<i>Preface</i>	xi
1 Introduction	1
1.1 Steps in Modelling	2
1.2 The Role of Econometric Techniques	4
1.3 Iteration	4
1.4 Simulation	6
Program 1.1	9
Program 1.2	10
Program 1.3	11
1.5 Notes for Computer Users	12
2 Demand Estimation	13
2.1 Specification of the Model	14
2.2 Nature of the Data	19
2.3 Estimation Techniques	20
2.3.1 Inference about Population Parameters	30
2.4 The Estimation of a Simple Log-Linear Model of Demand	37
Programs 2.1 and 2.2	41
Program 2.1	41
Program 2.2	42
2.5 Multiple Regression	42
Summary	44
Further Reading	45
3 Cost Analysis: Stock Control	46
3.1 The Basic Model	47
Program 3.1	51

3.2	Lead Time	52
3.3	Backorders and Stock-out Costs	53
	Programs 3.2A and 3.2B	56
3.4	Gradual Receipt of Stock	58
3.5	A Simulation Model	60
	Program 3.3	62
	Summary	64
	Further Reading	65
4	Production Functions	66
4.1	Additive Functions	66
4.2	Cobb-Douglas and CES Functions	68
	Program 4.1	73
	Program 4.2	74
	Program 4.3	76
4.3	Linear Production Functions	78
4.4	The Graphical Method	78
4.5	Three Variable Models	82
4.6	Contingency Planning	84
4.7	Cost Minimization	86
4.8	The Dual and Linear Programming	87
4.9	Linear Programming and Continuous Substitution Production Functions: Historical Note and some Comparisons	90
	Summary	91
	Further Reading	92
5	Uncertainty and the Firm	93
5.1	Uncertainty and Price Formation	94
	Program 5.1	97
	Program 5.2	97
5.2	Classical Oligopoly Theory	98
	Program 5.3	102
5.3	Some Recent Developments in Oligopoly Theory	103
	Program 5.4	109
5.4	Iterative Prisoner's Dilemma Games	110
5.5	Market Shares Through Time	114
5.6	Applications of Market Share Analysis to Marketing Strategy	118
	Program 5.5	119
	Summary	120

	Further Reading	121
6	Investment Appraisal	122
	6.1 Discounting Techniques—Single Period Investments	123
	6.2 Investment Over Time	128
	Program 6.1	131
	Program 6.2	133
	6.3 Multi-Project Analysis—The Markowitz Approach	137
	Program 6.3	141
	Summary	142
	Further Reading	142
7	Time Series Forecasting	144
	7.1 Simple Forecasting Methods	145
	7.2 Trend and Seasonal Influences	148
	Programs 7.1, 7.2 and 7.3	150
	Program 7.1	156
	Program 7.2	157
	Program 7.3	158
	7.3 Forecasting: An Assessment	159
	Summary	160
	Further Reading	161
8	Keynesian Macroeconomics	162
	8.1 A Simple Model	163
	Program 8.1	165
	8.2 Keynesian Economic Policy	166
	Program 8.2	169
	8.3 Multiplier-Accelerator Models	170
	Program 8.3	173
	Summary	175
	Further Reading	176
9	Macroeconometric Modelling	177
	9.1 The Purpose of Macroeconometric Modelling	178
	9.2 Model Structure	181
	Program 9.1	185
	9.3 Simulation Experiments	189
	Program 9.2	190
	9.4 Assessing Forecasting Models	193
	Summary	194

	Further Reading	195
10	The Role of Computer Models	197
	Further Reading	201
	<i>References</i>	202
	<i>Index</i>	209
