Preface	xi
1 Forecasting and managerial action	1
1.1 What forecasting is and does	1
1.2 The ends of forecasting	4
1.3 Forecasting and capital investment decisions	5
1.4 Strategic planning	12
1.5 Forecasting for product and market planning	13
1.6 Forecasts for sales and production planning and stock control	15
1.7 Forecasting for budgetary control and financial planning	17
1.8 Forecasting for competitive position planning	19
1.9 Summary	20
2 The firm and the economy	22
2.1 The interrelationship of forecasts	22
2.2 Forecasting the industry or the firm?	26
2.3 Using forecasts produced outside the firm	26
2.4 Economic and industrial indicators	29
2.5 Input-output analysis	30
2.6 Reading input-output tables	33
2.7 Shortcomings of macro-economic input-output tables for company forecasting	37
2.8 Construction of specialised input-output tables	38
2.9 Input-output and technological forecasting	39
2.10 Summary	40

3	Forecasts based on mathematical trends	42
3.1	Pictures and models of economic activity	42
3.2	Towards the first sketch	44
3.3	The first sketch	47
3.4	Judgment on time trends	50
3.5	Trend projection	52
3.6	Errors in regression estimates and projections	58
3.7	Selection of time intervals	59
3.8	The standard error and measures of dispersion	60
3.9	Non-linear time series	63
3.10	Managers and time series	64
3.11	Summary	66
4	Further analysis of time series	67
4.1	The problem	67
4.2	The trend	71
4.3	The seasonal index	73
4.4	Cyclical changes	77
4.5	Irregular fluctuations	80
4.6	The random component	81
4.7	Theoretical objections	83
4.8	Example of an application	84
4.9	Summary	88
5	Automatic forecasting systems	89
5.1	The forecasting problem	89
5.2	The forecasting system	91
5.3	The statistical method	92
5.4	Summary and conclusions	95
6	Relationships among economic variables	97
6.1	Role of relationships in forecasting	97
6.2	Building simple models	99
6.3	Regression of time series	101
6.4	Multiplicative or additive models?	107
6.5	Summary	110
7	Economic forecasts	112
7.1	The business cycle	112
7.2	Cycle theories	115
7.3	Predicting changes in cyclical activity	123
7.4	Taking the long view	125
7.5	Technological forecasting	129
7.6	Summary	131

8 Surveys as a basis for forecasting	133
8.1 The role of survey investigation	133
8.2 Surveying customer behaviour	135
8.3 Respondent groups	137
– Managers: the first stage	138
– Customers	141
– The sales force	143
– Managers: a more sophisticated approach	146
– Distributors and retailers	147
– Panels	148
8.4 Uses of survey techniques	150
8.5 Summary	152
9 Using forecasts for decision-making	154
9.1 The gap between information and decisions	154
9.2 Probability	156
9.3 Loss boundary analysis	160
9.4 Decision trees	162
9.5 Monte Carlo simulation	169
9.6 Towards business models	172
9.7 Summary	173
10 Managing forecasting	175
10.1 Forecasting and management systems	175
10.2 Criteria for forecast evaluation	178
10.3 Getting at the data	182
10.4 Specifying forecasting projects	184
10.5 What sort of forecasting systems?	186
10.6 What sort of management?	188
10.7 Summary and conclusions	188
Appendix	191
Further reading	193
Index	197
