CONTENTS

Preface x

List of Abbreviations xiii

Part I Introduction

1 CONCEPTS AND DEFINITIONS 2
- 1.1 The concept of a macroeconometric system 2
- 1.2 Features of KK macroeconometric systems 3
- 1.3 An early KK macroeconometric system 5
- 1.4 Modern KK macroeconometric systems 9
- 1.5 Other systems 10

2 SOLUTION OF LINEAR AND NON-LINEAR SYSTEMS 25
- 2.1 The solution concept 25
- 2.2 Solution of linear systems 25
- 2.3 Solution of non-linear systems 32

Part II Construction of KK Systems

3 SPECIFICATION OF KK SYSTEMS 46
- 3.1 The Keynesian macro-analytical system 46
- 3.2 Disaggregation of aggregate demand 48
- 3.3 Specification of individual equations 50
- 3.4 Endogenisation of G, M_s and W 55
- 3.5 Open-economy relationships 60
- 3.6 Expectational variables 61
- 3.7 General observations 65

4 ESTIMATION METHODS 70
- 4.1 The information content of a system 70
- 4.2 System estimators 80
- 4.3 Single-equation information estimators 81
- 4.4 Limited information relating to the whole-system estimators 85
- 4.5 Full information relating to the whole-system estimators 91

5 FINITE-SAMPLE PROPERTIES OF SYSTEM ESTIMATORS 104
5.1 Analytical results 104
5.2 The Monte Carlo method 108
5.3 Monte Carlo studies of system estimators 117

6 FROM THEORY TO PRACTICE: THE CHOICE OF ESTIMATOR 125
6.1 Handling non-linearity 125
6.2 The undersized sample problem 128
6.3 Other practical issues 132
6.4 The choice of estimator 135

Part III Validation

7 MULTIPLIER ANALYSIS IN KK SYSTEMS 142
7.1 Linear multiplier analysis 142
7.2 Non-linear multiplier analysis 151

8 EVALUATION PROCEDURES 161
8.1 Individual-equation procedures 161
8.2 Whole-system procedures — tracking performance 164
8.3 Whole-system procedures — dynamic properties 172

Part IV Applications

9 FORECASTING 178
9.1 Arithmetical KK forecasting 178
9.2 Forecasting the predetermined variables 179
9.3 Judgemental KK forecasting 184
9.4 How accurate is KK forecasting? 190

10 COUNTER-FACTUAL ANALYSIS 194
10.1 Counter-factual analysis in outline 194
10.2 A US example of conditional forecasting 195
10.3 A US example of causal analysis 199
10.4 An Australian example of analysis of alternative regimes 201
10.5 A criticism of causal analysis 203

11 POLICY EVALUATION 205
11.1 Types of policy evaluation 205
11.2 Evaluation of historical policies: search 205
11.3 Evaluation of historical policies: optimal control 207
11.4 Evaluation of policy rules 214

Part V Conclusion

12 THE FUTURE OF KK SYSTEMS 222
12.1 The evolution of KK systems 222
12.2 Some developments in the field of KK systems 222

Index 228
