

Fakultät Bauingenieurwesen

Institut für Wasserbau
und Technische Hydromechanik

Dresdner Wasserbauliche Mitteilungen, Heft 19

Seleshi Bekele Awulachew

**Investigation of Water Resources Aimed at
Multi-Objective Development with Respect to
Limited Datat Situation: The Case of Abaya-
Chamo Basin, Ethiopia**

Untersuchung der Wasserressourcen für eine Mehrzwecknutzung
bei beschränkter Datengrundlage: Dargestellt am Beispiel des
Abaya-Chamo Einzugsgebiets, Äthiopien

Der Titel und der Inhalt dieses Heftes entsprechen der zur Erlangung
des akademischen Grades Doktor Ingenieur (Dr.-Ing.) an der Fakultät
Bauingenieurwesen der Technischen Universität Dresden eingereichten
und genehmigten Dissertation von M.Sc. Seleshi Bekele Awulachew.

Rigorosum und Verteidigung:

15.03.2001

Vorsitzender der Promotionskommission:

Univ. Prof. Dr.-Ing. habil. P. Ruge

TU Dresden

Gutachter:

Univ. Prof. Dr.-Ing. habil. H. B.-Horlacher

TU Dresden

Univ. Prof. Dr.-Ing. habil. H. Martin

TU Dresden

Prof Dr.-Ing. G. Förch

RODECO, Addis Abeba/Univ. Siegen

| Contents | Page |
|---|-------------|
| Abstract | i |
| Acknowledgment | iii |
| Preface | iv |
| Contents | v |
| Abbreviations | viii |
| | |
| 1 Introduction | 1 |
| 1.1 Statement of the Problem | 1 |
| 1.2 The Major Goals of the Research | 1 |
| 1.3 Methodology of Research, Organization, and Reporting | 3 |
| | |
| 2 General Physiographic and Hydrologic Characteristics | 5 |
| 2.1 General Physiographic and Hydrologic Characteristics of Ethiopia | 5 |
| 2.2 General Characteristics of Area Under Investigation | 7 |
| 2.3 Settlement Characteristics in the Basin and Derivation of Population Data | 9 |
| 2.4 Socio-economic Situation and Infrastructure of the Basin | 10 |
| | |
| 3 Development of Physical Hydrological Characteristics and Digital Information System Coupling GIS and Hydrological Model | 11 |
| 3.1 General | 11 |
| 3.2 Conceptual Set-up of the Study Basin | 11 |
| 3.3 The Use of GIS and Hydrologic Modeling for Drainage Analysis | 13 |
| 3.4 Manual Basin Delineation and Generation of Digital Line Graph (DLG) | 14 |
| 3.5 Digital Terrain Modeling to Delineate Basin Physical Characteristics of ACB | 15 |
| 3.6 Basin Hydrological Parameters | 20 |
| | |
| 4 Investigation and Development of Physical Morphometric Characteristics and Capacities of Abaya and Chamo Lakes | 25 |
| 4.1 General | 25 |
| 4.2 Bathymetry Survey | 25 |
| 4.3 Bathymetry Survey Database and Generation of Digital Data | 26 |
| 4.4 Computation of Lake Parameters | 30 |
| 4.5 Limitations of Application and Summary | 33 |
| | |
| 5 Database Development and Analysis of Meteorological and Physical Data | 37 |
| 5.1 General | 37 |
| 5.2 Development of Meteorological Database of the Study Area | 38 |
| 5.3 Physical Data and GIS | 38 |

| | | |
|------------|---|-----|
| 5.4 | Meteorological Data Processing and Analysis Result | 40 |
| 6 | Runoff, Flood and Other Water Resources Data and Analysis | 59 |
| 6.1 | General | 59 |
| 6.2 | Runoff Data and Processing (Data Base, Inventory and Filling, Screening) | 59 |
| 6.3 | Regional Regression Based Equations and the Need for Rainfall-Runoff Model | 63 |
| 6.4 | Regional Flood and Flood Frequency Analysis | 66 |
| 6.5 | Other Water Resources Data of the Study Area | 75 |
| 7 | Monthly Water Balance Model for Runoff Prediction | 79 |
| 7.1 | Introduction | 79 |
| 7.2 | Model Structure and Parameters | 80 |
| 7.3 | Numerical Procedure | 83 |
| 7.4 | Model Parameter Estimation | 84 |
| 7.5 | Short Descriptions on the Computer Program | 85 |
| 7.6 | Model Calibration | 88 |
| 7.7 | Model Evaluation | 92 |
| 7.8 | Applications | 95 |
| 7.9 | Factors affecting the Model Performance and Limitations | 96 |
| 8 | Guidelines for Computation of Selected Parameters in Hydrologic and Hydraulic Design of Water Resources Development | 99 |
| 8.1 | Introduction | 99 |
| 8.2 | Procedure for Runoff Data Computation and Analysis at a Project Site | 99 |
| 8.3 | Guideline Procedure for Flood Magnitude Estimation in ACB | 102 |
| 8.4 | Procedure for Reservoir Planing in Cases of Storage Requirement | 104 |
| 8.5 | The Need for and Preliminary Guide for Standardized Design Procedures and Parameters for Storage and Diversion Head Work Control Structures | 108 |
| 8.6 | Guideline Procedure for Estimating Water Demand or Potential Assessment | 109 |
| 9 | Existing Water Resources Use, Demand and Potential Assessment | 115 |
| 9.1 | General | 115 |
| 9.2 | Review of Existing Uses | 115 |
| 9.3 | The Water Resources Development Need | 120 |
| 9.4 | Demand Assessment, Potentials and Alternatives for Domestic, Livestock or Municipal and Industrial Water Supply | 122 |
| 9.5 | Irrigation Potential and Water Demand Assessment | 124 |
| 9.6 | Hydropower Potential Assessment in ACB | 127 |
| 9.7 | The Need for Integrated Planning for Single and Multi-Purpose Development | 128 |
| 10 | Water Balance Model of the Lakes and Impact Assessment | 131 |
| 10.1 | General | 131 |

| | | |
|-----------|---|------------|
| 10.2 | Water Balance Model Equations and Solution Procedures | 131 |
| 10.3 | Water Depth-Area-Storage Relationship | 135 |
| 10.4 | Lake Level Data and Analysis | 135 |
| 10.5 | Surface Inflow Computation and Magnitudes | 139 |
| 10.6 | Surface outflow | 143 |
| 10.7 | Subsurface Inflow and Outflow | 144 |
| 10.8 | Lake's Rainfall and Evaporation | 144 |
| 10.9 | Calibration of Simulation Parameters and Results | 148 |
| 10.10 | Evaluation of Major Impacts on the Lakes | 156 |
| 10.11 | Suggested Measures for Sustainability Under Water Use and Conclusions | 163 |
| 11 | Summary and Conclusion | 165 |
