# CONTENTS

## CHAPTER 1

<b>INTRODUCTION</b>	<b>1</b>
1.1 <b>Engineering Geology Versus Geology</b>	<b>1</b>
1.2 <b>Civil Engineering</b>	<b>2</b>
1.3 <b>The Role of Engineering Geology</b>	<b>6</b>

## CHAPTER 2

<b>GEOLOGY</b>	<b>10</b>
2.1 <b>Geologic Science and its Subdivisions</b>	<b>10</b>
The Earth's Materials	10
The Earth's Processes	11
The Earth's History	11
2.2 <b>Mapping and Inventorying the Earth</b>	<b>12</b>
The Structure and Composition of the Earth	12
Geologic Time	13
Geologic Maps	15
Mappable Units	15
2.3 <b>Classification of Rocks</b>	<b>18</b>
The Rock-Forming Minerals	18
The Main Classes of Rocks	22
Igneous Rocks	24
Sedimentary Rocks	26
Metamorphic Rocks	30
2.4 <b>Weathering and Weathered Rocks</b>	<b>32</b>
2.5 <b>Geologic Structures</b>	<b>34</b>
Folds	35
Faults	35
Joints	38
2.6 <b>Topography and Landforms</b>	<b>40</b>
2.7 <b>Sources of Information about Geology and Engineering Geology</b>	<b>41</b>
Books on Engineering Geology	41
Books on Geology	42
Books on Engineering	43
<b>Concepts and Terms for Review</b>	<b>44</b>
<b>Sources Cited</b>	<b>44</b>

## CHAPTER 3

<b>GEOLOGICAL INVESTIGATIONS</b>	<b>45</b>
3.1 <b>Philosophy of Exploration</b>	<b>46</b>
3.2 <b>Sources of Information</b>	<b>47</b>
3.3 <b>Aerial Photo Interpretation and Remote Sensing</b>	<b>48</b>
3.4 <b>Geologic Mapping</b>	<b>50</b>
Logging of Exploratory Excavations	53
3.5 <b>Geophysical Methods as an Aid in Mapping</b>	<b>55</b>
Seismic Refraction Techniques	58
Seismic Reflection Surveys	60
Electrical Methods	60
Electromagnetic Surveys	62
Magnetic Methods	63
Gravity Measurements	64
Ground-Penetrating Radar	64
3.6 <b>Core Borings</b>	<b>65</b>
Coring	65
Care and Logging of Drill Core	66
Additional Procedures and Surveys with Core and Drill Holes	67
<b>Concepts and Terms for Review</b>	<b>73</b>
<b>Thought Questions</b>	<b>74</b>
<b>Sources Cited</b>	<b>75</b>

## CHAPTER 4

<b>SHALES, SANDSTONES, AND ASSOCIATED ROCKS</b>	<b>77</b>
4.1 <b>The Mineral and Rock Grains</b>	<b>77</b>
The Size Grades of Sediments	77
Clay Minerals	82
4.2 <b>Lithification</b>	<b>85</b>
Diagenesis of Sands and Gravels	85
Diagenesis of Clay/Silt Rocks	87

<b>4.3 Description of Some Epiclastic Rocks</b>	<b>88</b>
Conglomerate and Gravelly Rocks (Rudites)	88
Sandstone and Arenaceous Rocks	90
Shales, Mudstones, and Other Mudrocks	98
<b>4.4 Associations of Epiclastic Rocks Found in Nature</b>	<b>109</b>
Flysch or Turbidites	109
Cyclothemic Deposits—Molasse	110
Accretionary Wedge Deposits— Melange	111
<b>4.5 Engineering Properties of Sandstones and Conglomerates</b>	<b>114</b>
Exploration Targets and Problems	114
Landslide Hazards	116
Surface Excavations	116
Foundations	118
Underground Works	121
Sandstone as a Material	122
<b>4.6 Engineering Problems with Shales and Mudstones</b>	<b>122</b>
Targets and Problems of Exploration	122
Landslide Hazards	123
Surface Excavations	124
Dams	126
Tunnels	127
Fills and Embankments	128
<b>4.7 Engineering Properties of Sites in Sandstone and Shale</b>	<b>129</b>
Exploration	130
Landslide Hazards	130
Excavations	131
Foundations	131
<b>4.8 Case Histories</b>	<b>131</b>
The Portage Mountain Dam and Powerhouse	131
Damage to a Housing Development by Mudstone Expansion	133
Shale Foundations in TVA Dams	134
A Foundation in Melange—Scott Dam	136
Excavations in Shales for Bogotá, Colombia	137
<b>Concepts and Terms for Review</b>	<b>138</b>
<b>Thought Questions</b>	<b>139</b>
<b>Sources Cited</b>	<b>140</b>

## CHAPTER 5

### SOLUBLE ROCKS: LIMESTONE, DOLOMITE, AND EVAPORITES **143**

<b>5.1 Geology of Limestone, Chalk, and Dolomite</b>	<b>144</b>
Composition	144
Biochemical Limestones	144
Chemical Limestones	146
Detrital Limestone	148
Dolomite	148
<b>5.2 The Evaporite Rocks</b>	<b>153</b>
Gypsum	153
Rock Salt	154
Anhydrite	155
<b>5.3 Solution Processes and Their Effects</b>	<b>157</b>
Chemical Interaction of Water and Carbonate Rocks	157
Stages of Karstification	158
Features of Karstic Limestone	160
Sinkholes and Dolines	163
The Effect of Lowering the Ground- Water Table	166
Geologic Controls on the Formation of Karst	167
Residual Soils of Karst Regions	169
<b>5.4 Engineering Properties of Limestones and Evaporites</b>	<b>170</b>
Geologic Hazards	170
Exploration Targets and Problems	170
Surface Excavations and Transportation Routes	174
Water Supply and Waste Disposal	175
Foundations for Bridges and Buildings	175
Dams and Reservoirs	177
Tunnels and Underground Works	178
Materials of Construction	179
<b>5.5 Case Histories</b>	<b>179</b>
Failures and Near Misses from Surface Collapse over Cavities	179
Problems with Karstic Limestone in Building TVA Dams	180
Construction of a Sports Facility over Karstic Marble	183
The Grout Curtain at El Cajón Dam, Honduras	185
Problems with Gypsum Beneath Reservoirs	187

Pollution of a Karstic Reservoir—  
Mount Gambier, Australia 189

Concepts and Terms for Review 190

Thought Questions 190

Sources Cited 192

## CHAPTER 6

### PLUTONIC IGNEOUS ROCKS 495

#### 6.1 Geology of Plutonic Rocks 196

Magma 196

The Forms of Igneous Intrusions 198

Classification of Plutonic Rocks 201

#### 6.2 Jointing in Granitic Rocks 208

Sheet Joints 208

Other Joints in Plutonic Rocks 212

#### 6.3 Weathering of Plutonic Rocks 213

Processes of Weathering 213

Weathering Profiles 215

Classification of the Grade of  
Weathering 220

Definition of Zones in the Weathering  
Profile 224

Profile Development in Hong

Kong 225

Effect of Climate and Rock Type 226

Weathering of Basic and Ultrabasic  
Rocks 228

#### 6.4 Engineering Properties of Plutonic Rocks 230

Exploration Targets and Problems 230

Hazards in Natural and Artificial  
Slopes 231

Excavations at the Surface 235

Foundations 235

Dams 236

Underground Works 239

Ground Water in Plutonic Rocks 241

#### 6.5 Case Histories 242

Mammoth Pool Dam, on Sheeted  
Granodiorite 242

A Hydroelectric Project in Malaysian  
Granite 244

Concepts and Terms for Review 246

Thought Questions 247

Sources Cited 248

## CHAPTER 7

### VOLCANISM AND VOLCANIC ROCKS 251

#### 7.1 Volcanic Processes 252

Locations of Active Volcanism 252

Eruptive Phenomena 253

#### 7.2 Volcanic Rocks 266

Pyroclastic Rocks 266

#### 7.3 Volcanic Flow Rocks 266

#### 7.4 Rock Mass Characteristics of Volcanic Formations 272

#### 7.5 Weathering Products 273

#### 7.6 Engineering Problems with Volcanism and Volcanic Rocks 274

Hazards to Engineering Works from  
Volcanism 274

Exploration of Sites in Volcanic  
Rocks 277

Surface Excavations and Stability of  
Slopes 278

Underground Excavations 279

Dams and Canals 281

Materials 283

#### 7.7 Case Histories 286

Protection of an Icelandic Port from  
Volcanism 286

Round Butte Dam, Oregon 287

Concepts and Terms for Review 289

Thought Questions 289

Sources Cited 290

## CHAPTER 8

### METAMORPHIC ROCKS 293

#### 8.1 Geology of Metamorphic Rocks 294

Metamorphism 294

Foliation 294

Banding and Other Structures 298

Metamorphic Grade 298

Metamorphic Zoning 299

Effect of Initial Composition on  
Metamorphic Products 301

#### 8.2 Important Metamorphic Rocks 302

Slate 302

Phyllite 303

Schist 303

Gneiss 305

Quartzite	305
Marble	306
Other Metamorphic Rock Types	306
<b>8.3 Weathering and Defects in Metamorphic Rocks</b>	<b>308</b>
Weathering	308
Jointing	309
Foliation Shears	309
<b>8.4 Engineering in Metamorphic Rocks</b>	<b>310</b>
Exploration	310
Landslide Hazards	312
Surface Excavations	314
Foundations of Structures, Including Dams	317
Underground Excavations	321
Materials	324
<b>8.5 Case Histories</b>	<b>324</b>
Rock Conditions in the Washington, D.C., Metropolitan Area	324
Failure of St. Francis Dam	326
Failure of Malpasset Dam	327
<b>Concepts and Terms for Review</b>	<b>330</b>
<b>Thought Questions</b>	<b>331</b>
<b>Sources Cited</b>	<b>331</b>

## CHAPTER 9

### ROCK STRUCTURE AND FAULT ACTIVITY 333

<b>9.1 Description of Geologic Structure</b>	<b>334</b>
Structure Contours	334
Structure Contours for Inclined Planes—Strike and Dip	334
Apparent Dip	334
Representation of Nonplanar Structures	336
Finding Outcrop Traces with Structure Contour Data	337
<b>9.2 Folds</b>	<b>338</b>
Types of Folds	338
Interpretation of Fold Morphology	340
Outcrop Pattern of Folds	343
Interpretation of Fold Type From Stratigraphy	345
Subsidiary Fracturing and Shearing	346

<b>9.3 Faults</b>	<b>348</b>
The Vector of Net Slip	348
Apparent Versus Real Offset	349
Classification of Faults	350
Fault-Line Escarpments	351
Subsidiary Structures in the Wall Rock of Faults	352
<b>9.4 Some Tectonic Environments</b>	<b>355</b>
Block Faulting	355
Strike-Slip Fault Regions	356
Fold Belts	357
Association of Faulting and Folding	358
The Effect of Rock Type on Consequences of Deformation	358
<b>9.5 Engineering Properties of Faulted or Folded Rock Masses</b>	<b>359</b>
Shear Strength	359
Water in Fault Zones	359
Risk of Future Movements along Faults	361
<b>9.6 Active Faults</b>	<b>362</b>
Indicators of Fault Activity	362
Direct Observation of Fault Offsets in Excavations	366
<b>9.7 Geochronology</b>	<b>368</b>
The Carbon-14 Method	368
Fission Track Dating	368
Other Methods	370
<b>9.8 Case Histories</b>	<b>370</b>
Auburn Dam	370
Faults at the Site of a Proposed LNG Terminal	374
Baldwin Hills Reservoir	376
<b>Concepts and Terms for Review</b>	<b>378</b>
<b>Thought Questions</b>	<b>379</b>
<b>Sources Cited</b>	<b>379</b>

## APPENDIX

<b>Identification of Rocks and Minerals</b>	<b>382</b>
Minerals	382
Rocks	383
Index	387
