CONTENTS

PREFACE	ix
1 INTRODUCTION	1
2 AN INTRODUCTION TO ENVIRONMENTAL ORGANIC CHEMICALS	8
2.1 Introduction / 8	
2.2 The Makeup of Organic Compounds / 8	
2.3 Classification, Nomenclature, and Examples of Environmental Organic Chemicals / 30	
3 BACKGROUND THERMODYNAMICS	41
3.1 Introduction / 41	
3.2 Using Thermodynamic Functions to Describe Molecular Energies / 42	
3.3 Using Thermodynamic Functions to Quantify Molecular Change Processes / 50	
3.4 Summary / 55	
4 VAPOR PRESSURE	56
4.1 Introduction / 56	
4.2 Thermodynamic Considerations / 58	
4.3 Molecular Interactions Governing Vapor Pressure / 63	

4.4	Availability of Experimental Vapor Pressure Data and Estimation Methods / 70	
5	SOLUBILITY AND ACTIVITY COEFFICIENT IN WATER	76
5.1	Introduction / 76	
5.2	Thermodynamic Considerations / 77	
5.3	Molecular Interpretation of the Dissolution Process / 82	
5.4	Effect of Temperature and Solution Composition on Aqueous Solubility and Activity Coefficient / 90	
5.5	Dissolution of Organic Compounds in Water from Organic Liquid Mixtures / 104	
5.6	Availability of Solubility Data; Estimation of Aqueous Solubility and Activity Coefficient / 107	
6	AIR-WATER PARTITIONING: THE HENRY'S LAW CONSTANT	109
6.1	Introduction / 109	
6.2	Thermodynamic Considerations: Effects of Concentration, Temperature, Salt, and Cosolutes / 112	
6.3	Experimental Determination of Air-Water Partition Ratios / 116	
6.4	Availability of K_H Data—Estimation Methods / 123	
7	ORGANIC SOLVENT-WATER PARTITIONING: THE OCTANOL-WATER PARTITION CONSTANT	124
7.1	Introduction / 124	
7.2	Thermodynamic Considerations and Molecular Interpretation of Solvent-Water Partitioning / 125	
7.3	The <i>n</i> -Octanol-Water Partition Constant (K_{ow}) of Neutral Organic Compounds / 130	
7.4	Approaches Using Chemical Structure to Relate and Estimate Partition Constants / 134	
7.5	Chemical Structure and Partitioning Behavior—Estimation of K_{ow} from Structural Group Contributions / 142	
8	ORGANIC ACIDS AND BASES: ACIDITY CONSTANT AND PARTITIONING BEHAVIOR	157
8.1	Introduction—Acidity Constant / 157	
8.2	Chemical Structure and Acidity Constant / 166	
8.3	Availability of Experimental pK_a Values and pK_a Estimation Methods / 170	
8.4	Comments on Aqueous Solubility and Partitioning Behavior of Organic Acids and Bases / 178	

9	DIFFUSION	182
9.1	The Gradient-Flux Law: Offspring of Randomness at the Molecular Level / 182	
9.2	Fick's Second Law / 188	
9.3	Molecular Diffusivities / 194	
9.4	Turbulent Diffusion / 200	
10	THE GAS-LIQUID INTERFACE: AIR-WATER EXCHANGE	215
10.1	Introduction / 215	
10.2	Visualization of the Mechanisms Involved in Air-Water Exchange / 217	
10.3	Air-Water Exchange Model Formulations / 219	
10.4	Impact of Wind and Water Currents on v_w and v_a / 228	
10.5	Influence of Chemical Reactions on Air-Water Exchange Rates / 241	
10.6	Surface Films / 251	
11	SORPTION: SOLID-AQUEOUS SOLUTION EXCHANGE	255
11.1	Introduction / 255	
11.2	Quantifying the Relative Abundances of Dissolved and Sorbed Species: The Solid-Water Distribution Ratio K_d / 258	
11.3	The Complex Nature of K_d 's / 262	
11.4	Sorption of Neutral Organic Chemicals to Soils and Sediments / 265	
11.5	Sorption of Neutral Organic Chemicals to Polar Mineral Surfaces / 284	
11.6	Adsorption of Ionizable Organic Chemicals from Aqueous Solutions / 291	
11.7	Sorption Kinetics 328	
12	CHEMICAL TRANSFORMATION REACTIONS	342
12.1	Introduction / 342	
12.2	Kinetic Aspects of Chemical Transformation Reactions / 344	
12.3	Nonreductive Chemical Reactions Involving Nucleophilic Species / 359	
12.4	Oxidation and Reduction Reactions / 399	
13	PHOTOCHEMICAL TRANSFORMATION REACTIONS	436
13.1	Introduction / 436	
13.2	Some Basic Principles of Photochemistry / 437	

13.3	Direct Photolysis of Organic Compounds in Natural Water / 451	
13.4	Indirect (Sensitized) Photolysis of Organic Compounds / 471	
13.5	Effects of Particles on Photolytic Transformations of Organic Compounds in Natural Water / 483	
14	BIOLOGICAL TRANSFORMATION REACTIONS	485
14.1	Introduction / 485	
14.2	Some Important Concepts about Microorganisms / 489	
14.3	Strategies of Microorganisms to Initiate Metabolism of Xenobiotic Compounds / 494	
14.4	Rates of Biotransformations / 520	
14.5	Closing Remarks / 546	
15	MODELING CONCEPTS	547
15.1	Introduction / 547	
15.2	Mass Balance—The Cornerstone of Box Models / 551	
15.3	Dynamic Box Models / 554	
15.4	The Solid–Water Interface: Modeling the Role of Particles / 578	
15.5	Space and Time: Continuous Models / 598	
	APPENDIX	617
