Preface *xi*

Acknowledgments *xiii*

1. Historical Background: Expected Utility *1*
   - 1.1 Daniel Bernoulli and Gabriel Cramer *1*
   - 1.2 Riskless Utility in Economics *3*
   - 1.3 von Neumann and Morgenstern *6*
   - 1.4 The Linear Utility Theorem *9*
   - 1.5 Alternative Axioms for Linear Utility *15*
   - 1.6 Risk Attitudes *17*
   - 1.7 Multiattribute Linear Utility *20*
   - 1.8 Extensions for Probability Measures *21*
   - 1.9 Summary *24*
2. Critique of Expected Utility *25*
   - 2.1 Normative versus Descriptive Theory *25*
   - 2.2 Framing Effects *26*
   - 2.3 Money *30*
   - 2.4 Probability Transformations, Probability Preferences *34*
   - 2.5 Independence and the Certainty Effect *36*
   - 2.6 Vagueness and Nontransitive Indifference *40*
   - 2.7 Preference Cycles and Money Pumps *42*
   - 2.8 The Preference Reversal Phenomenon *44*
   - 2.9 Non-Archimedean Preferences *46*
   - 2.10 Summary *47*
3. Generalizations of Expected Utility *49*
   - 3.1 Alternatives to Expected Utility *49*
   - 3.2 Relaxations that Preserve Linearity *52*

3.3 Allais's Nonlinear Intensity Theory *54*
3.4 Smooth Preferences *55*
3.5 Decumulative Representations *56*
3.6 Weighted Utility Theory *61*
3.7 Transitive Convexity *66*
3.8 Nontransitive Convexity *67*
3.9 SSB Utility Theory *68*
3.10 Accommodation of Independence Violations *70*
3.11 Intransitivity Accommodation *74*
3.12 Summary *77*

4. Nontransitive Nonlinear Utility Theory *79*
4.1 The SSB Theorem *79*
4.2 Preliminary Lemmas *80*
4.3 Nontransitive Convex Utility *85*
4.4 Further Implications of C1 and C2 *89*
4.5 Implications of Symmetry *93*
4.6 Partial Construction of ϕ *100*
4.7 Proof Completion *106*
4.8 Extension for Probability Measures *111*

5. Transitive Nonlinear Utility Theory *115*
5.1 Transitive Convex Utility *115*
5.2 The Need for Countable Boundedness *117*
5.3 Weighted Linear Utility *122*
5.4 Sufficiency Proof *125*
5.5 Weighed Linear Uniqueness *131*
5.6 Equivalent Axiom Sets *133*
5.7 Extension for Probability Measures *135*

6. Applications for Choice Theory and Risk *136*
6.1 von Neumann's Minimax Theorem *136*
6.2 Choice with Cyclic Preferences *137*
6.3 Social Choice Lotteries *139*
6.4 Choice among Choice Contexts *141*
6.5 Nash Equilibria in Noncooperative Games *144*
6.6 Multiple Attributes *146*
6.7 Mean Value and Certainty Equivalence *149*
6.8 Stochastic Dominance *152*
6.9 Risk Attitudes *155*

7. Additive Expected Utility *158*
- 7.1 Decision under Uncertainty *158*
- 7.2 Additive Subjective Probability *161*
- 7.3 Proof of Savage's Probability Theorem *164*
- 7.4 Additive Expected Utility *168*
- 7.5 Comments on Savage's Representation Proof *173*
- 7.6 Additive Linear Utility *176*
- 7.7 Additive Linear Utility Proofs *178*
- 7.8 Summary *185*

8. Generalizations of Additive Expected Utility *187*
- 8.1 Critique of Additive Expected Utility *187*
- 8.2 Nonadditive Subjective Probability *190*
- 8.3 Generalizations of Additive Expected Utility *193*
- 8.4 Additive Nonexpected Intensive Utility *194*
- 8.5 Expected Regret Theory *195*
- 8.6 SSA Utility Theory *197*
- 8.7 Additive SSB Utility *198*
- 8.8 Nonadditive Linear Utility *199*
- 8.9 Nonadditive Expected Utility *201*
- 8.10 Nonadditive Biexpected Utility *202*
- 8.11 Nonadditive, Nontransitive Theories *204*
- 8.12 Summary *207*

9. Additive Nontransitive Nonlinear Utility *208*
- 9.1 Skew-Symmetric Additive Utility *208*
- 9.2 SSA Utility Proof *210*
- 9.3 Extension for Nonsimple Acts *215*
- 9.4 Additive SSB Utility *217*
- 9.5 Additive SSB Proofs *223*
- 9.6 Additive SSB Extension *228*
- 9.7 Extension Proofs *229*
