CONTENTS

1.	THE ELEMENTS OF USER INTERFACE DEVELOPMENT	1
1.1	The Software Engineering Life Cycle	2
1.2	Roles	3
1.3	User Interface Life Cycle	4
1.3.1	Requirements Definition	5
1.3.2	Specifications	5
1.3.3	Implementation	6
1.4	Mobile Robot Example	9
1.5	Functional Core of the Mobile Robot Software	11
1.6	Summary	12
2.	IN SEARCH OF A DESIGN METHOD	13
2.1	An Overview of the Design Stages	13
2.2	Define the Problem	15
2.3	Model the Operator	15
2.3.1	Semantic and Syntactic Knowledge	16
2.3.2	Techniques for Identifying the Operator's Characteristics	17

2.3.3	General Classification of Operators	17
2.4	Perform Task Analysis	18
2.4.1	Task Decomposition	19
2.4.2	Task Decomposition Analysis	22
2.5	Define Computer Objects and Functions	25
2.5.1	Making Task Objects Correspond to Computer Objects	26
2.5.2	Providing General Services	31
2.5.3	Deciding Who Drives the Interaction	34
2.6	Design the User Interface	37
2.6.1	Choosing Interaction Objects	37
2.6.2	Making the System State Explicit	43
2.7	Evaluate the Design	46
2.8	Engineering Considerations	48
2.8.1	Cost and Schedule Considerations	49
2.8.2	Iterative Refinement	49
2.8.3	Configuration Management	50
2.9	Summary	52
3.	WINDOW SYSTEMS	53
3.1	Device Independence and Device Sharing	53
3.1.1	Device Independence	54
3.1.2	Window System Events	54
3.1.3	Device Sharing	55
3.1.4	Example	60
3.2	Imaging Model	61
3.2.1	Color	62
3.2.2	Pixels as an Imaging Model	63
3.2.3	PostScript	63
3.2.4	PHIGS	66
3.2.5	Fonts	67
3.3	Resource Management	69

3.4	Managing a Single Window	69
3.4.1	Resizing a Window	70
3.4.2	Shape of Windows	70
3.5	Managing Multiple Windows	72
3.5.1	Input Management	73
3.6	Multimedia	78
3.6.1	Full Motion Video	79
3.6.2	Audio	79
3.7	Human Considerations	80
3.7.1	Unselected Window Problem	80
3.7.2	Button Overload Problem	81
3.7.3	Behavior Consistency Problem	82
3.7.4	Window Tiling	83
3.7.5	The Rooms Model	83
3.8	Engineering Considerations	85
3.8.1	Software Architecture	86
3.8.2	Programming Style	89
3.8.3	Performance Issues	90
3.8.4	Evaluation Issues	91
3.9	Window System Used in the Mobile Robot	93
3.10	Future	94
3.11	Summary	96
4.	INTERACTION OBJECTS	97
4.1	Interaction Objects as Abstractions	98
4.1.1	Sample Interaction Object	99
4.1.2	Appearance and Behavior of Interaction Objects	100
4.1.3	Relationship between Interaction Objects and the Underlying Window System	112
4.2	Interaction Object Architecture	113
4.2.1	Principles of the Object-Oriented Paradigm	114

4.2.2	Architecture of the X Toolkit Intrinsic	115
4.2.3	The Benefits of the Object-Oriented Approach	118
4.2.4	The Drawbacks of the Object-Oriented Approach	119
4.2.5	Non-Object-Oriented Construction Methods	120
4.3	Composite Objects	121
4.3.1	Simple Composition	121
4.3.2	Geometry Management	123
4.3.3	Constraints	124
4.3.4	Garnet	128
4.3.5	Abstract Imaging	128
4.4	Multimedia	130
4.5	Human Considerations	132
4.5.1	Restrictions Imposed by Toolkits	132
4.5.2	Combining Different Toolkits	133
4.6	Engineering Considerations	134
4.6.1	Standardization	135
4.6.2	Customization	138
4.6.3	Application Programming Interface	138
4.6.4	Evaluation Criteria	140
4.7	Mobile Robot Example	141
4.8	Future	142
4.9	Summary	143
5.	DIALOGUE CONTROL	145
5.1	Definitions	146
5.1.1	Dialogue Controller	146
5.1.2	Application Skeletons	148
5.1.3	User Interface Generators	150
5.2	Requirements for Dialogue Controllers	151
5.2.1	Requirements for Interleaving	152
5.2.2	Requirements for the Protocol with the Functional Core: API	157

5.2.3	Support for General Services	161
5.3	Abstract Basis of Dialogue Control	165
5.3.1	Formal Grammar Models	165
5.3.2	Transition Networks	166
5.3.3	Production Systems	166
5.4	Architectural Models	167
5.4.1	Monolithic Sequential Architectures	168
5.4.2	Multiagent Architectures	169
5.5	Human Issues	184
5.6	Engineering Issues	185
5.6.1	Division of Functionality	185
5.6.2	Run-time Support	185
5.6.3	From Architectural Models to Implementation	186
5.7	Future	188
5.7.1	Cooperative Dialogue	188
5.7.2	Groupware	189
5.7.3	Multimodal Interaction	189
5.8	Summary	190
6.	USER INTERFACE MANAGEMENT SYSTEMS	191
6.1	Types of Services	191
6.1.1	Design Services	192
6.1.2	Construction Services	192
6.1.3	Evaluation Services	193
6.1.4	Maintenance Services	194
6.2	User Interface Generators	195
6.2.1	Presentation Specification Tools	195
6.2.2	Dialogue Control Specification Tools	198
6.2.3	Semantic Specification Tools	201
6.3	An Example: Serpent	204
6.3.1	Serpent's Dialogue Specification Mechanism	204
6.3.2	Serpent's Interface with the Functional Core	211

6.3.3	Serpent and Toolkits	214
6.3.4	Serpent within the Life Cycle	215
6.3.5	Serpent and Abstract Models	215
6.4	Human Issues	216
6.5	Engineering Issues	217
6.6	Future	218
6.6.1	Interdisciplinary Efforts	218
6.6.2	Improvement of Computer Science Techniques	219
6.7	Summary	219
 APPENDIX A: A SIMPLE DRAW PROGRAM USING XLIB		221
A.1	The User Interface	221
A.2	Comments	225
 APPENDIX B: A SIMPLE DRAW PROGRAM USING THE HP TOOLKit		227
B.1	The User Interface	227
B.2	Comments	232
 APPENDIX C: A SIMPLE DRAW PROGRAM USING HYPERCARD		235
C.1	The User Interface	235
C.2	Constructing the User Interface Interactively	235
C.3	Scripts	240
