Contents

<i>List of Contributors</i>	xi
<i>Foreword</i>	xiii

1. Structural Equation Models: An Overview

X

Arthur S. Goldberger

1. Introduction	1
2. Regression and Structure: The Issue of Invariance	2
3. Unobservables and Observables: The Issue of Identification	6
4. Efficiency and Testing: The Issue of Overidentification	13
5. Identification and Inference in Linear Models	14
6. Empirical Analysis of Social, Economic, and Political Processes	16
7. Conclusion	17

2. Identification, Parameter Estimation, and Hypothesis Testing in Recursive Sociological Models

LITDec

Kenneth C. Land

1. Introduction	19
2. Sociological Examples	21
3. The General Model	22
4. Identification	27
5. Parameter Estimation	32
6. Hypothesis Testing	45
7. Concluding Comments	47

3. Measurement Models for Continuous and Discrete Variables

Neil W. Henry

1. Introduction	51
2. Repeated Measurement of One Continuous Variable	52
3. A Measurement Model for Dichotomous Attributes	56
4. Conclusion	64

4. The Identification Problem for Structural Equation Models with Unmeasured Variables

David E. Wiley

1. Introduction	69
2. Measurement Error in Nonsimultaneous Models	71
3. Recursive Models and the Effect of Measurement Error	74
4. Recursive Models with Unmeasured Variables	77
5. Specification of a General Model	78
6. Identification of the Parameters of the General Model	81

5. A General Method for Estimating a Linear Structural Equation System

Karl G. Jöreskog

1. Introduction	85
2. The General Model	86
3. Estimation of the General Model	88
4. Analysis of Artificial Data	90
5. The Special Case of No Errors of Measurement	93
6. An Economic Application	96
7. The Special Case of No Disturbances	99
8. A Psychological Application	101
9. Summary and Conclusion	105
Appendix: Mathematical Derivations	107

6. A Simple Modification of the Two-Stage Least-Squares Procedure for Undersized Samples

Henri Theil

1. The Problem	113
2. Previous Attempts to Solve the Problem	115

3. A Class of Estimators for Undersized Samples	116
4. A Particularly Simple Estimator	120
5. Asymptotic Variances and Covariances	121
6. A Numerical Illustration	122
Appendix	124

7. Efficient Estimation in Overidentified Models: An Interpretive Analysis

Arthur S. Goldberger

1. Introduction	131
2. A Simple Example	132
3. The Generalized Least-Squares Principle	135
4. Univariate Regression with Linear Constraints	138
5. Multivariate Regression with Linear Constraints	140
6. Multivariate Regression with Nonlinear Constraints	142
7. Combining Estimating Equations and Combining Estimates	147
8. Conclusion	152

8. Cross-Lagged and Synchronous Common Factors in Panel Data

David A. Kenny

1. Introduction	153
2. Two-Wave, Two-Variable Models (2W2V)	155
3. Three-Wave, Two-Variable Models (3W2V)	158
4. Two-Wave, Multivariate Models (2WMV)	162
5. Conclusion	163
Appendix	164

9. Diagnosing Indicator Ills in Multiple Indicator Models

Herbert L. Costner and Ronald Schoenberg

1. An Illustrative Problem	168
2. Intuitive Inferences from the Pattern of Residuals	172
3. Two-Indicator Submodels	177
4. Three-Indicator Submodels	184
5. Summary of Strategy	191
6. Applying the Three-Indicator Submodel Procedure to Real Data	192
7. Conclusion	199

10. Ratio Variables and Path Models

Karl Schuessler

1. Introduction	201
2. Early Work	204
3. Later Work	209
4. Guidelines for Research	211
5. Selected Examples	213
6. Related Correlational Analyses	219
7. Concluding Discussion	226

11. Psychological and Cultural Factors in the Process of Occupational Achievement

Otis Dudley Duncan and David L. Featherman

1. The Problem	229
2. Description of Variables	233
3. The Model	238
4. Estimation and Results	243

12. Disaggregating a Social-Psychological Model of Educational Attainment

Robert M. Hauser

1. Introduction	255
2. The Initial Model	257
3. Description of Sample and Variables	259
4. Unconstrained Estimates of the Disaggregated Model	262
5. Constrained Estimates	266
6. Discussion	278
Appendix	282

13. Education, Income, and Ability

Zvi Griliches and William M. Mason

1. Introduction	285
2. The Sample and the Variables	288
3. Direct Results	293
4. Errors in the AFQT Variable and Other Extensions	302
5. Discussion and Summary	311
Appendix	313

14. Love and Life between the Censuses 317*Marc Nerlove and T. Paul Schultz*

Appendix 325

15. Senate Voting: Problems of Scaling and Functional Form*John E. Jackson*

1. Introduction 329
2. The Statistical Problem with Guttman Scales 330
3. The Voting Models, Variable Construction, and LR Results 337
4. Estimation of the Voting Model 341
5. Conclusion 347
