Contents of Macromol. Symp. 78

Preface	xi
<i>R. Greco, E. Martuscelli</i>	
<i>Theories of miscibility, modelling and phase behaviour</i>	
1. Thermodynamics of polymer blends	1
<i>R. Koningsveld</i>	
2. The influence of polymer structure and component ratios on blend miscibility	15
<i>J. M. G. Cowie</i>	
3. Towards a molecular theory of polymer blends	29
<i>K. F. Freed*, J. Dudowicz</i>	
4. Phase behavior of polymer blends under equilibrium and non-equilibrium conditions	41
<i>H. W. Kammer</i>	
5. Association of macromolecules and its influence of polymer miscibility	53
<i>V. N. Kuleznev</i>	
6. New concepts for understanding brittle-to-tough transition in polymer blends	71
<i>B. Wessling</i>	
<i>Characterization of phase structure and interfaces</i>	
7. Effects of polymer-polymer interactions in multiphase blends or alloys	83
<i>D. R. Paul</i>	
8. Phase separation studies on poly(vinylidene fluoride) and poly(methyl methacrylate) quenched blends	95
<i>J. Martinez Salazar*, J. C. Canalda, B. Vallejo</i>	
9. Interface formation between compatible polymers as determined by neutron reflectometry: PMMA and PVC	105
<i>K. Kunz, M. Stamm*</i>	
10. Phase diagram and thermal and mechanical properties of isotactic polypropylene/hydrogenated oligo(cyclopentadiene) blends	115
<i>S. Cimmino*, E. Martuscelli, C. Silvestre</i>	
11. Surface studies of polymer blends	131
<i>E. Occhiello, F. Garbassi*</i>	

12. Polycarbonate/ABS blends: compatibilization and mechanical behaviour 141
R. Greco, L. S. Dong*

Molecular aspects — physical properties relationships

13. Miscibility of poly(butyl methacrylate-co-methacrylic acid) or poly(styrene-co-methacrylic acid) with poly(styrene-co-4-vinylpyridine) or poly(butyl methacrylate-co-4-vinylpyridine) 155
S. Djadoun, F. E. Karasz, F. Metref*
14. Polyolefins-poly(ethylene oxide) blends: structure and properties 171
M. Kryszewski, J. Morawiec, M. Pluta, P. Uznański*
15. Plastic deformation of polymer blends with crystallizable components 187
A. Galeski
16. Dynamic-mechanical behaviour in the molten state of iPP/HOCP blends 203
G. Demma, D. Acierno, E. Martuscelli*

New methods of blend preparation and processing

17. In situ polyolefin alloys 213
G. Cecchin
18. Blends of the β -modification of polypropylene 229
J. Varga, F. Schulek-Tóth, I. Mudra*
19. Reactive blending of bioaffine polyesters through free-radical processes initiated by organic peroxides 243
B. Immirzi, M. Malinconico, E. Martuscelli, M. G. Volpe*
20. Intercrosslinked polymer networks by simultaneous curing of unsaturated polyesters and bismaleimide resins 259
M. Abbate, V. Di Liello, E. Martuscelli, P. Musto, G. Ragosta, G. Scarinzi*

Problems and perspectives of blend applications

21. The reactor granule technology: a revolutionary approach to polymer blends and alloys 269
P. Galli
22. Blends of natural and synthetic polymers: a new route to novel biomaterials 285
P. Giusti, L. Lazzeri, N. Barbani, L. Lelli, S. De Petris, M. G. Cascone*

- | | |
|--|-----|
| 23. New polyamide-based blends | 299 |
| <i>F. Speroni</i> | |
| 24. Specialties production by an innovative extrusion system | 313 |
| <i>A. Addeo*, C. Morandi, A. Vezzoli</i> | |
