

# Lecture Notes in Computer Science

Edited by G. Goos and J. Hartmanis

75

---

## Mathematical Studies of Information Processing

Proceedings of the International Conference  
Kyoto, Japan, August 23–26, 1978

Technische Hochschule Darmstadt  
FACHBEREICH INFORMATIK

B I B L I O T H E K

Inventar-Nr.: 4235

Sachgebiete: \_\_\_\_\_

Standort: A-2/73

Edited by  
E. K. Blum, M. Paul and S. Takasu

Fachbereichsbibliothek Informatik  
TU Darmstadt

59497685

---

Springer-Verlag  
Berlin Heidelberg New York 1979

## Contents

### Session 1.

- P. E. Lauer and M. W. Shields, On the abstract specification and formal analysis of synchronization properties of concurrent systems . . . . . 1
- E. Miller and C. K. Yap, On the formal specification and analysis of loosely connected processes . . . . . 33
- K. Čulík, Synchronized parallel computation and slowdown of translators . . . . . 67

### Session 2.

- R. Kurki-Suonio, Nondeterminism, parallelism and intermittent assertions . . . . . 106
- A. Yonezawa, A formal specification technique for abstract data types with parallelism . . . . . 127
- S. Owicki, Verifying parallel programs with resource allocation . . . . . 151

### Session 3.

- Y. Kambayashi, Equivalent key problem of the relational database model . . . . . 165
- K. Tanaka, Ch. Le-Viet, Y. Kambayashi and S. Yajima, A file organization suitable for relational database operations . . . . . 193

### Session 4.

- A. Blikle, Specified programming . . . . . 228
- J. Loeckx and I. Glasner, A calculus for proving properties of while-programs . . . . . 252
- K. Sugawara, H. Kawaguchi and T. Nishizawa, "E-correctness" of a set of "computation processes" . . . . . 282

### Session 5.

- S. Goto, Program synthesis through Gödel's interpretation. 302
- D. Bjørner, The Vienna development method (VDM): Software specification & program synthesis . . . . . 326

Session 6.

- M. Paul and U. Guntzer, On a uniform formal description of data structures . . . . . 360
- E. R. Anderson, F. C. Belz and E. K. Blum, Extending an implementation language to a specification language . 384

Session 7.

- J. A. Goguen, Some design principles and theory for OBJ-0, a language to express and execute algebraic specifications of programs . . . . . 425
- L. Lamport, The specification and proof of correctness of interactive programs . . . . . 474

Session 8.

- H. Langmaack, On a theory of decision problems in programming languages . . . . . 538
- C. C. Elgot, A representative strong equivalence class for accessible flowchart schemes . . . . . 559
- R. Cartwright and J. McCarthy, Recursive programs as functions in a first order theory . . . . . 576
