8 9 0 KHL UPE 9 8 7

This book was set in Times Roman by Syntax International
The editors were John Corrigan and Margery Luhrs;
the production supervisor was Denise L. Puryear.
The cover was designed by Joseph Gillians.

CONTENTS

Preface to the Fourth Edition	xiii
Preface to the Third Edition	xv
Preface to the Revised Edition	xvii
Preface to the First Edition	xix

Part 1 General Concepts

1	Types of Applications of Measurement Instrumentation	3
1.1	Introduction	3
1.2	Monitoring of Processes and Operations	3
1.3	Control of Processes and Operations	4
1.4	Experimental Engineering Analysis	5
1.5	Computer-Aided Machines and Processes	6
1.6	Conclusion	6
	Problems	8
	Bibliography	9
2	Generalized Configurations and Functional Descriptions of Measuring Instruments	10
2.1	Functional Elements of an Instrument	10
2.2	Active and Passive Transducers	15
2.3	Analog and Digital Modes of Operation	17
2.4	Null and Deflection Methods	18
2.5	Input-Output Configuration of Measuring Instruments and Instrument Systems	19
	Methods of Correction for Interfering and Modifying Inputs	
2.6	Conclusion	35
	Problems	36

Dr. O. Doebelin. — 4th ed.

ents I. Title.

89-12107

Characteristics	37	Moiré Fringe Stress-Analysis Techniques. Displacement-to-Pressure (Nozzle-Flapper) Transducer. Digital Displacement Transducers (Translational and Rotary Encoders). Ultrasonic Transducers.	
Precision, and Bias.	37	4.4 Relative Velocity, Translational and Rotational.	308
Overall System-Accuracy	38	Calibration. Velocity by Electrical Differentiation of Displacement Voltage Signals. Average Velocity from Measured Δx and Δt . Mechanical Flyball Angular-Velocity Sensor. Mechanical Revolution Counters and Timers. Magnetic and Photoelectric Pulse-Counting Methods. Stroboscopic Methods. Translational-Velocity Transducers (Moving-Coil and Moving-Magnet Pickups). DC Tachometer Generators for Rotary-Velocity Measurement. AC Tachometer Generators for Rotary-Velocity Measurement. Eddy-Current Drag-Cup Tachometer.	
Amplification and Threshold, Resolution, Stability. Span.		4.5 Relative-Acceleration Measurements	319
Performance. Computer-Aided Regression. Concluding	94	4.6 Seismic- (Absolute-) Displacement Pickups	320
Measurement System. Digital Data Analysis. Operational Function. Zero-Order Step Response of First-Order Instruments. Impulse Response of Second-Order Instruments. Terminated-Ramp Response of First-Order Instruments. Response of Second-Order Instruments. Frequency-Response of Frequency-Response Instrument to a Periodic Modulated Signals.		4.7 Seismic- (Absolute-) Velocity Pickups	322
Corrections on Instrument Measurement. Numerical Determination of Dynamic Effects under Dynamic	98	4.8 Seismic- (Absolute-) Acceleration Pickups (Accelerometers) Deflection-Type Accelerometers. Null-Balance- (Servo-) Type Accelerometers. Accelerometers for Inertial Navigation. Mechanical Loading of Accelerometers on the Test Object.	323
	202	4.9 Calibration of Vibration Pickups	336
Measurement	207	4.10 Jerk Pickups	339
	207	4.11 Pendulous (Gravity-Referenced) Angular-Displacement Sensors	341
Rotational.	208	4.12 Gyroscopic (Absolute) Angular-Displacement and Velocity Sensors	345
Resistance Strain Gages. Induction Potentiometers. Piezoelectric Pickups. Eddy-Current Pickups. Piezoelectric Photographic, Videotape, Brittle-Coating and	210	4.13 Coordinate-Measuring Machines	355
		4.14 Surface-Finish Measurement	364
		4.15 Machine Vision	371
		Problems	383
		Bibliography	389
		5 Force, Torque, and Shaft Power Measurement	390
		5.1 Standards and Calibration	390
		5.2 Basic Methods of Force Measurement	392
		5.3 Characteristics of Elastic Force Transducers	397
		Bonded-Strain-Gage Transducers. Differential-Transformer Transducers. Piezoelectric Transducers. Variable-Reluctance/FM-Oscillator Digital Systems. Loading Effects.	
		5.4 Resolution of Vector Forces and Moments into Rectangular Components	410
		5.5 Torque Measurement on Rotating Shafts	416
		5.6 Shaft Power Measurement (Dynamometers)	425
		5.7 Gyroscopic Force and Torque Measurement	429
		5.8 Vibrating-Wire Force Transducers	432
		Problems	433
		Bibliography	436
		6 Pressure and Sound Measurement	437
		6.1 Standards and Calibration	437
		6.2 Basic Methods of Pressure Measurement	439

6.3	Deadweight Gages and Manometers Manometer Dynamics.	440	8.3	Thermoelectric Sen Common Thermoc Special Materials, (
6.4	Elastic Transducers	455	8.4	Electrical-Resistanc Conductive Sensor; Semiconductor Sen
6.5	Force-Balance and Vibrating-Cylinder Transducers	470	8.5	Junction Semicond
6.6	Dynamic Effects of Volumes and Connecting Tubing Liquid Systems, Heavily Damped, Slow-Acting. Liquid Systems, Moderately Damped, Fast-Acting. Gas Systems with Tube Volume a Small Fraction of Chamber Volume. Gas Systems with Tube Volume Comparable to Chamber Volume. The Infinite-Line Pressure Probe. Conclusion.	473	8.6	Digital Thermomet
6.7	Dynamic Testing of Pressure-Measuring Systems	483	8.7	Radiation Methods Radiation Fundam Broadband Radiati Radiation Thermoi Radiation Thermoi Thermometers. M (Optical Pyrometer Blackbody-Tipped Imaging Systems.
6.8	High-Pressure Measurement	489	8.8	Temperature-Meas Conduction Error.
6.9	Low-Pressure (Vacuum) Measurement McLeod Gage. Knudsen Gage. Momentum-Transfer (Viscosity) Gages. Thermal-Conductivity Gages. Ionization Gages. Dual-Gage Technique.	491	8.9	Dynamic Response Dynamic Compens
6.10	Sound Measurement Sound-Level Meter. Microphones. Pressure Response of a Capacitor Microphone. Acoustic Intensity. Acoustic Emission.	498	8.10	Heat-Flux Sensors Slug-Type Sensors. (Gardon Gage). / Problems Bibliography
6.11	Pressure-Signal Multiplexing Systems Problems Bibliography	521 524 526		
7	Flow Measurement	527	9	Miscellaneous
7.1	Local Flow Velocity, Magnitude and Direction Flow Visualization. Velocity Magnitude from Pitot-Static Tube. Velocity Direction from Yaw Tube, Pivoted Vane, and Servoed Sphere. Dynamic Wind-Vector Indicator. Hot-Wire and Hot- Film Anemometers. Hot-Film Shock-Tube Velocity Sensors. Laser Doppler Velocimeter.	527	9.1	Time, Frequency, &
7.2	Gross Volume Flow Rate Calibration and Standards. Constant-Area, Variable-Pressure-Drop Meters ("Obstruction" Meters). Averaging Pitot Tubes. Constant- Pressure-Drop, Variable-Area Meters (Rotameters). Turbine Meters. Positive-Displacement Meters. Metering Pumps. Electromagnetic Flowmeters. Drag-Force Flowmeters. Ultrasonic Flowmeters. Vortex-Shedding Flowmeters. Miscellaneous Topics.	566	9.2	Liquid Level
7.3	Gross Mass Flow Rate Volume Flowmeter Plus Density Measurement. Direct Mass Flowmeters. Problems Bibliography	597 608 611	9.3	Humidity
8	Temperature and Heat-Flux Measurement	612	9.4	Chemical Composi
8.1	Standards and Calibration	612	9.5	Particle Instrumen
8.2	Thermal-Expansion Methods Bimetallic Thermometers. Liquid-in-Glass Thermometers. Pressure Thermometers.	619	9.6	Micro-machined Si
			9.7	Fiber-Optic Sensor Problems Bibliography
			Part 3	Manipulatic and Recordi
			10	Manipulating, Compensating
			10.1	Bridge Circuits
			10.2	Amplifiers Operational Ampli

	440	8.3 Thermoelectric Sensors (Thermocouples)	625
nsducers	455	Common Thermocouples. Reference-Junction Considerations.	
ing Tubing	470	Special Materials, Configurations, and Techniques.	
cting. Liquid Systems,	473	8.4 Electrical-Resistance Sensors	642
ystems with Tube Volume		Conductive Sensors (Resistance Thermometers). Bulk	
as Systems with Tube		Semiconductor Sensors (Thermistors).	
The Infinite-Line		8.5 Junction Semiconductor Sensors	652
		8.6 Digital Thermometers	656
ystems	483	8.7 Radiation Methods	657
	489	Radiation Fundamentals. Radiation Detectors. Unchopped (DC)	
	491	Broadband Radiation Thermometers. Chopped (AC) Broadband	
atum-Transfer (Viscosity)		Radiation Thermometers. Chopped (AC) Selective-Band (Photon)	
nization Gages.		Radiation Thermometers. Automatic Null-Balance Radiation	
	498	Thermometers. Monochromatic-Brightness Radiation Thermometers	
sure Response of a		(Optical Pyrometers). Two-Color Radiation Thermometers.	
y. Acoustic Emission.	521	Blackbody-Tipped Fiber-Optic Radiation Thermometer. Infrared	
	524	Imaging Systems. Fluoroptic Temperature Measurement.	
	526	8.8 Temperature-Measuring Problems in Flowing Fluids	692
		Conduction Error. Radiation Error. Velocity Effects.	
	527	8.9 Dynamic Response of Temperature Sensors	702
tion	527	Dynamic Compensation of Temperature Sensors.	
rom Pitot-Static Tube.		8.10 Heat-Flux Sensors	706
l Vane, and Servoed		Slug-Type Sensors. Steady-State or Asymptotic Sensors	
Hot-Wire and Hot-		(Gardon Gage). Application Considerations.	
e Velocity Sensors.		Problems	710
