# Contents

PREFACE	xi
ACKNOWLEDGMENTS	xiii

## Chapter 1 **Basic Principles**

I. Introduction and Terminology	1
II. Theoretical Basis	3
References	14

## Chapter 2 **Shapes of Rigid and Fluid Particles**

I. Introduction	16
II. Classification of Particle Shapes	16
III. Shape Regimes for Fluid Particles	22
References	28

## Chapter 3 **Slow Viscous Flow Past Spheres**

I. Introduction	30
II. Fluid Mechanics	30
III. Heat and Mass Transfer	46
References	66

## Chapter 4 **Slow Viscous Flow Past Nonspherical Rigid Particles**

I. Introduction	69
II. Fluid Mechanics	69
III. Heat and Mass Transfer	88
References	94

<b>Chapter 5</b>	<b>Spheres at Higher Reynolds Numbers</b>	
I.	Introduction	97
II.	Rigid Spheres	97
III.	Fluid Spheres	125
	References	137
<b>Chapter 6</b>	<b>Nonspherical Rigid Particles at Higher Reynolds Numbers</b>	
I.	Introduction	142
II.	Spheroids and Disks	143
III.	Cylinders	153
IV.	Particles of Arbitrary Shape	157
V.	Free Fall of Other Specific Shapes or Types of Particle	165
	References	166
<b>Chapter 7</b>	<b>Ellipsoidal Fluid Particles</b>	
I.	Introduction	169
II.	Fluid Dynamics	169
III.	Heat and Mass Transfer	189
	References	199
<b>Chapter 8</b>	<b>Deformed Fluid Particles of Large Size</b>	
I.	Introduction	203
II.	Fluid Mechanics	203
III.	Mass Transfer in the Continuous Phase	213
IV.	Special Systems	216
	References	219
<b>Chapter 9</b>	<b>Wall Effects</b>	
I.	Introduction	221
II.	Rigid Particles	222
III.	Bubbles and Drops	231
	References	241
<b>Chapter 10</b>	<b>Surface Effects, Field Gradients, and Other Influences</b>	
I.	Introduction	244
II.	Surface Roughness (Rigid Particles)	244
III.	Interfacial Effects (Fluid Particles)	246
IV.	Natural Convection and Mixed Flow	249
V.	Particle Rotation and Fluid Shear	259
VI.	Freestream Turbulence	264
VII.	Compressibility and Noncontinuum Effects	271
	References	279

Contents	ix
<b>Chapter 11 Accelerated Motion without Volume Change</b>	
I. Introduction	285
II. Initial Motion	286
III. Rectilinear Acceleration at Higher Re	296
IV. Oscillatory Motion	306
V. Arbitrary Accelerated Motion	314
References	318
<b>Chapter 12 Formation and Breakup of Fluid Particles</b>	
I. Introduction	321
II. Formation of Bubbles and Drops	321
III. Breakup of Drops and Bubbles	339
References	347
<b>Appendices</b>	353
<b>Nomenclature</b>	359
<b>INDEX</b>	369
