Contents

Preface	9
Contents and Purpose	9
Using the Book	10
Acknowledgements	11
Introduction	13
History	13
Game Theory's Method	14
No-Fat Modelling	14
This Book's Style	16
Notes	17

PART I GAME THEORY

1 The Rules of the Game	21
1.1 Basic Definitions	21
1.2 Dominant Strategies: the Prisoner's Dilemma	27
1.3 Iterated Dominance: the Battle of the Bismarck Sea	30
1.4 Nash Equilibrium: Boxed Pigs, the Battle of the Sexes, and Pure Coordination	32
1.5 Focal Points	36
Recommended Reading	37
Problem 1	37
Notes	38
2 Information	43
2.1 Introduction	43
2.2 The Normal and Extensive Forms of a Game	43
2.3 Information Sets	48
2.4 Perfect, Certain, Symmetric, and Complete Information	51
2.5 Bayesian Games and the Harsanyi Transformation	54
2.6 An Example: The Png Settlement Game	60
Recommended Reading	65
Problem 2	65

Notes	65
3 Mixed and Continuous Strategies	69
3.1 Introduction	69
3.2 Mixed Strategies: the Welfare Game	69
3.3 Chicken, the War of Attrition, and Correlated Strategies	73
3.4 Continuous Strategies: the Cournot Game	76
Recommended Reading	80
Problem 3	80
Notes	80
4 Dynamic Games with Symmetric Information	83
4.1 Introduction	83
4.2 Subgame Perfectness	83
4.3 An Example of Perfectness: Entry Deterrence I	85
4.4 Finitely Repeated Games and the Chainstore Paradox	88
4.5 Discounting	89
4.6 Infinitely Repeated Games and the Folk Theorem	91
4.7 Reputation: the One-Sided Prisoner's Dilemma	94
4.8 Product Quality in an Infinitely Repeated Game	96
Recommended Reading	99
Problem 4	100
Notes	100
5 Dynamic Games with Asymmetric Information	107
5.1 Perfect Bayesian Equilibrium: Entry Deterrence II and III	107
5.2 Refining Perfect Bayesian Equilibrium: PhD Admissions	112
5.3 The Importance of Common Knowledge: Entry Deterrence IV and V	116
5.4 Incomplete Information in the Repeated Prisoner's Dilemma: the Gang of Four Model	118
5.5 The Axelrod Tournament	119
5.6 Evolutionary Equilibrium: the Hawk-Dove Game	121
5.7 Existence of Equilibrium	123
Recommended Reading	127
Problem 5	127
Notes	128
PART II ASYMMETRIC INFORMATION	
6 Moral Hazard: Hidden Actions	133
6.1 Categories of Asymmetric Information Models	133
6.2 A Principal-Agent Model: the Production Game	136
6.3 The Self-Selection, Participation, and Competition Constraints	140
6.4 State-Space Diagrams: Insurance Games I and II	142
6.5 Optimal Contracts: the Broadway Game	147
6.6 Institutions	151
Recommended Reading	153
Problem 6	154
Notes	154

7	Moral Hazard: Hidden Information	159
7.1	Pooling vs. Separating Equilibrium, and the Revelation Principle	159
7.2	An Example: the Salesman Game	163
7.3	Efficiency Wages	166
7.4	Tournaments	167
7.5	Monitoring	168
7.6	Alleviating the Agency Problem	169
7.7	Teams, and the Groves Mechanism	170
	Recommended Reading	175
	Problem 7	175
	Notes	176
8	Adverse Selection	181
8.1	Introduction: Production Game V	181
8.2	Adverse Selection under Certainty: Lemons I and II	182
8.3	Heterogeneous Tastes: Lemons III and IV	186
8.4	Adverse Selection under Uncertainty: Insurance Game III	189
8.5	Other Equilibrium Concepts: Wilson and Reactive Equilibrium	193
8.6	Applications	195
	Recommended Reading	199
	Problem 8	199
	Notes	199
9	Signalling	205
9.1	Introduction	205
9.2	The Informed Player Moves First: Signalling	205
9.3	General Comments on Signalling in Education	210
9.4	The Informed Player Moves Second: Screening	212
9.5	Two Signals: Underpricing of Stock	218
	Recommended Reading	219
	Problem 9	221
	Notes	221

PART III APPLICATIONS

10	Bargaining	227
10.1	The Basic Bargaining Problem: Splitting a Pie	227
10.2	The Nash Bargaining Solution	229
10.3	Alternating Offers over Finite Time	231
10.4	Alternating Offers over Infinite Time	234
10.5	Incomplete Information	236
	Recommended Reading	241
	Problem 10	241
	Notes	242
11	Auctions	245
11.1	Introduction	245
11.2	Auction Classification and Private-Value Strategies	245
11.3	Comparing Auction Rules	250

11.4 Common-Value Auctions and the Winner's Curse	251
11.5 Information in Common-Value Auctions	255
Recommended Reading	256
Problem 11	256
Notes	256
12 Pricing and Product Differentiation	259
12.1 Quantities as Strategies: the Cournot Equilibrium Revisited	259
12.2 Prices as Strategies: the Bertrand Equilibrium	263
12.3 Location Models	269
12.4 An Overlapping Generations Model of Consumer Switching Costs	274
12.5 Durable Monopoly	276
Recommended Reading	280
Problem 12	280
Notes	280
13 Industrial Organization	285
13.1 Predatory Pricing: the Kreps–Wilson Model	285
13.2 Credit and the Age of the Firm: the Diamond Model	288
13.3 Entry for Buyout	290
13.4 Innovation and Patent Races	294
13.5 Takeovers and Greenmail	301
Recommended Reading	306
Problem 13	306
Notes	306
Mathematical Appendix	309
Notation	309
Glossary	311
Fixed Point Theorems	315
Answers to Problems	317
References and Citation Index	321
Subject Index	345
