# FUNDAMENTALS OF FLUID FILM LUBRICATION

---

**Bernard J. Hamrock**

*The Ohio State University  
Columbus, Ohio*

**McGraw-Hill, Inc.**

New York St. Louis San Francisco Auckland Bogotá  
Caracas Lisbon London Madrid Mexico City Milan  
Montreal New Delhi San Juan Singapore Sydney Tokyo Toronto

This book was set in Times Roman by Science Typographers, Inc.  
The editors were John J. Corrigan and Jack Maisel;  
the production supervisor was Louise Karam.  
The cover was designed by Joseph Gillians.  
R. R. Donnelley & Sons Company was printer and binder.

Preface	xxiii
List of Symbols	xxvii
<b>1 Introduction</b>	<b>1</b>
1.1 Conformal and Nonconformal Surfaces	1
1.2 Lubrication Regimes	2
1.2.1 Historical Perspective	2
1.2.2 Hydrodynamic Lubrication	3
1.2.3 Elastohydrodynamic Lubrication	5
1.2.4 Boundary Lubrication	7
1.2.5 Partial Lubrication	9
1.3 Closure	10
1.4 Problems	11
1.5 References	11
<b>2 Bearing Classification and Selection</b>	<b>12</b>
2.1 Bearing Classification	13
2.1.1 Dry Rubbing Bearings	13
2.1.2 Impregnated Bearings	13
2.1.3 Conformal Fluid Film Bearings	14
2.1.4 Rolling-Element Bearings	14
2.2 Bearing Selection	16
2.3 Closure	24
2.4 Problems	25
2.5 References	25
<b>3 Surface Topography</b>	<b>26</b>
3.1 Geometric Characteristics of Surfaces	26
3.2 Stylus Measurements	27 ✓
3.3 Some Noncontacting Measurement Devices	29
3.4 Reference Lines	31
3.4.1 Mean, or M System	31
3.4.2 Ten-Point Average	31
3.4.3 Least Squares	31

3.5	Computation of Surface Parameters	32
3.6	Autocorrelation Parameter	39
3.7	Distribution of Slope and Curvature	40
3.8	Film Parameters for Different Lubrication Regimes	41
3.9	Transition between Lubrication Regimes	42
3.10	Closure	43
3.11	Problems	44
3.12	References	44
<b>4</b>	<b>Lubricant Properties</b>	<b>45</b>
4.1	Basic Chemistry	46
4.1.1	Hydrocarbons	46
4.1.2	Alcohols	48
4.1.3	Fatty Acids	49
4.1.4	Cyclic Hydrocarbons	51
4.2	Newtonian Fluids	52
4.3	Newton's Postulate	52
4.4	Units of Absolute Viscosity	53
4.5	Kinematic Viscosity	54
4.6	Viscosity Grade System	55
4.7	Viscosity-Pressure Effects	57
4.8	Viscosity-Temperature Effects	63
4.9	Viscosity-Pressure-Temperature Effects	66
4.10	Viscosity-Shear Rate Effects	67
4.11	Viscosity Index	68
4.12	Oxidation Stability	70
4.13	Pour Point	71
4.14	Density	71
4.15	Limiting Shear Stress	76
4.16	Petroleum or Mineral Oil Base Stocks	78
4.17	Synthetic Oil Base Stocks	78
4.17.1	Synthetic Hydrocarbons	79
4.17.2	Organic Esters	79
4.17.3	Polyglycols	81
4.17.4	Phosphate Esters	81
4.17.5	Silicon-Containing Compounds	81
4.17.6	Halogen-Containing Compounds	82
4.17.7	Halogenated Polyaryls	82
4.17.8	Fluorocarbons	82
4.17.9	Perfluoropolyglycols	83
4.18	Grease Base Stocks	83
4.18.1	Thickeners	83
4.18.2	Lubricating Oil	85
4.19	Gases	87
4.20	Closure	89
4.21	Problems	90
4.22	References	90

<b>5</b>	<b>Bearing Materials</b>	<b>92</b>
5.1	Material Characteristics	92
5.2	Metallics	94
5.2.1	Tin- and Lead-Base Alloys	94
5.2.2	Copper-Lead Alloys	96
5.2.3	Bronzes	96
5.3	Nonmetallics	97
5.3.1	Carbon Graphites	98
5.3.2	Phenolics	98
5.3.3	Nylon	100
5.3.4	Teflon	100
5.4	Form of Bearing Surfaces	100
5.5	Materials and Manufacturing Processes Used for Rolling-Element Bearings	101
5.5.1	Ferrous Alloys	102
5.5.2	Ceramics	104
5.6	Properties of Common Bearing Materials	104
5.6.1	Mass Density	105
5.6.2	Modulus of Elasticity and Poisson's Ratio	106
5.6.3	Linear Thermal Expansion Coefficient	109
5.6.4	Thermal Conductivity	110
5.6.5	Specific Heat Capacity	112
5.7	Closure	115
5.8	Problem	116
5.9	References	116
<b>6</b>	<b>Viscous Flow</b>	<b>117</b>
6.1	Petrov's Equation	117
6.2	Navier-Stokes Equations	119
6.2.1	Surface Forces	119
6.2.2	Body Forces	122
6.2.3	Inertia Forces	122
6.2.4	Equilibrium	123
6.2.5	Standard Forms	124
6.3	Continuity Equation	127
6.4	Flow between Parallel Flat Plates	128
6.5	Flow in a Circular Pipe	131
6.6	Flow Down a Vertical Plane	132
6.7	Viscometers	134
6.7.1	Capillary Viscometers	134
6.7.2	Rotational Viscometers	134
6.7.3	Falling-Sphere Viscometers	137
6.8	Closure	138
6.9	Problems	139
6.10	References	140

<b>7</b>	<b>Reynolds Equation</b>	141
7.1	Dimensionless Numbers	141
7.1.1	Reynolds Number	142
7.1.2	Taylor Number	145
7.1.3	Froude Number	145
7.1.4	Euler Number	146
7.2	Reynolds Equation Derived	147
7.2.1	From Navier-Stokes and Continuity Equations	147
7.2.2	From Laws of Viscous Flow and Principle of Mass Conservation	151
7.3	Physical Significance of Terms in Reynolds Equation	152
7.3.1	Density Wedge Term	153
7.3.2	Stretch Term	154
7.3.3	Physical Wedge Term	154
7.3.4	Normal Squeeze Term	155
7.3.5	Translation Squeeze Term	155
7.3.6	Local Expansion Term	156
7.4	Standard Reduced Forms of Reynolds Equation	156
7.5	Different Normal Squeeze and Sliding Motions	160
7.6	Closure	162
7.7	Problems	163
7.8	References	165
<b>8</b>	<b>Hydrodynamic Thrust Bearings—Analytical Solutions</b>	166
8.1	Mechanism of Pressure Development	166
8.2	General Thrust Bearing Theory	169
8.3	Parallel-Surface Slider Bearing	172
8.4	Fixed-Incline Slider Bearing	173
8.4.1	Pressure Distribution	174
8.4.2	Normal Load Component	176
8.4.3	Tangential Force Components	177
8.4.4	Shear Force Components	178
8.4.5	Friction Coefficient	178
8.4.6	Volume Flow Rate	179
8.4.7	Power Loss and Temperature Rise	180
8.4.8	Center of Pressure	181
8.4.9	Velocity Profile and Stream Function	182
8.5	Parallel-Step Slider Bearing	186
8.5.1	Pressure Distribution	187
8.5.2	Normal and Tangential Load Components	189
8.5.3	Friction Coefficient and Volume Flow Rate	190
8.5.4	Power Loss, Temperature Rise, and Center of Pressure	191
8.6	Closure	191
8.7	Problems	192
8.8	Reference	195

<b>9</b>	<b>Hydrodynamic Thrust Bearings—Numerical Solutions</b>	196
9.1	Finite-Width, Parallel-Step-Pad Slider Bearing	197
9.1.1	Pressure Distribution	197
9.1.2	Normal Load Component	201
9.1.3	Results	201
9.2	Fixed-Incline-Pad Slider Bearing	204
9.3	Pivoted-Pad Slider Bearing	209
9.4	Thrust Bearing Geometry	215
9.5	Closure	216
9.6	Problems	216
9.7	References	217
<b>10</b>	<b>Hydrodynamic Journal Bearings—Analytical Solutions</b>	218
10.1	Infinitely Wide-Journal-Bearing Solution	219 ✓
10.1.1	Full Sommerfeld Solution	221
10.1.2	Half Sommerfeld Solution	227
10.1.3	Reynolds Boundary Condition	229 ✓
10.2	Short-Width-Journal-Bearing Theory	230
10.3	Closure	234
10.4	Problems	235
10.5	References	235
<b>11</b>	<b>Dynamically Loaded Journal Bearings</b>	236
11.1	Relevant Reynolds Equation	237
11.1.1	Steady-State Conditions	241
11.1.2	Absence of Rotation	241
11.1.3	Half-Frequency Whirl	241
11.2	Full Sommerfeld Infinitely Wide-Journal-Bearing Solution	242
11.3	Linearization of Bearing Reaction	244
11.4	Journal Bearing Stability	250
11.5	Linearization of Bearing Reaction Applied to Short-Width Journal Bearings	252
11.6	Closure	257
11.7	Problems	257
11.8	References	258
<b>12</b>	<b>Hydrodynamic Journal Bearings—Numerical Solutions</b>	259
12.1	Operating and Performance Parameters	259
12.2	Performance Parameter Results	262
12.3	Optimization Techniques	268
12.4	Nonplain Configurations	269
12.5	Closure	276
12.6	Problems	276
12.7	References	277

<b>13</b>	<b>Hydrodynamic Squeeze Film Bearings</b>	278
13.1	Parallel-Surface Bearing of Infinite Width	279
13.2	Journal Bearing	283
13.3	Parallel Circular Plate	286
13.4	Infinitely Long Cylinder near a Plane	287
13.5	Closure	290
13.6	Problems	290
<b>14</b>	<b>Hydrostatic Lubrication</b>	293
14.1	Formation of Fluid Film	294
