# Multicycle Generalization of Relaxation-Based Algorithms for Circuit and System Simulation

# Contents

<b>1. Introduction</b>	<b>1</b>
<b>2. Relaxation-Based Techniques and the Convergence Problem</b>	<b>5</b>
2.1. Direct and relaxation-based algorithms for circuit analysis.....	5
2.2. Solution of algebraic equations by relaxation methods.....	10
2.3. Relaxation-based methods to solve the dynamic circuit equations.....	16
2.4. The ways to accelerate the convergence of relaxation-based methods and positioning the problem.....	24
<b>3. The Construction of Multicycle Iterative Algorithm to Solve Linear Systems of Circuit Equations</b>	<b>29</b>
3.1. Multicycle generalization of a basic iterative algorithm.....	29
3.2. Multicycle iterative algorithm with damping.....	35
3.3. The canonical form of multicycle iterative algorithm and its equivalent circuit representation.....	43
3.4. Summary.....	50
<b>4. Implementation of Multicycle Iterative Algorithms</b>	<b>52</b>
4.1. MIA with fixed number of internal iterations.....	52
4.2. Optimization of MIA for the total number of iterations.....	58
4.3. Displaced and nondisplaced MIA.....	63
4.4. Summary.....	77
<b>5. Multicycle Iterative Algorithms for Nonlinear Circuit Analysis</b>	<b>79</b>
5.1. The canonical structure of MIA in nonlinear case.....	79
5.2. Convergence of MIA applied to a system of nonlinear algebraic equations.....	83
5.3. Examples of MIA's application to nonlinear circuit analysis...	85
5.4. Summary.....	92
<b>6. Multicycle Generalization of Waveform Relaxation Method</b>	<b>93</b>
6.1. The canonical description of the multicycle waveform relaxation (MWR) iterations.....	93

6.2. The convergence of the multicycle waveform relaxation method.....	101
6.3. Examples of MWR applied to the transient circuit analysis....	104
6.4. Summary.....	109
<b>7. The Multicycle and the Modified Coupling Approach in Circuit and System Simulation</b>	<b>112</b>
7.1. The multicycle techniques and the coupling patterns.....	112
7.2. The use of <i>I</i> -type coupling patterns in the decomposed circuit.....	112
7.3. Generalized coupling and suppressing the local feedback in the decomposed circuit.....	126
7.4. Generalized coupling and the multicycle approach in the mixed system simulation.....	139
7.5. Summary.....	147
<b>8. Conclusion</b>	<b>148</b>
<b>References</b>	<b>150</b>
