# HANDBOOK OF VACUUM ARC SCIENCE AND TECHNOLOGY

## **Fundamentals and Applications**

Edited by

## Raymond L. Boxman

Tel Aviv University Tel Aviv, Israel

## **David M. Sanders**

Lawrence Livermore National Laboratory Livermore, California

### Philip J. Martin

CSIRO Applied Physics Lindfield, NSW, Australia

Foreword by James M. Lafferty

Preface	. ix

## Part I: Fundamentals of Vacuum Arc Science and Technology

#### 

DEFINITIONS AND PURPOSE OF THE CHAPTER	3
COLLISION PROCESSES	4
Hard Spheres: Cross Section, Mean Free Path, Collision Frequency.	
Collisions with Real Atoms and Ions	6
Excitation and Ionization	7
Electron Impact Excitation and Ionization	8
"Thermal" Ionization—Saha's Equation	9
COLLECTIVE BEHAVIOR	. 10
Plasma Oscillations	10
Debye Shielding	
CONDUCTION OF ELECTRICAL CURRENT	
MAGNETIC EFFECTS	14
Magnetic Force on Charged Particles	
Tensor Conductivity	
MHD Equations	

٠

•

÷

ELECTRODE EFFECTS	
Electron Emission Mechanisms	17
Atomic Emission	21
Electrode Sheaths	
Cathodic Effects: Glows and Arcs	25
CHAPTER SUMMARY	26
REFERENCES	27
2 Arc Ignition	. 28
George A. Farrall	
INTRODUCTION	28
FIELD EMISSION	
Field Emission Theory	
Field Emission Application	
Field Emission Transition to the Arc	
INSULATOR ENHANCED EMISSION	
PARTICLE EFFECTS	
Conducting Particles	
Particles from Insulators	
MAIN INSULATOR CONSIDERATIONS	
Vacuum Insulator Breakdown Mechanisms	45
Vacuum Insulator Geometry	46
Vacuum Insulator Materials	
Conditioning of Insulators	48
Insulators, Particles, and Breakdown Revisited	48
BREAKDOWN-TO-ARC TRANSITION	49
Circuit Impedance	
Suppression of Zeros	50
Breakdown and Arc Phenomena—The Same?	52
ARC IGNITION FROM LOW VOLTAGE SOURCES	53
Ignition Via the Drawn Arc	54
Ignition by Fuse Wire	55
Triggered Arc Ignition	56
Combined High and Low Voltage Circuits	57
LASER IGNITION	
HOLLOW-CATHODE ARC	
Hollow-Cathode Design	
Ignition of the Hollow-Cathode Arc	
CHAPTER SUMMARY	
REFERENCES	68

\$

3 Cathode Spots	73
Burkhard Jüttner, Victor F. Puchkarev, Erhard Hantzsche, and Isak Beilis	
PHENOMENOLOGY (by Burkhard Jüttner and Victor F. Puchkarev)	73
Modes of Spot Operation	75
Spot Modes on Cold Cathodes at Moderate Currents	75
Spots on Hot Cathodes	79
Physical Parameters of Type 1 Spots	80
Surface Erosion and Erosion Products	80
Spot Movement and Fragment Dynamics	87
Arc Voltage	87
Plasma Parameters	87
Physical Parameters of Type 2 Spots	90
Pre-Spot Stage	90
Spot Substructure	91
Spot Movement	93
Crater Size 1	101
Plasma Size 1	104
Time Constants 1	109
Arc Lifetime 1	14
Spot Voltages 1	18
Erosion Rate 1	22
Parameters of Plasma Emitted From Type 2 Spots 1	26
Ions 1	27
Electrons1	36
Plasma Parameters Within Type 2 Spots 1	137
Droplets (Macroparticles) 1	138
Radiation Properties of Arc Cathode Spots 1	143
Transition to Gaseous Arcs 1	
Stationary Arcs on Evaporating Cathodes 1	
Acknowledgement 1	151
THEORIES OF CATHODE SPOTS (by Erhard Hantzsche) 1	151
General Theory1	
Basic Physical Aspects: Introductory Remarks 1	51
Cathode Processes 1	53
TF Electron Emission: General Theory 1	58
TF Electron Emission: Limiting Cases	<b>62</b> ,
Surface Temperature: Energy Balance of the Cathode Spot 1	66
Surface Temperature: Heat Conduction Equation 1	174
Surface Temperature: Thermal Runaway	1 <b>78</b>
Surface Field Strength 1	83
Crater Formation and Cathode Erosion 1	86

4

Cathode Spot Plasma	198
Development of Cathode Spot Models	198
Theoretical Modeling of Cathode Spot Phenomena (by Isak Beilis)	208
Introduction	
Overall Description of the Model Geometry	208
Governing Equations for Each Region	211
Solution Methods	224
Special Cases	238
Application of the Model to Observed Spot Behavior	251
Conclusions	253
Acknowledgement	
CHAPTER SUMMARY (by Victor F. Puchkarev)	
Spot Types	, 256
Dynamics and Local Characteristics of Spots of Type 1 and 2	257
Spot Motion	, 257
Crater Size and the Minimum Spot Current	
Cathode Spot Residence Time (Lifetime)	•
Current Density	
Mass Loss From an Individual Crater (The Gross Erosion Rate)	
Integral Characteristics of the Arc	. 259
Arc Voltage	
Net Erosion Rate	. 259
Plasma Parameters	. 260
Fluctuations	, 261
Peculiarities of Type 1 Spots	, 261
The Theory of the Cathode Spot	, 262
Stationary Models	. 262
Non-Stationary Models	. 263

## Part II: Applications of Vacuum Arc Science and Technology

6 Coatings From The Vacuum Arc	367
<b>VACUUM ARC DEPOSITION</b> (by Philip J. Martin)	
INTRODUCTION	367
Columnar Growth and Structure-Zone Models	
Particle Energies in Evaporation Processes	
Ion-Target Interactions in Sputtering and Particle-Surface	
Interactions	373
Thermalization of Particles and Charge Exchange	
The Influence of Energetic Particle Bombardment	
on Film Properties	381
Summary of Film Growth	
VACUUM ARC DEPOSITION OF THIN FILMS	384
Characteristics of Emission Products from Cathodic Arcs	
and Film Deposition	384
Macroparticle Emission	391
REFERENCES (for Vacuum Arc Deposition)	394
ARC SOURCE DESIGNS	396
INTRODUCTION (by Steven Falabella and Dmitri A. Karpov)	
CONTINUOUS CATHODIC ARC SOURCES (by Steven Falabe	lla
and Dmitri A. Karpov)	397
Influence of Arc Spot Motion on Source Design	399
Cathode Spot Motion Control	400
Examples: Unfiltered Designs	404
Macroparticle Filter Design Criteria	412
Examples of Macroparticle Filter Designs	413
Power Supply Considerations	418
Summary	420
References (for Continuous Cathodic Arc Sources Design)	421
DISTRIBUTED ARC SOURCES (by Vladimir I. Gorokhovsky, V	
P. Polistchook, Ivan M. Yartsev, and Joseph W. Glaser)	423
Introduction	

Distributed Cathodic Arcs	424
Arc Description and Classification of Electrode Materials	424
Typical Experimental Conditions	426
Arcs on Cathodes with Low Atom-Electron Ratios ( $\xi < 1$ )	428
Carbon and Titanium Cathodes	431
Arcs on Cathodes with High Atom-Electron Ratios ( $\xi > 1$ )	434
Arcs on Hot Evaporated Anodes	435
Non-Coating Applications	441
References (for Distributed Arc Sources)	442
PULSED ARC SOURCES (by Ian Brown)	444
Source Design	445
Arc Geometry	445
Arc Circuitry	445
Triggering	446
Plasma Characteristics	
Thin Film Deposition	451
Very High Rate Deposition

9	Pulsed Power Applications	625
	Roger Dougal with contributions by Ian G. Brown and Sture K. Händ	
	INTRODUCTION	625
	PULSED POWER CONCEPTS AND DEFINITIONS	626

PULSED POWER CONCEPTS AND DEFINITIONS	626
VACUUM ARCS AS SWITCHES	631
Closing Switches	631
General Performance Characteristics and Switch	
Selection Criteria	632
Closure Characteristics	635
Recovery Rate	637
Electrode Material Considerations	
Geometry	638
Case Examples	
Opening Switches	
Counterpulsed Vacuum Switch	
Plasma Opening Switch	
Plasma Flow Switch	

VACUUM ARCS AS LOADS	653
Ion Beam Sources (by Ian G. Brown)	653
Introduction	653
Theory of Operation	654
Configurations	656
Performance Characteristics	657
Applications	661
Summary and Further Reading	662
Electron Beam Sources (by Roger Dougal)	662
Theory of Operation	
Configurations	665
Performance Characteristics	666
Applications	667
Pulsed X-ray Sources (by Sture K. Händel)	667
Theory of Operation	668
Configurations	
Performance Characteristics	683
