TABLE OF CONTENTS

	Page
INTRODUCTION	1
PART I	
CHAPTER 1: ONE-GOOD PRODUCTION AND CONSUMPTION MODELS	7
1.1 THE ONE-GOOD PRODUCTION MODEL	8
1.1.1 Price Supported Programs	9
1.1.2 Steady States and Efficiency	11
1.1.3 Improving Sequences	13
1.1.4 Efficiency Criteria	16
1.2 THE SAMUELSON CONSUMPTION MODEL	19
1.2.1 The Overlapping Generations Model	20
1.2.2 Equilibrium Programs	21
1.2.3 Weak Optimality and Optimality	22
1.2.4 Improving Sequences	23
1.2.5 Optimality Criteria	24
1.2.6 An Interpretation	25
1.2.7 Two Examples	26
CHAPTER 2: REDUCED MODELS	30
2.1 DEFINITIONS	31
2.2 REDUCTION OF THE PRODUCTION MODEL	33
2.3 REDUCTION OF THE CONSUMPTION MODEL	35

	Page
2.4* A DOUBLE INFINITY MODEL OF PRODUCTION	39
2.5* VARIATIONS OVER THE THEME: DISCOUNTED UTILITY MAXIMIZATION	41
2.6* FURTHER APPLICATIONS OF REDUCED MODELS: THE PURE BIRTH PROCESS	45
CHAPTER 3: EFFICIENCY CRITERIA	48
3.1 REDUCED MODELS AND THE COMPOSITION OF RELATIONS	48
3.2 EXAMPLES	50
3.3 THE GENERAL EFFICIENCY CRITERION	56
3.4 PARAMETRIC EFFICIENCY CRITERIA	58
3.5* EFFICIENCY CRITERIA IN RELATED MODELS	61
CHAPTER 4: MEASURES OF CURVATURE AND GENERAL EFFICIENCY CRITERIA	65
4.1 REDUCED MODELS WITH ARBITRARY SUPPORT	65
4.2 EFFICIENCY CRITERIA BY APPROXIMATION AND MEASURES OF CURVATURE	68
4.3* LOCAL APPROXIMATIONS	71
4.4 MEASURES OF CURVATURE IN THE PRODUCTION MODEL	73
4.4.1 Parabolic Measures of Curvature	74
4.4.2 Benveniste's Measure of Curvature	77
4.4.3 Mitra's Condition S	78
4.5 MEASURES OF CURVATURE IN THE CONSUMPTION MODEL	79
4.6* OPTIMALITY CRITERIA FOR THE DISCOUNTED UTILITY MODEL	81
4.7* DIVERGENT BIRTH PROCESSES	83
CHAPTER 5: APPROXIMATING SETS AND MEASURES OF CURVATURE	86
5.1 AXIOMS FOR AN APPROXIMATING FAMILY	87
5.2 DISCUSSION OF THE AXIOMS	88
5.3 THE APPROXIMATING FAMILY DETERMINED BY THE AXIOMS	89
5.4 A FURTHER PROPERTY OF THE FAMILY Ω^0	92

PART II

	Page
CHAPTER 6: MARKET STRUCTURES AND OVERLAPPING MARKET ECONOMIES	96
6.1 MARKET STRUCTURES	97
6.2 COUNTABILITY PROPERTIES AND THE CANONICAL MARKET STRUCTURE	102
6.3 ECONOMIES OVER MARKET STRUCTURES	103
6.4 EXAMPLES	108
6.5 MAPS AND MORPHISMS BETWEEN ECONOMIES OVER MARKET STRUCTURES	110
 CHAPTER 7: REDUCED MANY-GOODS MODELS	 116
7.1 REDUCED MODELS AND EFFICIENCY	117
7.2* INVARIANCE PROPERTIES OF REDUCED MODELS	120
7.3 THE REDUCED MODEL ASSOCIATED WITH AN ECONOMY AND AN ALLOCATION	123
7.4 PARETO OPTIMALITY AND EFFICIENCY OF THE REDUCED MODEL	126
7.5* THE EXISTENCE OF SUPPORTS	130
 CHAPTER 8: EFFICIENCY CRITERIA FOR MANY-GOODS MODELS	 138
8.1 THE PARETO IMPROVEMENTS IN A REDUCED MODEL	139
8.2 THE COMPOSITION OF SETS	141
8.3 A GENERAL EFFICIENCY CRITERION	142
8.4* CLOSED AND PSEUDO-CLOSED REDUCED MODELS	147
8.4.1 A Sufficient Condition for Closedness	148
8.4.2 Applications to Generation Models and Two Examples	151

	Page
CHAPTER 9: APPROXIMATIONS OF MANY-GOODS MODELS	157
9.1 EXAMPLES OF MORPHISMS	158
9.2 AXIOMS FOR AN APPROXIMATING FAMILY	159
9.3 APPLICATIONS OF THE MEASURE OF CURVATURE	164
9.4 VALUE MODELS	167
REFERENCES	170
INDEX	177

ACKNOWLEDGEMENT

Bodil Olai Hansen has read part of the manuscript and thereby saved us from some mistakes and misprints. We want to use this opportunity to thank her as well as Erling Petersson, who has helped us conquer the mysteries of the word processor, and Agnetta Kretz, who has drawn the diagrams.

The Swedish Social Science Foundation and the Royal Swedish Academy of Science has provided financial support for Anders Borglin.
