

Dual Labor Markets:

A Macroeconomic
Perspective

Gilles Saint-Paul

The MIT Press
Cambridge, Massachusetts
London, England

Contents

Foreword xi

- 1 Introduction 1**
 - 1.1 The U.S. Debate on Dual Labor Markets 2
 - 1.2 The European Debate over Labor Market Flexibility 6
 - 1.3 Are Rigidities That Bad? The Debate on Labor Market Flows and “Renovating Economies” 11
 - 1.4 Unemployment and Skills 12
 - 1.5 Required Technical Background 14

- 2 Some Technical Background 15**
 - 2.1 An Introduction to Dynamic Programming 15
 - 2.2 The Matching Function 21

- 3 The Dynamic Efficiency Wage Model 25**
 - 3.1 Presentation of the Model 26
 - 3.2 The Cost of Labor 30
 - 3.3 The Dynamics of Labor Demand 32
 - 3.4 Aspects of Commitment 37
 - 3.5 Introducing Dualism 38
 - 3.6 Conclusion 41
 - 3.7 Appendix 41

- 4 The Dual Model 45**
 - 4.1 Internal Dualism and Demand Volatility 45
 - 4.2 Introducing Internal Dualism in the Dynamic Efficiency Wage Model 46
 - 4.3 Persistent Shocks 53
 - 4.4 Conclusion 54
 - 4.5 Appendix 54

- 5 Efficiency Wages and Segmented Labor Markets: The Empirical Debate** 59
- 5.1 Competitive versus Noncompetitive Models of the Labor Market 59
- 5.2 The Debate on Interindustry Wage Differentials 60
- 5.3 Direct Evidence 62
- 5.4 Evidence on Dualism 65
- 5.5 Conclusion 68
- 6 Dualism, Labor Market Reform, and Macroeconomic Performance** 69
- 6.1 The Model 70
- 6.2 The Rigid World (Regime *A*) 72
- 6.3 Flexible Contracts Available (Regime *B*) 76
- 6.4 The Transition between the Two Regimes 80
- 6.5 Introducing Business Cycles 81
- 6.6 Empirical Evidence on the Effect of Two-Tier Systems on Labor Demand 86
- 6.7 Conclusion 90
- 6.8 Appendix: Derivation of Theoretical Results 92
- 7 Impact of Dualism on Wage Formation** 101
- 7.1 Flexible Contracts and Wage Formation 102
- 7.2 A Model of Wage Formation 103
- 7.3 Flexible Contracts and Competitive Wage Setting 109
- 7.4 The Underemployment Case with Full Job Protection 111
- 7.5 The Underemployment Case with Incomplete Job Protection 113
- 7.6 The Full-Employment Case 115
- 7.7 Impact of Flexible Contracts on the Markup 116
- 7.8 Empirical Evidence on the Effect of Two-Tier Labor Markets on Wage Formation 117
- 7.9 Conclusion and Summary 118
- 8 Dualism and Labor Market Flows** 121
- 8.1 Facts about Flows 121
- 8.2 Job Creation and Job Destruction in the Dual Model 122
- 8.3 From Job Flows to Worker Flows 127
- 8.4 Dynamic Simulations 130
- 8.5 Do Dual Labor Markets Lead to a Dual Society? 131
- 8.6 Conclusion and Summary 133

9	Skilled versus Unskilled Workers	135
9.1	The Basic Model	137
9.2	Impact of the Productivity Differential and the Skill Composition of the Population	144
9.3	The Flexible Regime and the Role of Irreversibility	150
9.4	Conclusion	158
9.5	Appendix	159
10	Human Capital Accumulation	163
10.1	The Simple Learning-by-Doing Model	163
10.2	Labor Market Rigidities and the Return to Education	166
10.3	Perspectives on Labor Market Institutions and Economic Growth	171
10.4	Political and Distributional Issues	173
10.5	Summary	175
10.6	Appendix	175
11	The Political Economy of Two-Tier Systems	177
11.1	A Simple Model of the Labor Market	179
11.2	Two-Tier Systems as a Political Implementation Device	183
11.3	The Consensus Role of Two-Tier Systems	184
11.4	Two-Tier Contracts as a Support-Building Device and the Associated Time-Consistency Problem	186
11.5	The Political Analysis of Conversion Clauses	192
11.6	Empirical Evidence on the Political Aspects of Labor Market Flexibility	197
11.7	Conclusion	198
