Contents

List of Figures ix
Preface xi
Acknowledgments xix

Part 1
INTRODUCTION
Chapter I. Operating Systems

1. Resource Management 3
2. Virtual Machines 4
3. Software Layers 7
4. Operating System Types 10

Part 2
PROCESSOR MANAGEMENT
Chapter II. Multiprocessing Issues

1. Definitions 23
2. Mutual Exclusion 26
3. Serialization 31
4. Synchronization 32
5. High-level Mechanisms 42
6. Deadlocks 51

Chapter III. Multiprogramming Issues

1. Processor State Description 64
2. Multiprogramming 65
3. Scheduling 71
4. Algorithms 75

Part 3
INPUT/OUTPUT MANAGEMENT
Chapter IV. Device Control

1. I/O Control 86
2. Device Control 87
3. Device Sharing 88
4. Device Synchronization 89
5. Device Buffering 95
6. Device Scheduling 97

Part 4
MEMORY MANAGEMENT
Chapter V. Main Memory Management

1. Address Interpretation 103
2. Space Allocation 110

Chapter VI. Multi-Level Memory Management

1. Explicit Swapping of Contiguous Segments 117
2. Demand Paging of Blocked Segments 118
3. Virtual Memory 122
4. Engineering Issues 137

Part 5
HIGH-LEVEL MECHANISMS
Chapter VII. File Management

1. Introduction 147
2. Naming Function: Catalog Structures 148
3. Addressing Function 155
4. File Access Mechanisms 156
5. File Backup 165
6. Disk Management for Data Integrity 168

Chapter VIII. Addressing and Naming

1. Linking 178
2. Linkers 183
3. Linking in Practice 189
4. Naming and Addressing Synthesis 191

Chapter IX Protection and Security

1. Assets and Threats 197
2. Non-technical Protection 198
3. Technical Protection Objectives 199
4. Technical Protection Means 200
5. Peripheral Protection 201
6. Central Protection 208

Part 6
SYNTHESIS

Chapter X. System Design

1. System Interface 233
2. System Organization 237

Bibliography 249

Glossary 259

Index 261
