

Proceedings of the Institution of Mechanical Engineers

International Conference

Disc Brakes for Commercial Vehicles

1-2 November 1988
The Institution of Mechanical Engineers
Birdcage Walk
London

Sponsored by
Automobile Division of the Institution of Mechanical Engineers

Co-sponsored by
Institution of Road Transport Engineers
Verein Deutscher Ingenieure

Contents

C450/88	Evolution of friction materials for commercial vehicle disc brakes <i>R G East</i>	1
C451/88	Requirements of friction materials in commercial vehicle disc brake applications <i>R G McLellan</i>	9
C452/88	Friction of aramid fibre composites <i>B J Briscoe, I Ramirez and P J Tweedale</i>	15
C453/88	Some compositional effects in the static and dynamic properties of commercial vehicle disc brakes <i>J W Longley and R Gardner</i>	31
C454/88	Disc brake squeal — some factors which influence its occurrence <i>S W E Earles and P W Chambers</i>	39
C455/88	Flexural effects in commercial vehicles' disc brake pads <i>M Tirovic and J Todorovic</i>	47
C456/88	A fixed caliper disc brake for commercial vehicles up to 8 tonnes GVW <i>H-O Meier</i>	53
C457/88	Design and development of disc brakes <i>P M Bejot</i>	63
C458/88	In-wheel parking for truck disc brakes <i>H G Margetts and E C Sambrook</i>	71
C459/88	Application of air disc brakes for European high speed coaches <i>C J Pride and R L Morris</i>	79
C460/88	Different models of disc brake for buses <i>F Földes</i>	87
C461/88	Heavy duty disc brake application experience <i>E P Timoney, S G Timoney and S S Timoney</i>	97
C462/88	Improvement of the braking performance of heavy duty commercial vehicles by using disc brakes <i>E Göhring and E C von Glasner</i>	105
C463/88	Engineering disc brakes onto a light commercial vehicle <i>J McCallum</i>	115
C464/88	Disc brakes for heavy vehicles <i>E Thoms</i>	133
C465/88	Disc brake reliability, durability, maintainability and drivers' experience <i>F Mertens</i>	139
C466/88	Review of PSV brakes in the light/medium range and their needs <i>C H Curtis</i>	143
C467/88	Heavy duty disc brakes — future design parameters, based on field experience from various European applications <i>K D Mank</i>	151
