

Th. Vanden Driessche (Editor)

J.-L. Guisset, G.M. Petiau-de Vries (Co-Editors)

Membranes and Circadian Rythms

With 28 Figures and 6 Tables

Springer

Contents

Preface	
<i>H. Chantrenne</i>	v
Introduction and Overview	
<i>T. Vanden Driessche</i>	1
Membrane Lipids and Circadian Rhythms in <i>Neurospora crassa</i>	
<i>G. Coté, P. Lakin-Thomas and S. Brody</i>	13
2.1 Introduction	14
2.2 Lipids and Input	16
2.3 Lipid Metabolism and the Oscillator	21
2.4 Lipids and Output	30
2.5 Lipids and Temperature Compensation	31
2.6 Conclusion	39
Membrane Glycosylation and Circadian Rhythms in Plant Systems and in Animal Normal and Transformed Systems	
<i>G. Petiau-de Vries</i>	47
3.1 Introduction	48
3.2 Glycoproteins	49
3.3 Glycolipids	56
3.4 Proteoglycans	57
3.5 Oligosaccharins	58
3.6 Calcium	58
3.7 Tumors	59
3.8 Conclusion	61
From Ultradian Biochemical Oscillations to Circadian Rhythms	
<i>A. Goldbeter</i>	67
4.1 Introduction	67
4.2 Biochemical Oscillations	69
4.3 Circadian Oscillations of the period Protein (PER) in <i>Drosophila</i>	78
4.4 Concluding Remarks	85

Cross-talk Between Clocks: Regulation of Cell Division Cycles by Circadian Oscillators

<i>L. Edmunds, Jr.</i>	95
5.1 Introduction	97
5.2 Coupling between Oscillator and Cell Cycle: Role of Cyclic AMP	101
5.3 Problems and Prospects: Interface with the Cyclin Clock	115

Membrane Transport and Oscillations in Plants

<i>F. Homblé</i>	125
6.1 Introduction	125
6.2 The Plasma Membrane H ⁺ -ATPase	126
6.3 Ion Channels	127
6.4 Temporal Oscillations	128
6.5 Spatial Oscillations	133
6.6 Conclusion	134

Circadian Rhythms and Photoperception in Plants: The Role of Red Light and Blue Light

<i>H. Asard and R. Caubergs</i>	139
7.1 Introduction: plants and light (with exclusion of photo-synthesis)	140
7.2 Phytochrome	141
7.3 Blue light	143
7.4 Blue light perception and the plasma membrane	147
7.5 Is there a role for free flavins in blue light perception?	151
7.6 Conclusion	152

Temporal Variations in Tissular and Plasma Protein Binding of Drugs with Special Reference to their Erythrocyte Penetration as Mechanisms Involved in Chronopharmacological Effects

<i>B. Bruguerolle</i>	159
8.1 Introduction	160
8.2 Temporal variations in plasma protein binding of drugs	160
8.3 Temporal variations in tissular drug binding	164
8.4 Penetration of drugs into erythrocytes as a tool for the study of temporal variation in the passage of drugs through membranes	165
8.5 Chronopharmacological mechanisms at receptor sites	166
8.6 Conclusions	167

Photosynthesis: a Post-Transcriptionally Regulated Circadian Rhythm in Some Lower Eukaryotes

<i>T. Vanden Driessche</i>	171
9.1 Introduction	172
9.2 Circadian Rhythmicity Regulated at Post-Transcriptional Level	173

9.3	The Support of the Circadian Rhythm in Photosynthesis in three Unicellular Organisms	175
9.4	Final Remarks and Conclusions	182
Circadian Rhythms, Membranes and Susceptibility to Environmental Factors		
	<i>E. Wagner, S. Kiefer, C. Penel, J. Norman, S. Ruiz-Fernandez, M. Bonzon and H. Greppin</i>	187
10.1	Introduction	188
10.2	Experimental Evidence	189
10.3	Conclusions	196
The Plasma Membrane of <i>Acetabularia</i> : an Integrating Function Regulated by Circadian Rhythmicity		
	<i>T. Vanden Driessche, J-L. Guisset and G. Petiau-de Vries</i>	201
11.1	Introduction	202
11.2	Basic Rhythmic Activity of the Plasma Membrane	204
11.3	The Plasma Membrane Photoreceptor	206
11.4	The Plasma Membrane NADP(H)-Oxido-Reductase	208
11.5	The Peroxidase/Ascorbic Acid System	209
11.6	The Phytohormone Receptors	210
11.7	The Insulin Receptor. Its Role in <i>Acetabularia</i>	213
11.8	Discussion and Conclusion	214
	Subject Index	221
