

INFORMATION PROCESSING 77

Proceedings of IFIP Congress 77
Toronto, August 8-12, 1977

Edited by

Bruce GILCHRIST
Columbia University
New York

PROGRAM COMMITTEE

W. M. Turski, chairman
E. G. Manning
H. Freeman
S. Igarashi
F. H. Summer

H. D. Mills
Y. Shmyglevsky
J. Vlietstra
P. J. Dixon
B. Gilchrist

L. Bolliet

1977

TECHNISCHE HOCHSCHULE DARMSTADT	
Fachbereich 1	
Gesamtbibliothek	
Betriebswirtschaftslehre	
Inventar-Nr. :	16.743
Abstell-Nr. :	A 18 / 1083
Sachgebiete:	1.7.1
	1.7.2
	1.7.3

NORTH-HOLLAND PUBLISHING COMPANY
AMSTERDAM · NEW YORK · OXFORD

CONTENTS

Preface	v
Bruce Gilchrist	
Congress Chairman's Foreword	xv
James H. Finch	
Program Chairman's Foreword	xvii
W. M. Turski	
Introduction	xix
Richard I. Tanaka	
 FUTURE DIRECTIONS IN COMPUTER ARCHITECTURE	
Beyond Today's Computers	1
M. V. Wilkes	
Direct-Execution Computer Architecture	7
Yaohan Chu	
 SOFTWARE STUDIES—I	
On Generation of Test Data and Minimal Cover of Directed Graphs	13
Rajat K. Deb	
An Experiment in Modular Program Design	17
J. L. Cheval, F. Christian, S. Krakowiak, J. Montuelle and J. Mossiere	
A Debugging Machine—An Approach to an Adaptive Computer	23
Ken Sakamura, Hideaki Kitafusa, Yukio Takeyari and Hideo Aiso	
 PATTERN RECOGNITION AND ARTIFICIAL INTELLIGENCE	
A Feature Concentration Method for Character Recognition	29
Kazuaki Komori, Takahiko Kawatani, Kenichiro Ishii and Yukiyasu Iida	
Recognition System for Handprinted Characters	35
Kiyoshi Iwata, Masumi Yoshida, Eiichiro Yamamoto, Takeshi Masui, Yukikazu Kabuyama and Shin-ichi Shimizu	
The Hierarchical Synthesis of Lisp Scanning Programs	41
Alan W. Biermann and Douglas R. Smith	
 EDUCATION IN COMPUTING—I	
Education in Computing Versus User Needs	47
J. N. P. Hume	
Introducing Computer Science—An Alternative	53
Ira Pohl and Alan Shaw	
 THEORIES OF PROGRAMS AND LANGUAGES	
Automatic Construction of Complete Sample System for Program Testing	57
J. M. Barzdin, J. J. Bicevskis and A. A. Kalnins	
Data-Flow-Analysis in Weakly Interpreted Program-Schemes	63
Peter Bachmann	
A Theory of Syntactic Monoids for Context-Free Languages	69
Jean-François Perrot and Jacques Sakarovitch	
 NEW METHODS FOR INFORMATION SYSTEMS DEVELOPMENT	
Utilization of New Information Systems Development Methods in Practice—Perspectives and Prospects	73
Mats Lundeberg	
Principles of Computer-Assisted Conception for Automatic Elaboration of a Computerized Information System	79
J. P. Anton, C. Y. Chrisment, J. B. Crampes, M. F. Debaisieux and J. H. Luguët	
A Managerial Decision-Making Tool—Computer Assisted Problem-Solving System (CAPSS)	85
T. Ishiketa, T. Yokoyama, S. Mandai and N. Takeshima	
 FINITE ELEMENTS METHODS	
Conforming Finite Element Methods for Shell Problems with Numerical Integration	91
Michel Bernadou	
A Family of Finite Elements with Penalisation for the Numerical Solution of Stokes and Navier-Stokes Equations	97
M. Bercovier	
On a Graphical Package for Nonlinear Partial Differential Equation Problems	103
Owe Axelsson and Uno Nävert	
 FUTURE DIRECTIONS IN INFORMATION MANAGEMENT	
Some Approaches to the Management of Change	109
Mayford L. Roark	
Distributed Data Base Where are You? (A Tutorial)	113
Kurt Ziegler, Jr.	

PROGRAMMING LANGUAGES	
An Implementation-Oriented Method for Describing Algorithmic Languages	117
Andrei P. Ershov and Valery V. Grushetsky	
A Formal Approach to Translator Specification	123
Marie Claudé Gaudel	
Optimal Code Generation for Machines with Different Types of Instructions	129
T. Kameda and H. M. Abdel/Wahab	
DATA BASE THEORY	
Mathematical Semantics and a Model for Data Bases	133
T. S. E. Maibaum	
Using Knowledge of a Data Base World in Interpreting Natural Language Queries	139
P. Dell'Orco, V. N. Spadavecchia and M. King	
Automatic Constraint Maintenance and Updating Defined Relations	145
Stephen Todd	
DISTRIBUTED PROCESSING	
Interprocess Communications in a Highly Diversified Distributed System	149
M. Maekawa	
Distributed Systems—Towards a Formal Approach	155
Gérard Le Lann	
Inhouse Computer Network Kuipnet	161
Toshiyuki Sakai, Tsunetoshi Hayashi, Shigeyoshi Kitazawa, Koichi Tabata and Takeo Kanade	
GRAPHICS	
An Interactive Geometrical Design System with Handwriting Input	167
Mamoru Hosaka and Fumihiko Kimura	
The Intermediate Language for Pictures	173
Teus Hagen, Paul J. W. ten Hagen, Paul Klint and Han Noot	
Multiple Colors and Image Mixing in Graphics Terminals	179
Eric D. Carlson, Gary M. Giddings and Robin Williams	
NUMERICAL ANALYSIS	
Computing the Frequency of a Sampled Sinusoidal Function	183
Graziano Frosini and Francesco Viterbo	
Inexact Step Lengths and Quasi-Newton Methods	189
David F. Shanno and Kang-Hoh Phua	
On Bayesian Methods for Seeking the Extremum and their Application	195
Jonas Mockus	
COMPUTER AIDED INSTRUCTION	
New Trends and Related Problems in Computer-Based Education	201
J. Hebenstreit	
Introduction of Computer Aided Design in an Educational System	209
Philippe Masse and Jean-Claude Sabonnadiere	
IMPACT OF INFORMATION SYSTEMS ON ORGANISATIONS—I	
The Impact of Information Systems on Organisational Thinking	213
Robert I. Tricker	
Information Systems and Organization—Empirical Findings Regarding the Introduction of Computers in Manufacturing Firms	223
Emilio Bartezzaghi, Adriano De Maio, Claudio Ciborra, Piercarlo Maggolini and Paolo Romano	
MODELLING AND ANALYSIS OF DATA NETWORKS	
A Unified Method for the Specification and Verification of Protocols	229
Gregor V. Bochmann and Jan Gecsei	
Computational Complexity of Network Design Algorithms	235
Lawrence Van Sickle and K. Mani Chandy	
A Recursive Algorithm for Deadlock Preemption in Computer Networks	241
D. A. Hutchison, J. S. Riordon and S. A. Mahmoud	
PATTERN RECOGNITION AND PROCESS CONTROL	
The Discriminant Function Approach to Classification of Incomplete Pattern Vectors	247
Josef Kittler	
Validation Problems in Pattern Recognition Study of a Particular Case	253
M. Borillo, L. Fariñas Del Cerro and J. Virbel	
Problems of Plating-Line Scheduling	259
V. M. Glushkov, A. I. Nikitin, I. V. Sergienko	

EFFECTS OF INFORMATION TECHNOLOGY ON ORGANISATION STRUCTURES

Restructuring the Data Processing Organization for Data Resource Management	261
Richard L. Nolan	
TRENDS AND DEVELOPMENTS IN CAD	
Trends and Developments in Computer-Aided Design	267
J. Hatvany	
Focusing on the Internal Model in CAD and CAM Systems	273
Frank M. Lillehagen, Jørn Øian and Jan F. Mack	
FOUNDATIONS FOR PROOFS ABOUT PROGRAMS	
Semantics and the Foundations of Program Proving	279
J. W. de Bakker	
An Analytic Approach to the Verification of Iterative Programs	285
Andrzej Blikle	
SOFTWARE STUDIES—II	
An Allocation Algorithm for Multi-Micro Computers Using Array Structured Data	291
Christian Galtier	
Software for Speech Output	297
Ian H. Witten	
Program Generation and Transformation—Tools for Mathematical Software Development	303
James M. Boyle, Kenneth W. Dritz, Oleg B. Arushanian and Yuri V. Kuchevskiy	
ROUTING AND CONGESTION CONTROL IN SWITCHED DATA NETWORKS	
Adaptive Routing in Store-and-Forward Networks and the Importance of Load Splitting	309
Wyn L. Price	
Analysis of Flow Control in Switched Data Networks	315
J. W. Wong and M. S. Unsoy	
On Alternate Routing in Circuit-Switched Data Networks	321
Harry Rudin	
FUTURE OF DATA MANAGEMENT	
On the Gross Architecture for the Next Generation Database Management Systems	327
G. M. Nijssen	
Computer System Integrity Safeguards	337
Norman R. Nielsen and Brian Ruder	
COMPUTER ASSISTED TRAINING	
Comparison Between a Prescribed and a Permissive Process in Computer Assisted Training in Decision Making	343
B. Varet, N. Salame, F. M. Blondel, J. F. Boyer, F. Allorent and J. P. Levy	
Basis—An Interactive System for the Introductory Course in Informatics	347
R. P. van de Riet	
PROCESS CONTROL	
Control under Incomplete Information	353
N. N. Krasovskii	
Realizations of Two Dimensional Recursive Filters	367
Michel Clerget	
TECHNIQUES IN CAD—I	
The Analysis of CAMS by Computer Aided Algebraic and Symbol Manipulation	373
James N. Hanson	
A Computer System for the Synthesis of Reinforced Concrete Frames	377
Alina Golka	
Using a Conversational Translator Writing System for Generating Computer Aided Design Systems in Architecture	383
Gérard Courtieux and Daniel Guibert	
DATA BASE STUDIES—I	
A New Method for Deductive Answer Finding in a Question-Answering System	389
Hermann Helbig	
Securing Data Bases under Linear Queries	395
M. D. Schwartz, D. E. Denning and P. J. Denning	
Top-Down Optimization in Multi-Level Data Base Systems	399
Klaus-Dieter Krägeloh and Peter C. Lockemann	

FAULT TOLERANCE	
Fault-Tolerant Computing—Progress, Problems and Prospects	405
Algirdas Avižienis	
A Model for Concurrent Diagnosis in a Microprogrammable System Using a Dynamic Test Scheme	421
Kumar Subramanian	
DISTRIBUTED DATA SWITCHING	
On the Design of Local Network Interfaces	427
Paul V. Mockapetris, Michael R. Lyle and David J. Farber	
MLMA—A Collision-Free Multi-Access Method	431
E. H. Rothauser and D. Wild	
TELECOMMUNICATIONS MANAGEMENT	
Business Problems in Planning of International Data Communications Networks	437
Michael L. Ford	
DATA BASE STUDIES—II	
Clustered File Generation and its Application to Computer Science Taxonomies	441
Gerard Salton and Donna Bergmark	
Mappings in Database Systems	447
G. Pelagatti, P. Paolini and G. Bracchi	
A Procedural Language for the Relational Data Base Management System "Syntex"	453
Ephrem S. Dorkenoo, Michel Lemaitre and Michel Lemoine	
DATA NETWORKS: PAST, PRESENT AND FUTURE	
Some Perspectives on Networks—Past, Present and Future	459
Paul Baran	
The Cyclades Experience—Results and Impacts	465
Hubert Zimmermann	
PERFORMANCE EVALUATION	
Performance Measurements of the MU5 Primary Instruction Pipeline	471
N. A. Yannacopoulos, R. N. Ibbett and R. W. Holgate	
Assessing the Power of an Order Code	477
Simon H. Lavington and Alan E. Knowles	
A Multiclass Network Model of a Multiprogramming Timesharing Computer System	481
A. Krzesinski, S. Gerber and P. Teunissen	
COMPUTATIONAL ALGORITHMS	
Approximation with a class of Rational Functions	487
J. A. van Hulzen and R. P. Hettich	
Fast Algorithm for Rational Function Integration	493
David Y. Y. Yun	
An Application of a Component by Component Splitting up Scheme to the Hamilton-Jacobi Equation	499
Sady Maurin	
ORGANISATIONAL PRODUCTIVITY—THE ROLE OF INFORMATION TECHNOLOGY	
Organizational Productivity—The Role of Information Technology	503
Paul A. Strassmann	
PACKET NETWORKS—ISSUES, EXPERIENCES, CHOICES	
DATAPAC—A Phased Approach to the Introduction of Public Packet-Switched Network	509
C. Ian McGibbon and Howard Gibbs	
Packet Networks—Issues and Choices	515
Louis Pouzin	
PROGRAM TRANSLATION	
An Approach to Compile-Time Type Checking	523
Peter Henderson	
Error Recovery for LR(k) Parsers	529
George Poonen	
Automatic Generation of Optimizing Multipass Compilers	535
Harald Ganzinger, Knut Ripken and Reinhard Wilhelm	
FUTURE POTENTIALS IN COMPUTER COMMUNICATION	
Packet Network Design—The Third Generation	541
Lawrence G. Roberts	
Performance of Distributed Multi-Access Computer-Communication Systems	547
Leonard Kleinrock	

SYSTEM PERFORMANCE	
Task Scheduling with Critical Section Constraints	553
Dennis Kafura	
Customer Classes and Closed Network Models—A Solution Technique	559
G. Balbo, S. C. Bruell and H. D. Schwetman	
Priority Scheduling Disciplines in Queuing Network Models of Computer Systems	565
Kenneth C. Sevcik	
PROGRAMMING SUPPORT SYSTEMS	
A Support for Program Design with Abstract Machines	571
Eduardo A. Jordan	
Language Design for Modular Software Construction	577
K. Jackson	
Pseudo-Languages and their Pre-Processors	583
Shoji Shinozawa, Hiroosa Ikeda, Atsushi Nakashima and Masamitsu Watanabe	
DATA BASES AND BUSINESS SYSTEMS	
The Impact of Database Technology on Business Systems	589
Edgar H. Sibley	
EDUCATION IN COMPUTING—II	
The Impact of Education in Computing on Science	597
Bernard C. Levrat	
Experience with a Computer-Assisted Training System	601
John R. Abrahams and George De Wolf	
SOFT HARDWARE	
Logical Systems Design using PLAs and Petri Nets Programmable Handwired Systems	607
Kwan Chi Leung, P. Le Beux and C. Michel	
A Multilingual High Level Processor	613
Emilio Luque Fadon, Lorenzo Moreno Ruiz and José F. Tirado Fernandez	
Linear Checking Equations and Error-Correcting Capability for Computation Channels	619
M. G. Karpovsky and E. A. Trachtenberg	
GRAPHICS IN SOFTWARE ENGINEERING	
The Computer "Scientist" as Toolsmith—Studies in Interactive Computer Graphics	625
Frederick P. Brooks, Jr.	
FORAL LP—Making Pointed Queries with a Light Pen	635
Michael E. Senko	
INTERACTIVE APPROACHES TO CORPORATE PLANNING AND CONTROL	
Interactive Approaches to Corporate Planning and Control with Particular Reference to the use of APL	641
Ian P. Sharp	
HARDWARE AIDS TO SOFTWARE	
Performance of a Parallel Hash Hardware with Key Deletion	643
Tetsuo Ida and Eiichi Goto	
Putting Supervisory Routines into Hardware	649
Jonathan L. Bondy and David N. Freeman	
Multidimensional Array Accessing in the MU5 Computer	655
Gareth Thomas and Andrei G. Necula	
COMPUTERIZED EVALUATION AND COMPUTATIONAL LEARNING	
A New Approach to Evaluating Code Generation in a Student Environment	661
Hanan Samet	
Computational Learning of Semantic Lexical Relations for the Generation and Automatic Analysis of Content	667
A. Andreewsky, F. Debili and C. Fluhr	
SPECIALIZED COMPUTER SERVICES	
Computers and the Farsi Language—A Survey of Problem Areas	673
Behrooz Parhami and Farhad Mavaddat	
Another Face of Computing—Service to the Blind	677
Paul A. Fortier and Donald Keeping	
Optimization of Selection and Allocation of Candidates to Professional Colleges in India	683
T. R. Natesan, K. Viswanathan and N. Sabapathy	

CAD—PERSPECTIVES AND PROSPECTS	
Means and Levels of Knowledge Representation in the CAD System Germinal	689
Jack Foisseau, René Jacquart and François-Régis Valette	
On Being Creative with Computer Aided Design	695
Nicholas Negroponte	
DECISION SUPPORT SYSTEMS	
Finsim—A Decision Support System for Financial Planning and Engineering	705
Michel Klein	
Computer Based Planning and Modeling Systems	711
J. A. M. Wolters	
Prokon/Plan—A Modelling Tool for Project Planning and Control	717
Trygve M. H. Reenskaug	
LOGIC AND PROOFS FOR PROGRAMS	
Intermittent Assertion Proofs in Lucid	723
E. A. Ashcroft and W. W. Wadge	
Program Proving—Expression Languages	727
Paul Pritchard	
A Constructive Programming Logic	733
Robert L. Constable	
SYSTEM PROGRAMMING	
A Microprogram Generating System—MPG	739
Takanobu Baba	
Parallelism in Loop-Free Microprograms	745
Subrata Dasgupta	
On the Efficiency of Some List Marking Algorithms	751
J. L. Baer and M. Fries	
AUTOMATED DESIGN IN ELECTRONICS	
Automation of Electronic and Microelectronic Design	757
M. A. Gavrilov	
NOPAL—Automated Design and Programming of Testing	777
Noah S. Prywes, Yung Chang and Cihan Tinaztepe	
VERIFICATION AND PROGRAMMING	
Program Verification and Verification Oriented Programming	783
D. C. Luckham	
Proving Properties of Assembly Language Programs	795
Malcom C. Newey	
IMPACT OF INFORMATION SYSTEMS ON ORGANISATIONS—II	
Towards A Theory of Organizational Information System—A General System Perspective	801
Maurice Landry and Jean-Louis Le Moigne	
Programme System for Social Choice under Fuzzy Managing	807
Vladimir D. Dimitrov and Lilly D. Driankova	
GEO-XI—A Socioeconomic Laboratory for Planning Agencies	813
Enrique A. Calderon, Teresa E. Sobrino and Jose Luis A. Frias	
OPERATING SYSTEMS	
Machine-Independent Operating Systems	819
D. Morris (and G. R. Frank and C. J. Theaker)	
Managers Versus Monitors	827
Alfons J. Jammel and Helmut G. Steigler	
COMPLEXITY THEORY	
A Nonlinear Lower Bound for the Formula Complexity of Certain Boolean Functions	831
Gerd Wechsung	
“Natural” Complexity Measures and a Subrecursive Speed-up Theorem	835
Donald A. Alton	
Probabilistic Machines Can Use Less Running Time	839
Rūsiņš Freivalds	
PARALLEL ARCHITECTURES	
A Multimicroprocessor—CYBA-M	843
Erik L. Dagless	
A Computer Capable of Exchanging Processors for Time	849
Arvind and Kim P. Gostelow	
Hardware Organization of a Low Level Parallel Processor	855
Shinji Tomita, Kiyoshi Shibayama, Shigeru Oyanagi and Hiroshi Hagiwara	

PROGRAMMING METHODOLOGY	
The Use of Precise Specifications in the Development of Software	861
David L. Parnas	
The Narrowing Gap Between Language Systems and Operating Systems	869
Anita K. Jones	
SYSTEMS FOR PUBLIC PLANNING AND CONTROL	
Management Information System on the Level of Hungarian Government	875
Iván Kádár and Péter Kovács	
Organization Based Structure of Financial Planning and Control Systems	879
V. P. Lane and R. A. Danes	
TECHNIQUES IN CAD—II	
How to Design Variants of Flats Using Programming Language PROLOG Based on Mathematical Logic	885
Zsuzsanna Markusz	
Algorithmic Macro Design System for Shift Registers	891
Henri G. Marchand	
LSI by CAD Out of Daisy	897
D. B. Jarvis	
NEW APPROACHES TO SYSTEMS INTEGRITY	
System Quality Through Development Audit	901
David J. Lewis	
A New Approach for Risk Analysis and Control—The UK Experience	905
K. K. Wong	
ACL—A Conversational Language for Audit Intelligence	911
H. J. Will and H. Brussel	
NUMERICAL METHODS IN MATHEMATICAL PHYSICS AND IN CONTROL THEORY	
Numerical Methods for Variational Inequalities Applications in Physics and in Control Theory	917
Jacques-Louis Lions	
Computational Aspects for a Control Problem	925
Claudia Lidia Simionescu	
FORMAL THEORIES OF PROGRAMS AND PARALLELISM	
Formalization of Concurrent Processes	929
Toshio Nishimura	
A First Order Theory of Data and Programs	939
Keith L. Clark and Sten-Åke Tärnlund	
DISTRIBUTED SYSTEMS—OPERATIONAL AND PRIVACY REQUIREMENTS	
Managerial and Economic Issues in Distributed Computing	945
James C. Emery	
Implementation of Privacy Protection Requirements	957
Rein Turn	
PROGRAMMING SYSTEMS	
Sigma 76	963
Juris Reinfelds and Carlo E. Vandoni	
Single-Language Small-Processor Systems	969
Richard G. Hamlet	
PL4—A Low Level Language with Class	975
Jean Vaucher and Normand Rochon	
CONCEPTS IN PARALLEL PROGRAMS	
Toward Autonomous Descriptions of Synchronization Modules	981
Pierre Robert and Jean-Pierre Verjus	
Laws for Communicating Parallel Processes	987
Carl Hewitt and Henry Baker	
Coroutines and Networks of Parallel Processes	993
Gilles Kahn and David B. MacQueen
