Contents

Preface vii

1. Introduction **1**

- 1.1 Superior Operating Procedures 5
- 1.2 Process Modifications 5
- 1.3 Process Redesign 5
- 1.4 Recycling 6
- References 7

2. Overview of Pulp and Papermaking Processes **8**

- 2.1 Raw Material Preparation and Handling 8
- 2.2 Pulp Manufacturing 11
- 2.3 Pulp Washing and Screening 17
- 2.4 Pulp Bleaching 20
- 2.5 Stock Preparation 22
- 2.6 Papermaking 32
- 2.7 Chemical Recovery 40
- References 43

3. Environmental Issues of the Pulp and Paper Industry **46**

- 3.1 Effluent Toxicity 48
- 3.2 Air Emissions 54
- References 58

4. Emissions from Pulp and Papermaking **62**

- 4.1 Kraft Pulping 62
- 4.2 Sulfite Pulping 79
- 4.3 Mechanical Pulping 84
- 4.4 Recycled Fiber Processing 89
- 4.5 Papermaking 99
- References 107

5. Cleaner Production Measures in Pulp and Paper Processing **110**

- 5.1 Kraft Pulping 110
- 5.2 Sulfite Pulping 170

5.3	Mechanical and Chemimechanical Pulping	177
5.4	Recycled Paper Processing	190
5.5	Papermaking	213
	References	254

6. Recent Developments in Cleaner Production	264
---	------------

6.1	Use of Cooking Catalyst	264
6.2	Organo Solvent Pulping	268
6.3	Black Liquor Gasification	269
6.4	Removal of Chelating Agents	273
6.5	Energy-Efficient Thermomechanical Pulping Processes	274
6.6	Recovery of Boiler Ash and Carbon Dioxide Gas to Produce Recycled Mineral Fillers	276
6.7	Impulse Technology for Dewatering of Paper	277
6.8	Condebelt Process	278
6.9	Internal Heat Pumps	280
6.10	Total Site Integration Tools	280
6.11	Wastewater Treatment for Water Recovery and Reuse	281
6.12	Biotechnologies for Cleaner Paper Production	305
	References	334

Glossary and Abbreviations	345
