Unsteady Computational Fluid Dynamics in Aeronautics

 Springer

Contents

1	Introduction	1
1.1	Aerospace Challenges	1
1.2	Large Scale Simulations	4
1.3	Computational Cost	5
1.3.1	Turbulence	5
1.3.2	Cost	7
1.4	Unsteady Flow Sources	10
1.4.1	Turbomachinery	10
1.4.2	Unsteady Flow and Airframes	21
1.5	Predictive Accuracy of RANS	25
	References	27
2	Computational Methods for Unsteady Flows	33
2.1	Introduction	33
2.2	Overview of Temporal Discretizations	33
2.3	Temporal Profile Assumptions for Variables	34
2.3.1	Dependent Variable Changes with Time	34
2.3.2	Spatial Variation of the Time Derivative	35
2.4	Two-Level Schemes	36
2.4.1	General Explicit Schemes	36
2.5	Higher-Level Schemes	37
2.5.1	Gear Schemes	38
2.6	Other Temporal Discretization Methods	38
2.7	Elementary Solution Adapted Time-Step Approaches	41
2.7.1	Relating Error Estimate to New Time-Steps	42
2.7.2	Alternative Techniques	43
2.8	Unsteady Adjoint and Time Step Adaptation	43
2.8.1	Adjoint Methods for Unsteady Flow Design Optimization	45
2.9	Temporal Adaptation Using Space-Time Elements/Volumes	45
2.10	Convective Schemes for Unsteady Flow	47
2.11	Classical High-Order Approaches	48

2.11.1 Compact Schemes	48
2.11.2 Discontinuous Galerkin Scheme	50
2.11.3 Spectral Difference, Volume and CPR Methods	51
2.11.4 ENO/WENO	52
2.12 High Resolution Spatial Schemes	52
2.12.1 DRP Schemes	52
2.12.2 CABARET	54
2.13 Convective Schemes for Density Based Solvers and Related Aspects	55
2.13.1 The MUSCL Scheme	56
2.13.2 Monotonicity	58
2.14 Preconditioning	58
2.15 Spatial Order and Solution Accuracy	60
2.15.1 Grid Stretching	62
2.15.2 High Order Upwinding	64
2.15.3 Aliasing and Numerical Order	64
2.16 Smoothing Control	66
2.16.1 Shocks and LES	69
2.17 Mesh Related Techniques	69
2.17.1 Body Fitted Grids	70
2.17.2 Overset Grids	72
2.18 The Substantial Derivative	73
2.19 Simultaneous Equation Solution	75
2.20 Evaluation of the Pressure Field	76
2.20.1 Pressure Subcycling	76
2.20.2 Pressure-Velocity Coupling	77
2.20.3 Compressible Flow Solvers and Pressure Recovery	78
2.21 Boundary Conditions	79
2.22 Impact of Grid Topology on Solution Accuracy	81
2.23 Frequency of Use of Different Numerical Approaches	85
2.24 Conclusions	85
References	86
