9.5.6 Comment on Applications using Real Observations . . . 184
9.6 Summary and Comments . . . 184

10. Summary, Conclusions, and Outlook **187**

Bibliography **191**
