1 Personnel Economics and Non-Competitive Labour Markets	1
1.1 Introduction	1
1.2 The Job in an Imperfect Labour Market	2
1.2.1 Perfect Labour Market	3
1.2.2 Imperfect Labour Market with Wage Set by the Firms	4
1.2.3 Imperfect Labour Market with Surplus Splitting	4
1.2.4 Imperfect Labour Market with Exogenous Wage	5
1.3 Minimum Wage Constraints and Union Density	5
1.4 Employment Protection Legislation	7
2 The Optimal Skill Ratio	11
2.1 Introduction	11
2.2 A General View on Personnel Policies at the Hiring Stage	12
2.3 The Optimal Skill Ratio: Key Concepts	12
2.3.1 Skilled and Unskilled Labour Interdependent (Interior Solution)	15
2.3.2 Skilled and Unskilled Labour Independent (Corner Solution)	19
2.3.3 The Effects of Wage Compression	21
2.3.4 Independent Skilled and Unskilled Labour Interacting with Costly Capital	22
Appendix 2.1. A Formal Expression of the General Problem	24
3 The Hours–Employment Trade-Off	27
3.1 Introduction	27
3.2 A Formal Classification of Labour Costs	27
3.2.1 Non-recurring Fixed Costs	28
3.2.2 Recurring Fixed Costs	29
3.2.3 Variable Costs	29

3.3	A Theory of the Hours–Employment Trade-Off	29
3.3.1	The Isocost and the Total Labour Costs	29
3.3.2	A Formal solution to the Employment–Hours Trade-Off	33
3.4	The Overtime Premium and the Effects of Reducing the Workweek	34
3.4.1	Firm Position with the Overtime Premium	34
3.4.2	The Effect of a Reduction in the Normal Workweek	35
3.5	Reducing the Workweek: A Natural Experiment from France	36
3.6	Theoretical Predictions and a Natural Experiment	38
3.7	The Evidence	39
	Appendix 3.1. A More Formal Version of the Hours–Employment Trade-off	41
4	Temporary or Permanent?	45
4.1	Introduction	45
4.2	Permanent Contracts with Fixed Wages	46
4.2.1	A Numerical Example	47
4.2.2	Formal Derivation	49
4.3	Temporary Contracts as a Buffer Stock	52
4.4	The Buffer Stock Model with Interim Costs	53
4.5	Temporary Contracts with Costly Turnover: Costs and Benefits	55
4.6	A Brief Look at the Evidence	58
	Appendix 4.1. The Formal Derivation of the Buffer Stock Model	60
	Appendix 4.2. The Formal Derivation of the Buffer Stock Model with Costly Interim Agency	60
5	Managing Adverse Selection in Recruiting	62
5.1	Introduction	62
5.2	Contingent Contracts	63
5.2.1	Piece Rate as a Contingent Contract	64
5.2.2	Temporary Contract with Probation Wage	67
5.2.3	Contingent Contracts with Minimum Wages	72
5.3	Use of Credentials and the Signalling Model of Education	74
5.4	Education Signalling	74
5.5	Education Signalling: A Formal Story	78
5.6	Rules of the Game	78
5.7	No Education Equilibrium (Pooling Equilibrium)	79
5.8	Education Equilibrium (Separating Equilibrium)	80

6 Optimal Compensation Schemes: Foundation	82
6.1 Introduction	82
6.2 A Formal Principal–Agent Model	84
6.2.1 The General Setting	84
6.2.2 The Problem of a Risk-Neutral Agent	89
6.2.3 The Problem of the Principal with a Risk-Neutral Agent	92
6.3 The Basic Scheme with Non-Negative Payments	98
6.4 The Basic Scheme when the Agent is Risk Averse	100
6.4.1 The Agent Preferences	100
6.4.2 The Problems of the Agent	101
6.4.3 The Problem of the Principal with a Risk-Averse Agent: The Optimal Bonus Scheme	102
Appendix 6.1. What if the Principal and the Risk-averse Agent Could Contract on Effort	104
7 Pay for Performance with Wage Constraints	107
7.1 Introduction	107
7.2 Heterogeneous Ability: The Set-Up	108
7.3 Fixed Wage with Minimum Output	111
7.4 Pure Rent: Fixed Wage with Minimum Output and Heterogeneous Ability	111
7.4.1 A Numerical Example	114
7.5 Performance Pay with a Two-Tier Wage System	115
7.5.1 The Formal Solution to the Two-Tier Wage System	117
7.5.2 Two-Tier System: An Example	120
7.6 Pay for Performance at Safelite	121
7.6.1 Theoretical Predictions	123
7.6.2 Basic Statistics	123
7.6.3 Basic Results	124
7.6.4 Possible Interpretations	124
7.7 Econometrics	126
7.7.1 Other Issues	127
Appendix 7.1. The Basic Franchising Scheme With the Ability Parameter	128
Appendix 7.2. An Optimal Scheme With a Fixed Wage	129
8 Relative Compensation and Efficiency Wage	132
8.1 Introduction	132
8.2 Tournament: A Formal Story	133
8.2.1 Worker Problem	135
8.2.2 Firm Problem	136

8.2.3	Obtaining the Wages	137
8.2.4	Heterogeneity and Risky Strategies	138
8.3	Linear Performance Evaluation	139
8.3.1	Indirect Evidence of Relative Compensation	140
8.4	Evidence on Tournaments in Broiler Production	140
8.5	Broiler Production	141
8.6	Efficiency Wage	146
8.7	Deferred Compensation and Upward-Sloping Wage Profile	149
9	Training and Human Capital Investment	152
9.1	Introduction	152
9.2	The Basic Human Capital Model of Schooling	153
9.3	General versus Specific Investment	156
9.4	General Training	156
9.4.1	The Basic Set-up	156
9.4.2	The Efficient Level of Training	157
9.4.3	The Solution of the Model	158
9.4.4	Investment in General Training: An Example	159
9.5	Firm-Specific Training	160
9.5.1	Surplus and Specific Rent	162
9.5.2	Rent Sharing	163
9.5.3	Firm-Specific Human Capital: An Example	166
9.6	Some Evidence on Training	166
	Appendix 9.1. General Training	167
	Appendix 9.2. Firm-Specific Training	169
10	Training Investment in Imperfect Labour Markets	171
10.1	Introduction	171
10.2	Firm-Sponsored Training: The Baseline Case	172
10.2.1	The Set-up	172
10.2.2	The Solution	174
10.3	A More General Framework	176
10.4	Firm-Sponsored Training in Temporary Help Firms	181
10.4.1	The Evidence: Wages and Training in the THS Industry	183
10.4.2	A Possible Story for the THS Evidence	185
11	Job Destruction	187
11.1	Introduction	187

11.2	Firm-Initiated Separations and Wage Cuts in Imperfect Labour Markets	188
11.2.1	Job Destruction: An Example	191
11.2.2	Job-Preserving Wage Cuts with Asymmetric Information	192
11.3	Labour Hoarding and the Effect of Firing Taxes	193
11.4	Job Creation, Job Destruction, and Labour Hoarding	195
	Appendix 11.1 Present Discounted Values and Multi-period Jobs	200
12	Further Issues in Employment Protection Legislation	202
12.1	Introduction	202
12.2	EPL Taxes and Transfers	203
12.2.1	Calculating Taxes and Transfers	204
12.3	Outsiders, Insiders, and Tax and Transfers	207
12.3.1	Deriving the Wages with Severance Payments	208
12.3.2	Deriving the Wages with the Firing Tax	210
12.4	Threshold Effects	212
12.4.1	The Set-up of the Model	213
12.4.2	The Efficient Allocation	213
12.4.3	The Rigid System	214
12.4.4	The Role of Threshold Effects	215
13	Teams and Group Incentives	218
13.1	Introduction	218
13.2	The Team Production Problem	219
13.3	Team Norms as Remedies to the Team Production Problem	221
13.4	Teams in Reality	222
13.5	A Case Study: Production at Koret	223
13.5.1	The Impact of Teams on Productivity at Koret	225
13.5.2	Who Joins a Team?	227
13.5.3	How Does a Team Composition Affect Team Productivity?	230
13.5.4	Discussion and Conclusion	230
	Appendix A. Labour Demand at the Firm Level	232
	Appendix B. Constrained Optimization	238
	References	242
	Index	247
