Edited by G. I. Marchuk

Fachbereich Mathematik
Technische Hochschule Darmstadt
Inv.-Nr. B 14734

Springer-Verlag
Berlin · Heidelberg · New York 1975

TABLE OF CONTENTS

SYSTEM MODELLING AND IDENTIFICATION

Identification - Inverse Problems for Partial Differential Equations: A Stochastic Formulation - A. V. Balakrishnan 1

Key Problems in the Theory of Centralized Interaction of Economic Systems - K. A. Bagrinovsky 13

Some Statements and Ways of Solving Dynamic Optimization Problems under Uncertainty - L. S. Belyaev 18

A New Algorithm for Gauss Markov Identification - A. Benveniste, P. Bernhard, J. Chatelon, G. Cohen 22

On Optimality Criteria in Identification Problems - I.S. Durgarian, N.S. Rajbman 28

Nonstationary Processes for Mathematical Programming Problems under the Conditions of Poorly Formalized Constraints and Incomplete Defining Information - I.I. Eremin, V.D. Zhjanov 37

Dynamic Models of Technological Changes - L. V. Kantorovich, V.I. Zhjanov 42

Identification and Control for Linear Dynamic Systems of Unknown Order - A. V. Medvedev 48

Group Choice and Extremal Problems in the Analysis of Qualitative Attributes - B. G. Mirkin 56

Studies in Modelling and Identification of Distributed Parameter Systems - L. Le Letty 62

Recursive Solutions to Indirect Sensing Measurement Problems by a Generalized Innovations Approach - E. Mosca 86

A System of Models of Output Renewal - N. B. Mironosetskii 98

Bilinear Social and Biological Control Systems - R. R. Mohler 103

A Problem from the Theory of Observability - M. S. Nikolskii 111

Some Questions of the Modelling of Complex Chemical Systems -
G. M. Ostrovskij, Yu. M. Volin 116

Evaluation Model of Humanistic Systems by Fuzzy Multiple Integral and Fuzzy Correlation -
E. Tazaki, M. Amagasa 121

Penalty Function Method and Necessary Optimum Conditions in Optimal Control Problems with Bounded State Variables -
Yu. M. Volin 128

OPTIMAL CONTROL

Multilevel Optimal Control of Interconnected Distributed Parameter Systems -
M. Amouroux, J.P. Babary, B. Pradin, A. Titli 134

Time Optimal Control Problem for Differential Inclusions -
V.I. Blagodatskih 147

Application of Maximum Principle for Optimization of Pseudo-Stationary Catalytic Processes with Changing Activity -
V.I. Bykov, M.G. Slin'ko, G.S. Yablonskii 153

Approximate Solution of Optimal Control Problems Using Third Order Hermite Polynomial Functions -
E.D. Dickmanns, K.H. Well 158

Optimal Stabilization of the Distributed Parameter Systems -
A.I. Egorov 167

About one Problem of Synthesis of Optimum Control by Thermal Conduction Process -
A.I. Egorov, G.S. Bachoi 173

About the Problem of Synthesis of Optimum Control by Elastic Oscillations -
A.I. Egorov, M. Rakhimov 179

On the Partitioning Problem in the Synthesis of Multilevel Optimization Structures -
G. Grateloup, M. Richetin 184

On the Problem of an Optimal Three-Dimensional Aircraft Motion -
V.K. Isaev, L.I. Shustova, V.V. Sonin 193

A General Stochastic Equation for the Non-Linear Filtering Problem -
G. Kallianpur 198

On Sufficiency of the Necessary Optimality of L.S. Pontryagin's Maximum Principle Analogues Type -
V.V. Leonov 205

On Final Stopping Time Problems -
J.L. Menaldi, E. Rofman 210

Equilibrium and Perturbations in Plasma-Vacuum Systems -
C. Mercier 212

Sufficient Conditions for Absolute Minimum of the Maximal Functional in the Multi-Criterial Problem of Optimal Control -
V.V. Velichenko 220

Stratified Universal Manifolds and Turnpike Theorems for a Class of Optimal Control Problems -
L.F. Zelikina 226

MATHEMATICAL PROGRAMMING AND NUMERICAL ALGORITHMS

On the Numerical Approximation of Problems of Impulse Controls -
J.L. Lions 232

Satisficing -
R. Radner 252

On Approximate Solution of the Problem with Point and Boundary Control -
V.V. Alifyorov, Y. Kaimkulov 264

A-Stable Method for the Solution of the Cauchy Problem for Stiff Systems of Ordinary Differential Equations -
S.S. Artem´ev, G.V. Demidov 270

Some Methods for Numerical Solution of Optimal Models in Spatial-Production Planning -
A.E. Bakhtin 275

An Extension of the Method of Feasible Directions -
E. Blum, W. Oettli 280

A Numerical Method for Solving Linear Control Problems with Mixed Restrictions on Control and Phase Coordinates -
V.I. Charny 284

Dual Direction Methods for Function Minimization -
Yu.M. Danilin 289

Implementation of Variable Metric Methods for Constrained Optimization Based on an Augmented Lagrangian Functional -
N.H. Engersbach, W.A. Gruver 294

Limit Extremum Problems -
Yu.M. Ermol´ev, E.A. Nurminskiy 303

Algorithms for Solving Non-Linear Programming Problems -
Yu.G. Evtushenko 308

Structural Optimization -
C. Fleury, B. Fraeijs de Veubeke 314

On the Solution of a Class of Non-Linear Dirichlet Problems by A Penalty-Duality Method and Finite Elements of Order One -
R. Glowinski, A. Marrocco 327

Adaptive Monte Carlo Method for Solving Constrained Minimization Problem in Integer Non-Linear Programming -
M. Ichimura, K. Wakimoto 334

Application of the Quadratic Minimization Method to the Problem of Simulated System Characteristics Representation -
V.K. Isaev, V.V. Sonin 343

Mathematical Programming Approach to a Minimax Theorem of Statistical Discrimination Applicable to Pattern Recognition -
K. Isii, Y. Taga 348

Penalty Methods and Some Applications of Mathematical Programming -
A.A. Kaplan 353

Numerical Analysis of Artificial Enzyme Membrane-Hysteresis, Oscillations and Spontaneous Structuration -
J.P. Kernevez, D. Thomas 359

The Stability of Optimal Values in Problems of Discrete Programming -
V.R. Khachaturov 372

Optimal Control with Minimum Problems and Variational Inequalities -
R. Kluge 377

Dual Minimax Problems -
P.J. Laurent 383

On the Type of a Polynomial Relative to a Circle -
An Open Problem -
J.J.H. Miller 394

On Bayesian Methods for Seeking the Extremum -
J. Močkus 400

Riemannian Integral of Set-Valued Function -
E.S. Polovinkin 405

Characteristics of Saturation of the Class of Convex Functions -
G.S. Rubinstein 411

A New Heuristic Method for General Mixed Integer Linear Programs: A Report on Work in Progress (Abstract)
R.W. Rutledge 417

THEORY OF GAMES

Closed-Loop Differential Games -
N. N. Krasovskii 422

A Programmed Construction for the Positional Control -
V. D. Batuhtin 435

An Extremal Control in Differential Games -
A. G. Chentsov 440

Some Differential Games with Incomplete Information -
F. L. Chernousko, A. A. Melikyan 445

Some Properties of Nonzero-Sum Multistage Games -
J. Doležal 451

Equilibrium Situations in Games with a Hierarchical Structure of the Vector of Criteria -
Yu. B. Germeier, I. A. Vatel 460

A Class of Linear Differential Evasion Games -
N. L. Grigorenko 466

Analytical Study of a Case of the Homicidal Chauffeur Game Problem -
C. Marchal 472

An Informational Game Problem -
Yu. S. Osipov 482

The Pursuit Game with the Information Lack of the Evading Player -
L. A. Petrosjan 487

On Constructing Invariant Sets in Linear Differential Games -
G. Sonnevend 493

A Non-Cooperative Game in a Distributed Parameter System -
J. P. Yvon 502
