PIPELINE DESIGN FOR WATER ENGINEERS

DAVID STEPHENSON

ELSEVIER SCIENTIFIC PUBLISHING COMPANY
Amsterdam - Oxford - New York 1976

Bibliothek

INSTITUT FÜR WASSERBAU
UND WASSERWIRTSCHAFT
TECHNISCHE UNIVERSITÄT DARMSTADT
PETERSENSTR. 13, 64267 DARMSTADT
Tel. 0 61 51 / 16 21 43 - Fax: 16 32 49

CONTENTS

- 1 ECONOMIC PLANNING, 1
 - Introduction, 1
 - Pipeline economics, 2
 - Basics of economics, 6
 - Methods of analysis, 8
 - Uncertainty in forecasts, 8
 - Balancing storage, 11

- 2 HYDRAULICS, 13
 - The fundamental equations of fluid flow, 13
 - Flow-head loss relationships, 14
 - Conventional flow formulae, 14
 - Rational flow formulae, 16
 - Non-circular cross sections, 20
 - Partly full pipes, 22
 - Minor losses, 24

- 3 PIPELINE SYSTEM ANALYSIS AND DESIGN, 27
 - Network analysis, 27
 - Equivalent pipes for pipes in series or parallel, 27
 - The loop method for analysing networks, 28
 - The node method for analysing networks, 29
 - Alternative methods of analysis, 30
 - Optimization of pipeline systems, 33
 - Dynamic programming for optimizing compound pipes, 34
 - Transportation programming for least cost allocation of resources, 37
 - Linear programming for design of least cost open networks, 40
 - Steepest path ascent technique for extending networks, 44
 - Design of looped networks, 47

- 4 WATER HAMMER AND SURGE, 53
 - Rigid water column surge theory, 53
 - Elastic water hammer theory, 54
 - Method of analysis, 56
 - Effect of friction, 58
 - Protection of pumping lines, 60
 - Pump inertia, 62
 - Pump bypass reflux valve, 65
 - Surge tanks, 66
 - Discharge tanks, 67
 - Air vessels, 73
 - In-line reflux valves, 77
 - Release valves, 78
 - Choice of protective device, 80

- 5 INTRODUCTION TO SOLIDS PIPING, 84
- Introduction, 84
 - Flow regimes, 84
 - Heterogeneous flow conditions, 85
 - Head losses, 85
 - Minimum head loss velocity, 87
 - Critical deposit velocity, 87
 - Drag coefficient and effect of particle size, 88
 - Transport in vertical pipes, 89
 - Transport in inclined pipes, 90
 - Homogeneous slurries, 90
 - Pipe abrasion and particle attrition, 91
 - Economics, 91
 - Transport in containers, 93
- 6 EXTERNAL LOADS, 96
- Soil loads, 96
 - Trench conditions, 96
 - Embankment conditions, 99
 - Superimposed loads, 102
 - Traffic loads, 103
 - Stress caused by point loads, 103
 - Line loads, 104
 - Uniformly loaded areas, 104
 - Effect of rigid pavements, 105
 - Bending and deformation of circular pipes under load, 106
 - Effect of lateral support, 108
- 7 CONCRETE PIPES, 112
- The effect of bedding, 112
 - Prestressed concrete pipes, 114
 - Circumferential prestressing, 115
 - Circumferential prestress after losses, 116
 - Circumferential stress under field pressure, 117
 - Longitudinal prestressing, 118
 - Longitudinal stresses after losses, 120
 - Properties of steel and concrete, 121
- 8 STEEL AND FLEXIBLE PIPE, 126
- Internal pressures, 126
 - Stiffening rings, 127
 - Tension rings to resist internal pressure, 127
 - Stiffening rings to resist buckling under external load, 130
 - Allowance for circumferential bending, 132
- 9 SECONDARY STRESSES, 139
- Stresses at branches, 139
 - Crotch plates, 139
 - Internal bracing, 142
 - Stresses at bends, 150

The pipe as a beam, 151
 Longitudinal bending, 151
 Pipe stress at saddles, 152
 Ring girders, 153
 Temperature stresses, 153

10 PIPES, FITTINGS AND APPURTENANCES, 156

Pipe materials, 156
 Steel pipe, 156
 Cast iron pipe, 156
 Asbestos cement pipe, 157
 Concrete pipe, 157
 Plastic pipe, 157
 Line valves, 158
 Sluice valves, 159
 Butterfly valves, 160
 Globe valves, 160
 Needle and control valves, 161
 Spherical valves, 162
 Reflux valves, 162
 Air valves, 162
 Air vent valves, 163
 Air release valves, 164
 Thrust blocks, 165
 Flow measurement, 169
 Venturi meters, 169
 Nozzles, 170
 Orifices, 170
 Bend meters, 171
 Mechanical meters, 171
 Electromagnetic induction, 172
 Mass and volume measurement, 172
 Telemetry, 172

11 LAYING AND PROTECTION, 175

Selecting a route, 175
 Laying and trenching, 175
 Thrust bores, 177
 Pipe bridges, 179
 Underwater pipelines, 179
 Joints and flanges, 180
 Coatings, 184
 Linings, 185
 Cathodic protection, 186
 Galvanic corrosion, 186
 Stray current electrolysis, 189
 Thermal insulation, 190

12 SEWERS, 195

Design criteria, 195
 Construction, 196
 Access and ventilation, 199
 Corrosion, 200
 Computer grading, 201

GENERAL REFERENCES AND STANDARDS, 202

APPENDIX, 210

Symbols for pipe fittings, 210
Properties of pipe shapes, 211
Properties of water, 212
Properties of pipe materials, 213
Conversion factors, 214

AUTHOR INDEX, 215

SUBJECT INDEX, 217
