A BALKEMA BOOK

FV-Inv.-Nr. 1760

Table of contents

Preface	IX
Scientific advisory committee	XI
<i>Special lecture</i>	
Geotechnical engineering issues related to the Messina Strait Crossing <i>G. Fiammenghi, M. Jamiolkowski & W.F. Van Impe</i>	3
<i>Keynote lecture 1: Pile design developments</i>	
Sense and sensitivity of pile load-deformation behaviour <i>F.A. De Cock</i>	23
<i>Keynote lecture 2: Bored pile foundations in offshore conditions</i>	
Bored pile foundations in offshore conditions <i>R. Ellman & F.C. Rhyner</i>	47
<i>Keynote lecture 3: Bored and auger pile testing developments</i>	
Relationships between axial capacity and CPT q_c for bored piles in sand <i>B.M. Lehane</i>	61
<i>Keynote lecture 4: Energy pile concepts</i>	
Energy piles concepts <i>H. Brandl</i>	77
<i>Academic practitioner forum</i>	
Summary <i>H.G. Poulos</i>	99
<i>Discussion session 1: Pile design development & codes</i>	
Report of discussion session 1, on pile design development and codes <i>A.F. van Tol, W. Bilfinger, Victor Li, Y. El-Mossallamy & A. Mandolini</i>	103
Pile developments <i>W. Bilfinger</i>	113

The assessment of load-settlement curve for Atlas piles correlated with CPT tests <i>K. Gwizdała, A. Krasinski & T. Brzozowski</i>	121
A post-analysis of a large piled raft foundation constructed using reverse construction method <i>P. Kitiyodom, T. Matsumoto & R. Sonoda</i>	127
The DMT as tool for the monitoring of the effect of pile installation on the stress state in the soil <i>H. Peiffer</i>	135
Simulation of the performance and remediation of imperfect pile groups <i>H.G. Poulos</i>	143
Ultimate lateral load resistance of laterally loaded pile <i>Md.M. Rahman, Md.R. Karim, A.L. Baki & D.K. Paul</i>	155
A Study of end-bearing capacity mechanism of steel spiral pile <i>M. Tadashi & F. Mikio</i>	161
Urban renovation of the new marina in Rimini: Displacement piles as soil improvement and settlement reduction for the construction of a new dwelling and business centre <i>D. Vanni, A. Bertero, D. Attala, M. Malavolta, G. Marchi, M. Marchi, A. Ragazzini & L. Samori</i>	167
Re-design based on CPTs performed after pile installation <i>A.F. van Tol</i>	175
Recent case histories on monitoring settlement and load sharing of piled rafts in Japan <i>K. Yamashita, T. Yamada & J. Hamada</i>	181
 <i>Discussion session 2: Pile testing development</i>	
Behavior of continuous flight auger piles subjected to uplift load tests in unsaturated diabasic soil <i>P.J.R. Albuquerque, J.A. Paschoalin Filho & D. Carvalho</i>	197
Comparison of behaviour of CFA piles in London clay as determined by static, dynamic and rapid testing methods <i>A.P. Butcher, J.J.M. Powell, M. Kightley & V. Troughton</i>	205
Instrumented large diameter bored piles <i>A. Caputo</i>	213
Comparison between Osterberg and Statnamic load test on large diameter drilled piles <i>L. de Mello, G. Robbe & W. Bilfinger</i>	229
Review of methods of analysis of test results from bi-directional static load tests <i>M. England</i>	235
Physical modelling of piled raft <i>V. Fioravante, D. Giretti & M.B. Jamiolkowski</i>	241
Some new insights with regard to load distribution in piles, based on a detailed interpretation of a large number of instrumented pile load tests <i>N. Huybrechts & J. Maertens</i>	249
Field tests with drilled shafts in tension in frictional soil <i>S. Krabbenhoft, L. Damkilde & A. Andersen</i>	257
Bi-directional instrumented load test of a pile bored in Guinea Bissau <i>FR. Lacoste, M. Bustamante & M. England</i>	263

Static field load tests on foundations: Case study of rigid inclusions <i>A. Le Kouby, F.R. Lacoste, S. Lambert & P. Liausu</i>	269
Vertical and horizontal static load tests on bored piles in Dubrovnik <i>J. Masopust</i>	275
High capacity bored piles in soft volcanic rock—experiences based on single- and multi-level tests <i>Chr. Moormann & R. Saul</i>	279
Foundation of a high speed railway track by comparing different pile load tests <i>M. Raithel, A. Kirchmer & A. Kneißl</i>	285
Numerical simulations for a testpile <i>K. Thooft & K. Vanfroyenhoven</i>	293
Interpretation and misinterpretation of Cross Hole Sonic Logging test results <i>H.T. Williams & I. Jones</i>	299
 <i>Discussion session 3: Pile execution developments & equipment</i>	
Durability of cast-in-situ piles <i>E. Dapena, P. Alaejos, L. Prieto & G. Marote</i>	307
Statistical analysis of CFA piles construction <i>A. Mandolini & G. Russo</i>	311
Installation effort, current calculation methods and uses in design and construction in the US <i>W.M. NeSmith Jr. & W.M. NeSmith P.E.</i>	317
Design and construction aspects of piled foundations for Eureka Tower Project <i>J. Slatter & S. Tchepak</i>	323
M6 Mossband Viaduct, Carlisle, United Kingdom, long SFA piles installed with low-headroom Rigs <i>E. Stötzer, F.W. Gerressen & J. Müller</i>	329
 <i>Discussion session 4: Energy pile concepts</i>	
Tunnels and foundations as energy sources—Practical applications in Austria <i>D. Adam</i>	337
Investigations on the mechanical behaviour of a Heat Exchanger Pile <i>L. Laloui & M. Nuth</i>	343
Energy piles in Scotland <i>D.J. Lennon, E. Watt & T.P. Suckling</i>	349
Author index	357
