

Reliability of Unreinforced Masonry Bracing Walls

**Probabilistic Approach
and Optimized Target Values**

Dem Fachbereich Bauingenieurwesen und Geodäsie
der Technischen Universität Darmstadt
zur Erlangung des akademischen Grades eines
Doktor-Ingenieurs (Dr.-Ing.)
vorgelegte

DISSERTATION

von

Dipl.-Ing. Eric Brehm

aus
Seeheim-Jugenheim / Hessen

D 17

Darmstadt 2011

Referent: Prof. Dr.-Ing. Carl-Alexander Graubner

Korreferent: Prof. Marc A. Maes, PhD

Table of Contents

Notation and Abbreviations.....	V
1 Introduction	1
1.1 Motivation and Goal	1
1.2 Thesis Organization	3
2 Basics of Reliability Analysis.....	5
2.1 General	5
2.2 Introduction.....	5
2.3 Stochastic Modelling of Random Variables	6
2.3.1 Mutual Distributions in Typical Engineering Problems	6
2.3.2 Stochastic Moments	7
2.4 Parameter Estimation	9
2.4.1 General	9
2.4.2 Method of Moments	9
2.4.3 Maximum Likelihood.....	10
2.4.4 Bayes' Theorem	12
2.5 Structural Reliability.....	16
2.5.1 General Idea and History of Reliability Analysis	16
2.5.2 Limit States and Basic Variables	18
2.5.3 Methods of Analysis.....	22
2.5.3.1 General	22
2.5.3.2 Mathematical Exact Approaches	22
2.5.3.3 Simplified Approaches.....	24
2.6 Target Reliability and Risk-Based Optimization.....	25
2.6.1 General	25
2.6.2 Optimization of the Target Reliability	25
2.6.3 Societal Risk Acceptance and Life Quality Index	29
2.6.4 Classification of Failure Consequences	31
2.6.5 Target Reliability in the Literature.....	32
2.7 Safety Concepts in Structural Design	33

2.8	Summary	34
3	Loads on Masonry Shear Walls	37
3.1	Introduction	37
3.2	Methods for the Stochastic Modelling of Load Actions	37
3.3	Dead Load	41
3.4	Live Load	44
3.5	Wind Load.....	48
3.6	Model Uncertainty in the Determination of the Load Effects	52
3.7	Summary	54
4	'Load-Carrying Behaviour and Material Properties of Masonry.....	55
4.1	General	55
4.2	Typology	55
4.3	Load-Carrying Capacity of Masonry Subjected to Axial Compression	57
4.4	Load-Carrying Capacity of Masonry Subjected to In-Plane Loads	60
4.4.1	General	60
4.4.2	Load-Carrying Behaviour and Failure Modes.....	60
4.5	Material Properties	63
4.5.1	General	63
4.5.2	Compressive Strength of the Unit	64
4.5.3	Compressive Strength of Mortar	66
4.5.4	Compressive Strength of Masonry	67
4.5.4.1	General	67
4.5.4.2	Experimental Determination of the Compressive Strength of Masonry	67
4.5.4.3	Analytical Prediction of the Compressive Strength of Masonry	68
4.5.5	Tensile Strength of Units.....	72
4.5.6	Cohesion and Friction Coefficient	76
4.6	Summary	78
5	Prediction of the Load-Carrying Capacity	81
5.1	General	81
5.2	Notation.....	82

5.3	Classical Beam Theory	82
5.3.1	Pre-Assumptions and Structural System	82
5.3.2	Tip over of the Entire Wall	84
5.3.3	Flexural Failure	84
5.3.4	Shear Capacity.....	85
5.3.4.1	Historical development	85
5.3.4.2	Shear Model according to <i>Mann & Müller</i> (1973)	88
5.3.4.3	Shear Model according to <i>Jäger & Schöps</i> (2004).....	91
5.3.4.4	Shear Model according to <i>Kranzler</i> (2008)	94
5.4	Plastic Limit Analysis	95
5.5	Design models.....	97
5.5.1	Notation	97
5.5.2	Design Model according to DIN 1053-1 and DIN 1053-100.....	97
5.5.3	Design Model according to DIN EN 1996-1-1/NA	103
5.5.4	Comparison of DIN 1053-1, -100 and DIN EN 1996-1-1/NA	107
5.5.5	Design Model according to SIA 866.....	112
5.6	Assessment and Model Uncertainties	113
5.6.1	General	113
5.6.2	Test Data	113
5.6.3	Comparison and Assessment.....	115
5.6.4	Determination of Model Uncertainties.....	119
5.7	Summary	121
6	Reliability of URM walls Subjected to In-Plane Shear.....	123
6.1	Introduction.....	123
6.2	General	123
6.3	Structural System	125
6.4	Masonry Members to be Examined	126
6.5	Design Check	127
6.6	Reliability Analysis.....	128
6.6.1	General	128

6.6.2	Limit State Function and Probability of Failure.....	128
6.6.3	Stochastic Model	131
6.6.4	Method of Analysis	132
6.7	Theoretical Reliability of Masonry Shear Walls Subjected to Wind Load.....	133
6.7.1	General	133
6.7.2	DIN 1053-1.....	133
6.7.3	DIN 1053-100.....	144
6.7.4	DIN EN 1996-1-1 and National Annex.....	153
6.8	Assessment.....	158
6.8.1 ⁷	General	158
6.8.2	Theoretical Level of Reliability	158
6.8.3	Actual Level of Reliability	162
6.9	Summary	167
7	Optimization of the Target Reliability	169
7.1	Introduction.....	169
7.2	Modelling.....	170
7.2.1	General	170
7.2.2	Modelling of the Benefit	171
7.2.3	Modelling of the Structural Cost	173
7.2.4	Classification of Failure Consequences	174
7.2.5	Targeting Function and Procedure	178
7.3	Results of the Optimization.....	179
7.4	Conclusion	183
7.5	Summary	184
8	Summary and Outlook.....	185
9	References	191
