<i>Preface</i>		<i>xxi</i>

PART ONE ENVIRONMENTAL VALUES: THE INSTITUTIONAL AND BIOLOGICAL SETTING FOR SPECIES CONSERVATION

1. INTRODUCTION	3
Introduction	3
Environmental values	3
Objectives of this study	4
Plan of the book	6
2. THE INSTITUTIONAL SETTING: THE VICTORIAN FLORA AND FAUNA GUARANTEE ACT	8
Introduction	8
The Flora and Fauna Guarantee legislation	9
The national legislation	20
3. ENDANGERED SPECIES IN VICTORIA	26
Introduction	26
Endangered species in Australia	26
Leadbeater's possum	27
Conclusions on management	31

PART TWO	WELFARE ECONOMIC PRINCIPLES OF SPECIES CONSERVATION	
4.	WELFARE ECONOMIC PRINCIPLES AND ISSUES	35
	Introduction	35
	Methodological issues	35
	Choice of welfare measure	36
	Willingness to pay and willingness to accept	37
	The issue of preference	40
	Ordinal social welfare functions	41
	Biodiversity and distribution	48
5.	THE ECONOMICS OF SPECIES CONSERVATION	50
	Introduction	50
	Biodiversity loss and species extinction	50
	The economic literature relating to species	51
	Benefits derived from species and ecosystems	52
	Why are species threatened?	57
	Determining conservation priorities	62
	Valuing species conservation	66
	Conclusions	71
PART THREE	THE CONTINGENT VALUATION METHOD	
6.	THE CONTINGENT VALUATION METHOD	77
	Introduction	77
	Methodological concerns	78
	Estimate reliability and validity	91
	The state of contingent valuation	93
	Conclusions	95
7.	ESTIMATING CHANGES IN WELFARE FROM DISCRETE CHOICE SURVEYS	97
	Introduction	97
	Discrete choice response analysis	97
	Design of the bid vector	99
	Utility maximisation and discrete choice analysis	100

Welfare measures	104
Truncation at high values	106
Estimation procedures	107
Analysis of zero responses	113
Conclusion	115

PART FOUR THE SURVEY APPLICATION TO SPECIES CONSERVATION

8. A CONTINGENT VALUATION SURVEY OF ENDANGERED SPECIES IN VICTORIA	119
Introduction	119
The questionnaires	119
The survey hypotheses	123
Choice of survey type, question type and payment mechanism	127
Administration of the survey	129
Frequencies of responses to selected questions	132
The willingness to pay question	140
Socioeconomic variables	143
Consistency checks and missing data	148
9. ESTIMATION OF WILLINGNESS TO PAY	150
Introduction	150
Refusals and zero responses	150
Willingness to pay distributions and data sets	156
Regression analysis of discrete choice data	160
Estimation of willingness to pay from discrete choice data	164
Estimation of willingness to pay from continuous valuation data	179
Comparison of willingness to pay from discrete and continuous data	183
Comparison of continuous valuation responses between questionnaires	188
Analysis of the willingness to accept compensation responses	191
Aggregation of willingness to pay estimates	194
Conclusions	198

PART FIVE CONCLUSIONS

10. CONSERVATION VALUE: ESTIMATION AND METHODOLOGICAL INFERENCE	201
Introduction	201
Review of survey results	201
Validity of the survey results	208
Possible biases	209
Further research	215
11. FROM CONTINGENT VALUATION TO SPECIES CONSERVATION POLICY	221
Introduction	221
Using the results of the Victorian contingent valuation survey	222
Contingent valuation and policy application	226
Species valuation surveys	235
From contingent valuation to species conservation	241
<i>References</i>	245
<i>Subject index</i>	267
